PRIVATE SECRETARY'S OFFICE.

NOTIFICATIONS

FIG. 4. MURRAY CELLAR, SARGENT.

(S. 1.)—Information has been received from the Army Department of the Government of India that the usual entrance examinations for the colonies of India candidates for admission to the Royal Military College, Sandhurst, for the term commencing on 1st January in September 1927 will be held in Simla from the 1st to the 25th May 1927. The following information is published for the use of recruiting authorities.

1. The Royal Military College is maintained for the purpose of affording a special military education to British candidates for commissions in the Cavalry, Infantry and Royal Army Service Corps of the British Service and to British and Indian candidates for commissions in the Indian Army. It is intended exclusively for those who desire to make the Army their career and profession in life.

Anglo-Indian candidates are also permitted to compete at the entrance examinations under the same conditions as Indian candidates, but descented Europeans of pure European descent may not sit at the Secondary entrance examination in England only.

2. Candidates must be between the age and 20 on the 1st July 1977 and must be age definitely. No exception to five years the limits are, in any circumstances, to made, as for

3 Candidates must be prepared to
qualifying examination, the *dissertation*, a
which is posted as Appendix A to the *thesis*, a
The general observational standard is
provided for the diploma of the *Chancery* from
with 4 learning activities: program/outline and
development, the *Methodology* applied to the
incorporated University or any higher

4. Candidates will, in addition, submit general and test which will be administered at the offices concerned under the supervision of the Commanding Officer. The results of the Board to form an opinion on the candidate's general character from the point of view of his suitability as an army officer.

3. Candidates will be examined by a Board of Studies and will not be accepted if they are pronounced physically fit for military service. The general standard stream laid down in Appendix B to this notice.

The Board has ordered
 that we wear the vestigial as above stated.

(f) To report the candidate as ineligible.

(g) In a case in which the defect is by omission or treatment, is necessary

successful in the competition, he be recommended by a Medical Board after such examination or treatment.

(5) In a case in which the candidate is slightly below one or other of the standards as to height, chest, girth, etc., mentioned in Appendix B and in which the Board considers that he is likely to attain the required standard before the time comes for him to be appointed to a commission, to recommend that, if successful in the competition, he be allowed to join the Royal Military College subject to the condition that, even at the end of the course he is found to reach the standard which he was not up to, and, if not, he will not receive his commission.

(6) To reject a candidate as physically unfit.

A candidate who has been passed by a Medical Board as physically fit in accordance with the previous Army Entrance Examination will not be exempt from being re-examined by a Medical Board.

Candidates are required to attach to their application a recent photograph from a *reputable medical officer* to the effect that they come up to the prescribed standard, and also a statement certifying that they have been successfully (previous successful) vaccinated within the last five years.

A Candidate is required to furnish a declaration in the following form signed by their parents or guardian:—

"I, _____, father of _____ a candidate for admission to the Royal Military College, Sandhurst, am able and willing to pay the prescribed fees and meet the incidental expenses.

It is my intention to make the Army my son's professional profession in life.

Specimens of parent or guardian.

T. Subject to the conditions specified below, candidates will be admissible on the following conditions:—

(1) to selected candidates attending the medical and qualifying examinations in India from their homes and back.

(2) who graduated to join the Royal Military College, Sandhurst, from their residence in Great Britain.

The amount admissible on account of railway fares and one journey within India will be limited to one *first-class* fare for each candidate. Amount admissible for road journeys will be not in the railway rates for class *second* or *third* class travelling on G.O.

When the railway fares should be made to the Secretary to His Excellency the Governor-General. Passages by sea from India to England will be arranged by the Commandant, Sandhurst, under orders of the Secretary.

If otherwise is admissible to candidates with their journeys to Madras or in the case may be, for the purpose of the Secretary the Overseas.

Government buildings is available, will be provided with private accommodation in a hotel at Madras. Candidates will be for cooking, but the cost of the food of the will be borne by Government. Suitable meals will be made for their candidates as provided, by order, from cooking the food.

In any arrangements for quarters in the hotel these provided, but they will be liable for all cost incurred. Candidates will, to be allowed to live elsewhere.

Government house, where the candidate is with sufficient funds to meet the cost of as while in India.

In no circumstances will candidates or their parents, guardians, relatives, or friends, be permitted to interview any officer of the Army Headquarters Staff, other than the officer detailed for the examination or selection of candidates. An attempt to do so is liable to result in the disqualification of the candidate.

A selected candidate will be sent to England by train in charge of a British officer, who will be appointed by Army Headquarters, and who will meet the candidate at Sandhurst. Each candidate will hand over to the officer at Sandhurst the sum of Rs. 200 to cover the cost of expenses incurred during the voyage to England.

Indian Candidates who pass out of the Royal Indian Military College, Sandhurst, in July annually, will, if they so desire, be granted return passages to India at Government expense, by *private means*. They cannot however, who, to suit their own convenience, does not take advantage of this concession by the 31st September of the year in which he passes out will be provided in Great Britain for passage by transport to India.

20. The fees for candidates at the Royal Military College, Sandhurst, are shown below and are exclusive of electrical expenses and candidates, etc. (see paragraph 12).—

(a) For a King's Indian College may be arranged by the Secretary of State for India in Council.

For the use of—

(1) A private gentleman

(2) An officer or soldier who has died which on full pay, half pay, retired pay or pension, and whose family has been left in pecuniary distress (subject to the approval of the Secretary of State for India).

(3) A demand officer of whatever rank, whose widow is, or would have been, if living, eligible for pension.

(4) A soldier who is serving, or who died while serving, with the colours, or who was discharged either on account of ill-health caused by the service, or after at least twenty years' soldier service.

(5) An officer who is (or, if deceased, was at the time of his death) on the active list holding rank below the substantive rank (as regards substantive rank, medical, dental and veterinary officers) or the rank (as regards officers holding honorary King's Commissions as Lieutenants and Captains) of Lieutenant-Colonel in the Indian Army.

A retired officer who last served in a rank below the substantive rank, and retired with not less than twenty years' service as an officer of age, non-commissioned, or ill health caused by the service, or on retirement of establishment.

(6) An officer who is (or, if deceased, was at the time of his death) on the active list holding the substantive rank (as regards substantive rank, medical, dental and veterinary officers) or the rank (as regards officers holding honorary King's Commissions as Lieutenants or Captains) of Lieutenant-Colonel in the Indian Army.

A retired officer who last served in any of the above ranks and retired on stated in (5).

(7) A serving or retired officer not otherwise specially provided for.

If the father of a candidate is promoted, retired or dies, the rate of contribution will be altered accordingly.

The reduced rates of fees laid down for the sons of officers do not apply to stepsons or to those who are partially dependent on stepfathers. The stepsons

Parent or guardian's declaration

Free passage and travelling allowances.

For the use of—

(1) A private gentleman

(2) An officer or soldier who has died which on full pay, half pay, retired pay or pension, and whose family has been left in pecuniary distress (subject to the approval of the Secretary of State for India).

(3) A demand officer of whatever rank, whose widow is, or would have been, if living, eligible for pension.

(4) A soldier who is serving, or who died while serving, with the colours, or who was discharged either on account of ill-health caused by the service, or after at least twenty years' soldier service.

(5) An officer who is (or, if deceased, was at the time of his death) on the active list holding rank below the substantive rank (as regards substantive rank, medical, dental and veterinary officers) or the rank (as regards officers holding honorary King's Commissions as Lieutenants and Captains) of Lieutenant-Colonel in the Indian Army.

A retired officer who last served in a rank below the substantive rank, and retired with not less than twenty years' service as an officer of age, non-commissioned, or ill health caused by the service, or on retirement of establishment.

(6) An officer who is (or, if deceased, was at the time of his death) on the active list holding the substantive rank (as regards substantive rank, medical, dental and veterinary officers) or the rank (as regards officers holding honorary King's Commissions as Lieutenants or Captains) of Lieutenant-Colonel in the Indian Army.

A retired officer who last served in any of the above ranks and retired on stated in (5).

(7) A serving or retired officer not otherwise specially provided for.

If the father of a candidate is promoted, retired or dies, the rate of contribution will be altered accordingly.

The reduced rates of fees laid down for the sons of officers do not apply to stepsons or to those who are partially dependent on stepfathers. The stepsons

of an officer can only be admitted, at a reduced rate when the services rendered by his father qualify for a reduction.

11. The total sum required by an Indian cadet at the College may be estimated as follows:—

(a) *Sum of an officer before the rank of Lieutenant-Colonel.*

	Rs. & c.
First three terms at £26 per annum	£2 10 0
Clothing and account	70 0 0
Pocket money—18 months at £3 per month	54 0 0
18 weeks' vacation expenses at £5-5-8 per week	94 10 0
Extra pocket money during vacation (18 weeks) at £5-5-8 per week	94 14 0
Boarding during the three terms and outfit on being commissioned	300 0 0
(a)	567 14 0

(b) *Sum of a private gentleman.*

	Rs. & c.
First three terms at £22-8-0 per annum	304 0 0
Clothing and account	70 0 0
Pocket money—18 months at £3 per month	54 0 0
18 weeks' vacation expenses at £5-5-8 per week	94 10 0
Extra pocket money during vacation (18 weeks) at £5-5-8 per week	94 14 0
Boarding during the three terms and outfit on being commissioned	300 0 0
(b)	776 4 0

12. The sum for sundries includes additional expenses during the service, such as travelling and entertainments. The expenses of cadets will, as far as possible, be kept within the above limits, but the parents or guardians of cadets must be prepared to pay any excess over these maxima.

13. The above estimate does not provide for European kit as worn in England, other than the amount required for College uniform; for the purchase of European kit an additional sum of from £20 to £250 should be provided.

14. An allowance of 4s. a day, in aid of the expenses of eating, washing, and other contingencies, will be admitted as a charge against the parents for each cadet so long as he is in residence at the Royal Military College. All other necessary expenses which cannot be covered by this allowance will be chargeable to the parent or guardian of a cadet.

15. If a cadet is absent a whole term in consequence of sickness, a payment of £10 shall be required in lieu of the half-year's contribution for the privilege of his name being kept on the roll of the establishment, and for a money being kept open at the commencement of the next term.

16. If a cadet is suspended or removed during a term, his daily allowance shall cease from the date of such suspension or removal, and the contribution made for the half-year shall be forfeited, unless otherwise specially decided by the Army Council.

17. (a) If a cadet is absent from sickness during a portion of the term, his allowance shall continue to be issued and credited to his account. In exceptional cases a refund of the contribution for the period of absence may be sanctioned by the Commandant, and in such cases the cadet's allowance shall cease for the period of the refund.

(b) If a cadet is notified for treatment in a detailed military hospital, his wages will be charged for the period of his detention in hospital at the following rates:—

- (1) 3s. 6d. a day during the period that the daily allowance specified in paragraph 14 continues to be credited to his account.
- (2) 12s. a day if and when the daily allowance ceases to be credited, to be assessed by reason of the contribution, or portion thereof, due under paragraph 16, for the period of his absence not having been paid or having been refunded in accordance with paragraph 14.

18. Parents or guardians of candidates are required to pay two-thirds of the estimated expenditure (i.e., either (a) £175-10-0, or (2) £185-10-0), before the beginning of the first term of the Second year, and the remainder one-third (i.e., either (a) £185-10-0, or (2) £258-8-0) before the commencement of the third term.

As it is impossible for Indian cadets to return to India during the vacations, arrangements will have to be made for their accommodation in England during these periods, either by their parents or guardians or by the India Office on behalf of the Government.

19. The normal length of the course of instruction will be about eighteen months divided into three terms. The College terms will be:—

Spring term—From about beginning of February to about middle of July.

Autumn term—From about beginning of September to about middle of December.

The intermediate periods will constitute the vacations.

20. The subjects which form the course of studies, which are liable to alteration from time to time, are given in the following table:—

Subject.
Tactics, Drill, Field Engineering, Hygiene.
Map reading and Field Sketching.
Organization and Administration.
Military Law.
History and English (including Military History).
Geography.
Alternative Subject (Science, French or Advanced History).
Draft.
Equitation.
Weapons Training.
Physical Training.

21. The aggregate marks will determine the cadet's place in order of merit when posting out for appointment to a commission.

22. To qualify for promotion to a higher term, a cadet will be required to obtain not less than 80% of the aggregate marks allotted to the term.

To qualify for appointment to a commission from the third term, a cadet will be required to obtain not less than 80% of the aggregate marks allotted to the term.

To secure marks in any subject, a cadet must obtain not less than 4% of the total marks allotted to that subject for the term.

23. At all examinations a deduction of marks, up to a specified part of the maximum, will be made for handwriting which is difficult to read. A similar deduction, up to the same limit, will be made for bad English spelling.

These deductions must not reduce below the qualifying minimum the aggregate marks obtained by the cadet.

24. A cadet who fails to obtain the qualifying minimum of marks for any term will lose that term, and will forfeit all claim to compete for appointment.

* This figure has been temporarily reduced to 8.

to the Indian Army. He will be awarded that if he fails at a subsequent examination he will be awarded a 2nd Class.

25. In order to ensure due diligence during the whole period of residence, there shall be an examination at the end of each term awarded, either by the Indian staff of the Cadet College or by independent examiners.

26. When a cadet passes out of the Cadet College, the Commandant will award that if he has been paid. In those cases where the certificate cannot be given, the granting of a commission will be liable to be withheld unless such defects are discharged.

27. All cadets are expected to pass the Regulation Army Test in swimming; those who cannot swim are joining the Cadet College must attend instruction in swimming. Any one who ultimately fails to pass the test will, at the discretion of the Commandant, lose not more than 20 marks he has gained in physical training.

28. The case of a cadet who incurs an examination or part of an examination, owing to sickness or through any other of his own, will be specially considered by the Commandant, who will report the action taken to the Under Secretary of State, the War Office. In no case should more than 70 per cent of the marks allotted to the examination stand be allowed.

29. Cases of premature absence on account of (a) health will be referred to the War Office for decision.

At each final examination there will be awarded—

(a) The King's Medal and a sword to the cadet who comes out first on the list.

(b) The Memento Medal to the senior Cadet appointed to the Detached List for the Indian Army.

(c) A sword of honour to a special reward to the most deserving cadet of the term.

(d) A prize for proficiency in each subject.

30. At the end of each session, from the Army Memorial Board will be given to the two cadets who come out first on the list.

31. A cadet who drops a sword from among others that remains, awarded to him on his part, will forfeit all claim to prize, in the King's Medal, the Memento Medal, and to the Army Memorial Board.

Cadet Scholarships.

32. Twenty-three Cadet Scholarships for the Royal Military College, in value, £20 each, will be open for competition half-yearly to cadets who have completed their first year of residence in the Cadet College and who are sons of officers who gained their commissions through an Officer Cadet Unit during the Great War.

33. Cadet Scholarships will be awarded to those cadets who are eligible under paragraph 32 and who are listed in order of merit according to the marks allotted under paragraph 30.

34. In the event of the number of available scholarships under paragraph 32 falling short of the number of cadets available, the remaining scholarships will be open for competition to cadets who are the sons of serving or retired officers of the Royal Navy, the Regular Forces and the Royal Air Force.*

35. A cadet who has been nominated or who has dropped a term for other reasons than sickness

* To be eligible for such scholarships, which include maintenance, fees, and pocket money, in the Royal Navy, Royal Air Force, and Regular Forces, the father must be a Captain, Major, or Lieutenant Colonel in the Regular Forces, or a Major, Lieutenant Colonel, or Captain in the Reserve Forces, or a Major, Lieutenant Colonel, or Captain in the Regular Forces, or a Major, Lieutenant Colonel, or Captain in the Reserve Forces, or a Major, Lieutenant Colonel, or Captain in the Regular Forces, or a Major, Lieutenant Colonel, or Captain in the Reserve Forces.

(see paragraphs 34, 35 and 36) will not be eligible for a Cadet Scholarship.

36. The following marks will count towards Cadet Scholarships—

(a) All marks gained by cadets in their first year which count towards the aggregate (see paragraph 30).

(b) Marks for each cadet who represents the Cadet College at sports at the rate of 100 marks for each "Blue," and 50 marks for each "half Blue."*

(c) Marks for promotion gained during first year at the rate of 100 marks for each promotion and 50 marks for each promotion.

37. While an enquiry will be made into the marks of the sports at games of cadets, Cadet Scholarships are absolutely designed to give preference to those who stand in front of the marks made at sports. Marks at sports of cadets will therefore be invited to reach the requirements of a Cadet Scholarship should they be in a position to do so, retaining the right of selection for their own or marks. The marks made at sports will be offered to the next cadet in the list who is eligible. A list of marks to whom Cadet Scholarships have been awarded will be published each half-year.

38. Should a cadet who has gained a Cadet Scholarship be subsequently expelled or resigned, or dropped his name from the list in which he originally started on joining the Cadet College for other reasons than sickness (see paragraphs 31, 32 and 34), he will be called upon to surrender the scholarship gained as a cadet scholar.

A cadet scholar who forfeits his scholarship will be liable to refund such portion as may be determined by the Army Council of the financial benefits that he has received as a cadet scholar.

39. King's Indian Cadets and Reserve King's Indian Cadets will be permitted to compete for Cadet Scholarships, provided they are eligible.

SCHOLARSHIPS FOR OFFICERS APPOINTED TO COMMISSIONS IN THE ROYAL MILITARY COLLEGE.

40. Scholarships of the annual value of £50, payable for two years, are granted to officers appointed to commissions in the Regular Army from Royal Military College, Sandhurst.

41. Six scholarships will be allowed half-yearly, commencing with the Regular Army candidates posted in February 1935, which will make cadets posted to the Royal Military College in August 1934 eligible to compete.

42. The following will be recipients of these scholarships—

(i) The cadet awarded the sword of Honour.

(ii) The cadet passing out with the highest aggregate of marks.

(iii) The cadet, admitted to the College under Army Order 413 of 1931, obtaining the highest aggregate of marks.

(iv) The cadet passing out with the second highest aggregate of marks.

(v & vi) The two cadets recommended by the Commandant to the next most deserving on the grounds of all-round efficiency.

43. Payment will be made by the Army Agent of two months' salary of the officer's pay, in two instalments of £25 each, issued half-yearly in advance. The first payment will be made on the nomination of the officer's appointment to the Indian Service.

* The sword is to be worn with a "Blue" and a "half Blue" will rank with the "Blue".

† In the event of one cadet qualifying under more than one head, the Commandant will be required to make reasonable selection. No cadet shall hold more than one scholarship.

Corpor. Cells, bones, and cells. The relation of the strength to physical and animal life. The part played by nature in the growth of plants.

Physical Chemistry.—Experiments illustrating the difference between elements, compounds, and mixtures; the properties and properties of the elements and the simple compounds of the elements in the schedule; observations on the behaviour of bodies under the action of gravity, including bodies not contained in the schedule; simple experiments involving weights and the measurement of values, including the solution of gases.

In the event of a practical test being impossible, the study of its results will be referred to the written papers.

CENTRAL SCHOOL.

March 1897

Papers will be set to test the candidate's knowledge of scientific principles and of their application in everyday life, as indicated in the following schedule:—

Principles of mechanics, illustrated by falling bodies and by simple machines; the meaning of mass, weight, force, energy; the transformation of energy.

The general properties of solids, liquids and gases; principles of hydraulics with practical applications; outlines of diffusion and osmotic tension.

Production and sources of heat; the ideas of temperature and quantity of heat; effects of heat on matter, transformation of heat. Relation between heat and work as illustrated in the steam engine and the internal combustion engine. Domestic heating and ventilation.

Production and propagation of sound; pitch, loudness and quality.

Production and propagation of light; reflection, refraction and dispersion; colour. The eye and simple optical instruments. Domestic lighting.

Elementary ideas of magnetism. The fundamental principles of electrostatics. Effects of the electric current, Ohm's law. Current electricity, with the outlines of its applications in the dynamo. Practical applications of electricity to domestic lighting and in the transmission and transformation of energy.

The chemistry of air and water and of the elements contained in them. The chemistry of solutions; common forms of fuel; carbon as a reducing agent in metallurgy. The relation of the air and its constituents to the life of plants and animals and to the weathering of rocks. The general laws of chemical combination illustrated by a few common substances (e.g., chalk, sulphur, salt and the common acids and bases); significance of these laws by the atomic theory.

The distinction between living and non-living things; the distinction between typical plants and typical animals. The life of a plant; importance of plants in building up food and fuel. Fundamental principles of agriculture. Simple cases of fermentation and various other. Simple physiology and hygiene.

The solar system, stars and nebulae. General structure of the earth's crust; igneous and sedimentary rocks; agents of denudation and deposition; fossils and their significance.

Some ideas of geology will be given. An interesting and way to it is laid in the subject matter of the above syllabus, but the entire will be given in the examination.

INTERMEDIATE MATHEMATICS.

March 1897

Includes Elementary Mathematics together with—

Geometry.—Elementary ideas in solid geometry treated informally (angle between planes, angle between line and plane, plane and plane, angle of sphere, mensuration).

Algebra.—Relation of two straight lines, equations, one linear and one quadratic, very questions in variation; the meaning and algebraic properties of negative and fractional indices; use of logarithmic notation; arithmetic progression, finite geometric progression; rate of change of a function and gradient of a graph; partial application of quadratic and of sums of series.

Trigonometry.—Relation of given triangles, circle of trigonometrical functions, use of four-figure tables, formulae for trigonometrical values of the sum and difference of two angles.

Statics and Dynamics.—The lever, the inclined plane, the pulley and other simple machines; the comparison and resolution of forces in any plane; moments; simple graphical methods; friction; simple cases of equilibrium; properties of the centre of gravity; work; velocity ratios, mechanical advantage, and efficiency of a machine.

The composition and resolution of velocities and accelerations in any plane; resistive motion under uniform acceleration; Newton's laws of motion; the conservation of linear momentum; work and energy; the time of flight, greatest height, and horizontal range of projectiles.

Proofs of the parallelogram and triangle of forces, and of the principle of moments will not be asked for.

In the absence of special instructions, a question in it is to be solved by a particular method, candidates are at liberty to choose that method from any class of mathematics.

Exam. MURRAY FARMER, F.R.S. on BARBARI.

March 1897.

1. Translation from the Yorubaland into English.
2. Translation from English into Yorubaland.
3. An essay or letter on one or two alternative subjects.

4. Candidate to—

(i) talk in the Yorubaland.
(ii) make a short dictated passage in the Yorubaland.

FRAMING DRAWING.

March 1897

In addition, if so desired, Freehand Drawing may be taken.

THE CAMBRIDGE UNIVERSITY SYLLABUS.

The order in which the three courses stated is not imposed on the sequence of their treatment.

SECTION I.

PRACTICAL GEOMETRY.

1. Division of angles and of straight lines.
2. Construction of perpendiculars to straight lines.
3. Construction of an angle equal to a given angle.
4. Construction of parallels to a given straight line.
5. Simple cases of the construction from sufficient data of triangles and quadrilaterals.
6. Division of straight lines into a given number of equal parts.
7. Construction of a triangle equal to each of a given polygons.
8. Construction of tangents to a circle, and of common tangents to two circles.
9. Simple case of the construction of circles from sufficient data.

SECTION II.

PRACTICAL GEOMETRY.

10. Division of straight lines into any given proportions.
11. Construction of a fourth proportional to three given straight lines and a mean proportional to two given straight lines.
12. Construction of regular figures of 3, 4, 5, 6, 8, 10, 12, 15, 16, 18, 20, 24, 30, 36, 40, 48, 60, 72, 84, 96, 108, 120, 144, 168, 180, 216, 240, 270, 324, 360, 432, 480, 504, 540, 576, 648, 720, 756, 864, 960, 1008, 1152, 1296, 1440, 1584, 1728, 1944, 2160, 2304, 2592, 2880, 3024, 3456, 3888, 4320, 4608, 5184, 5760, 6480, 7200, 7920, 8640, 9600, 10800, 12960, 14400, 16200, 18000, 19440, 21600, 23040, 25920, 28800, 30240, 34560, 38880, 43200, 46080, 51840, 57600, 64800, 72000, 79200, 86400, 96000, 108000, 129600, 144000, 162000, 180000, 194400, 216000, 230400, 259200, 288000, 302400, 345600, 388800, 432000, 460800, 518400, 576000, 648000, 720000, 792000, 864000, 960000, 1080000, 1296000, 1440000, 1620000, 1800000, 1944000, 2160000, 2304000, 2592000, 2880000, 3024000, 3456000, 3888000, 4320000, 4608000, 5184000, 5760000, 6480000, 7200000, 7920000, 8640000, 9600000, 10800000, 12960000, 14400000, 16200000, 18000000, 19440000, 21600000, 23040000, 25920000, 28800000, 30240000, 34560000, 38880000, 43200000, 46080000, 51840000, 57600000, 64800000, 72000000, 79200000, 86400000, 96000000, 108000000, 129600000, 144000000, 162000000, 180000000, 194400000, 216000000, 230400000, 259200000, SECTION III.

ANGLES AT A POINT.

* 34. If a straight line stands on another straight line, the sum of the two angles so formed is equal to two right angles, and the converse.

* 35. If two straight lines intersect, the vertically opposite angles are equal.

PARALLEL STRAIGHT LINES.

* 36. When a straight line cuts two other straight lines, if

- (i) a pair of alternate angles are equal, or
- (ii) a pair of corresponding angles are equal,

or

(iii) a pair of interior angles on the same side of the cutting line are together equal to two right angles, then the two straight lines are parallel; and the converse.

* 37. Straight lines which are parallel to the same straight line are parallel to one another.

TRIANGLES AND RECTILINEAR FIGURES.

38. The sum of the angles of a triangle is equal to two right angles.

39. If the sides of a convex polygon are produced in order, the sum of the angles so formed is equal to four right angles.

* 40. If two triangles have two sides of the one equal to two sides of the other, each to each, and also the angles contained by those sides equal, the triangles are congruent.

* 41. If two triangles have two angles of the one equal to two angles of the other, each to each, and also one side of the one equal to the corresponding side of the other, the triangles are congruent.

* 42. If two sides of a triangle are equal, the angles opposite to those sides are equal; and the converse.

* 43. If two triangles have the three sides of the one equal to the three sides of the other, each to each, the triangles are congruent.

44. If two right-angled triangles have their hypotenuses equal, and one side of the one equal to one side of the other, the triangles are congruent.

45. If two sides of a triangle are unequal, the greater side has the greater angle opposite to it; and the converse.

46. Of all the straight lines that can be drawn to a given straight line from a given point outside it, the perpendicular is the shortest.

47. The opposite sides and angles of a parallelogram are equal, each diagonal bisects the parallelogram, and the diagonals bisect one another.

48. If there are three or more parallel straight lines, and the transversals made by them on any straight line that cuts them are equal, then the corresponding intercepts on any other straight line that cuts them are also equal.

AREAS.

49. Parallelograms on the same or equal bases and of the same altitude are equal in area.

50. Triangles on the same or equal bases and of the same altitude are equal in area.

51. Equal triangles on the same or equal bases are of the same altitude.

52. Heron's formula and expressions of the perimeter theorem corresponding to the following algebraical identities—

$$\begin{aligned} (a+b+c)(a+b-c)(a+c-b)(b+c-a) \\ = (a+b+c)(a+b-c)(a+c-b)(b+c-a) \\ = (a+b+c)(a+b-c)(a+c-b)(b+c-a) \end{aligned}$$

53. The square on a side of a triangle is greater than, equal to, or less than, the sum of the squares on the other two sides, according as the angle contained by those sides is obtuse, right, or acute. The difference in the cases of inequality is twice the rectangle contained by one of the two sides and the projection of it on the other.

LOCI.

54. The locus of a point which is equidistant from two fixed points is the perpendicular bisector of the straight line joining the two fixed points.

55. The locus of a point which is equidistant from two intersecting straight lines is the angle bisector of the pair of straight lines which bisect the angles between the two given lines.

THE CIRCLE.

56. A straight line, drawn from the centre of a circle to meet a chord, which is not a diameter, is at right angles to the chord; conversely, the perpendicular to a chord from the centre bisects the chord.

* 57. There is one circle, and one only, which passes through three given points not on a straight line.

* 58. In equal circles (or, in the same circle) (i) if two arcs subtend equal angles at the centres, they are equal; (ii) conversely, if two arcs are equal, they subtend equal angles at the centres.

* 59. In equal circles (or, in the same circle) (i) if two chords are equal, they cut off equal arcs; (ii) conversely, if two arcs are equal, the chords of the arcs are equal.

60. Equal chords of a circle are equidistant from the centre, and the converse.

SECTION IV.

THE CIRCLE.

61. The tangent at any point of a circle and the radius through the point are perpendicular to one another.

62. If two circles touch, the point of contact lies on the straight line through the centres.

63. The angle which an arc of a circle subtends at the centre is double that which it subtends at any point on the remaining part of the circumference.

64. Angles in the same segment of a circle are equal, and if the line joining two points subtends equal angles at two other points on the same side of it, the four points lie in a circle.

65. The angle in a semicircle is a right angle; the angle in a segment greater than a semicircle is less than a right angle, and the angle in a segment less than a semicircle is greater than a right angle.

66. The opposite angles of any quadrilateral inscribed in a circle are supplementary, and the converse.

67. If a straight line touch a circle, and from the point of contact a chord be drawn, the angles which the chord makes with the tangent are equal to the angles in the alternate segment.

68. If two chords of a circle intersect either inside or outside the circle, the rectangle contained by the parts of the one is equal to the rectangle contained by the parts of the other.

SECTION V.

PROPOSITION: SIMILAR TRIANGLES.

69. If a straight line is drawn parallel to one side of a triangle, the other two sides are divided proportionately; and the converse.

70. If two triangles are equiangular, their corresponding sides are proportional, and the converse.

71. If two triangles have one angle of the one equal to one angle of the other and the sides about these equal angles proportional, the triangles are similar.

72. The internal bisector of an angle of a triangle divides the opposite side internally in the ratio of the sides containing the angle, and likewise the external bisector externally.

73. The ratio of the areas of similar triangles is equal to the ratio of the squares on corresponding sides.

APPENDIX II.

PRINCIPAL CONSTRUCTIONS.

1. To be passed on to the candidates in the Regular Army a candidate must have good mental

and bodily health, and free from any physical defect likely to interfere with the efficient performance of military duty.

3. The condition of age, height and chest girth will not be less than that given in the following table.

PERSONAL REQUIREMENTS.

Age last birth-day.	Height without shoes.	Girth.	
		Girth when fully expanded.	Range of expansion not less than
16	5 ft and under 40	31½	4
	41	32½	5
	42	33½	5
	43	34½	5
17	5 ft and upwards	34½	5
	44 and under 45	35½	6
	46	36½	6
	47	37½	6
18	5 ft and upwards	37½	6
	48 and under 49	38½	7
	50	39½	7
	51	40½	7
19	5 ft and upwards	40½	7
	52 and under 53	41½	8
	54	42½	8
	55	43½	8
20	5 ft and upwards	43½	8
	56 and under 57	44½	9
	58	45½	9
	59	46½	9
21 and upwards	5 ft and upwards	46½	9
	60 and under 61	47½	10
	62	48½	10
	63	49½	10
22 and upwards	5 ft and upwards	49½	10
	64 and under 65	50½	11
	66	51½	11
	67	52½	11

4. The candidate's height will be measured as follows:—He will be placed against the standard with his feet together, and the weight thrown on the heels and not on the toes or outer sides of the feet. He will stand erect without rigidity, and with the arms, neck, shoulders and shoulders touching the standard; the chin will be depressed to bring the vertex of the head level under the horizontal bar, and the height will be measured in inches and parts of an inch to quarters.

5. The candidate's chest will be measured as follows:—He will be made to stand erect with his feet together, and to raise his arms over his head. The tape will be so adjusted round the chest that its upper edge touches the inferior angles of the shoulders behind, and its lower edge the upper part of the nipples in front. The arms will then be swung to hang loosely by the sides and arms will be taken then the shoulders are not drawn upwards or backwards as to depress the tape. The candidate will then be caused to take a deep inspiration several times, and the maximum expansion of the chest will be carefully noted.

The minimum and maximum will then be repeated three or four times, and the average taken.

In recording the measurements, fractions of less than half an inch should not be noted.

6. The candidate will also be weighed and his weight recorded in pounds. Fractions of a pound should not be noted.

7. The examination for determining the acuteness of vision includes two tests—one for distance, the other for near vision. The Army Test Types will be used for the test for distant vision, without glasses, at a distance of 20 feet, and for the test for near vision, without glasses, at any distance selected by the candidate. The standards of the examination

acuteness of vision with which a candidate will be measured is as follows:—

STANDARD I.

Right eye. Left eye.
Distant vision.—V = 4/5. V = 4/5.
Near vision.—Rounds 9, 8. Rounds 9, 8.

STANDARD II.

Right eye. Vision eye.
Distant vision.—V = 4/5. V, without glasses—not below 4/5; and after correction with glasses—not below 6/24.
Near vision.—Rounds 9, 8. Rounds 1.

STANDARD III.

Right eye. Vision eye.
Distant vision.—V, with glasses—V, without glasses—not below 6/24; and after correction with glasses—not below 6/12.
Near vision.—Rounds 9, 8. Rounds 1.

Each eye must have a full field of vision as tested by hand movements.

Squint or any marked condition of the eyes or of the lids of either eye liable to the risk of aggravation or retrograde will mean the rejection of the candidate.

Each eye will be examined separately, and the lids must be kept wide open during the test. Inability to distinguish the principal colours will not be regarded as a cause for rejection, but the fact will be noted in the proceedings and the candidate will be informed.

The degree of astigmatism of vision of all candidates for commission will be entered in the proceedings in the following manner:—

V.R. = ...; with glasses = ...; Rounds ...
V.L. = ...; with glasses = ...; Rounds ...

No reference of the standard of vision will be allowed.

7. The following additional points will then be observed:—

- That his hearing is good and there is no sign of ear disease.
- That his speech is without impediment.
- That his teeth are in good order. He must have his teeth in the upper jaw *functionally* equal to two good teeth in the lower jaw. Two of these teeth in each jaw must be sound. Well filled teeth will be considered as sound.
- That his chest is well formed and that his lungs and heart are sound.
- That he is not epileptic.
- That he does not suffer from a severe degree of neuritis at any vision test. A candidate who has been successfully operated on will be accepted.
- That his limbs are well formed and developed.
- That there is free and perfect motion of all the joints.
- That his feet and toes are well formed.
- That he does not suffer from any venereal skin disease.

* Better results are desired as follows:—

- When the eyes of men is so good that it is impossible to find the letters when the candidate closes his eyes.
- If observed is changed to such an extent that the acuity is less than 4/5, and extremely lower than normal, at some distance, the fact that the test is made is usually at a lower limit than the right.
- If there is simply a weak or imperfect test the affected eye is considered as less than half of the best of the good eye or the normal eye.
- That the test is made only by a candidate's testification when observed within the required standard at the external test.

(c) That he has no congenital malformation or defect.

(d) That he does not bear traces of previous acute or chronic disease pointing to an impaired constitution.

E. CONRAN SMITH,
Private Secretary to His Excellency the Governor,
Mauritius Government's Office,
10th January 1927.

PUBLIC DEPARTMENT.

LEAVE.

Port St. George, February 15, 1927.

No. 24.—Under rule 41 of the Fundamental Rules, Mr. G. W. Wells, I.C.S., leaves on average pay for eight months from 15th March 1927 or date of call and on half average pay for four months in continuation of the leave on average pay.

APPOINTMENTS.

Port St. George, February 14, 1927.

No. 57.—Mr. R. M. Gwyn, Bachelor of Arts, Faculty of Arts, U.C., to be Secretary to Government, Law and Education Department, in relief of M.B. Mr. J. M. Scholander V. T. Kishanadasa, Assistant Secretary, U.C., transferred to Foreign Service.

Port St. George, February 15, 1927.

No. 18.—Mr. R. M. Gwyn, I.C.S., Head-quarter Sub-Collector and Additional District Magistrate, Madras, to act as Collector and District Magistrate, South Kanara, in relief of Mr. G. W. Wells, I.C.S., proceeding on leave.

RESIGNATION AND APPOINTMENT.

Port St. George, February 17, 1927.

No. 14.—The following notification of the Government of India is reprinted:—

INCOME DEPARTMENT.

New Delhi, 16th February 1927.

No. P. 156/27 (Judicial).—The Governor-General in Council has accepted the resignation of the Hon'ble Mr. Justice G. Madhavaiah Nayar, Barrister-at-Law, of his office of Additional Judge of the High Court of Judicature at Madras, with effect from the 17th February 1927.

No. 81.—In pursuance of sub-rule (2) of section 185 of the Government of India Act, the Governor in Council is pleased to appoint the Hon'ble Mr. Justice G. Madhavaiah Nayar to officiate as a Judge of the High Court of Judicature at Madras in the vacancy caused by the death of the Hon'ble Justice Sir Christen Krishnaiah and His Majesty's pleasure is known.

NOTIFICATIONS.

Port St. George, February 19, 1927.

No. 81.—The following notification of the Government of the United Provinces is reprinted:—

POLICE DEPARTMENT.

MISCELLANEOUS.

The 24th January 1927.

No. 556/VIII.—In exercise of the power conferred by section 95-A of the Code of Criminal Procedure, 1908 (V of 1908), the Governor in Council hereby directs to be printed to His Majesty all copies, wherever found, of the Indian in Hindi or of its translation entitled "Akhil mata and papa of Akhil mata Akhil" (Now only one way remains and

your eyes are not open), and also all other copies of or extracts from the same book, wherever printed, inasmuch as the said book, in the opinion of the Local Government, contains seditious matter the publication of which is punishable under section 124-A, Indian Penal Code.

Port St. George, February 14, 1927.

(G.O. No. 115, Public)

No. 82.—The question has been raised how far G.O. No. 308, Public, dated 16th November 1926, applies to clerks in acting or temporary service who were employed before that date but who do not come up to the standard prescribed in the Government Order.

2. The Government direct that of men not in permanent service on the 16th November 1926 any three who satisfy the following conditions are eligible for promotion to Government service without the special orders of the Government in each case:—

(1) They must be "passed" men according to the rules as they stood before the issue of G.O. No. 308, Public, dated 16th November 1926, including any supplementary regulations prescribed there by the heads of departments.

(2) They must on 16th November 1926 have had to their credit not less than one year's continuous and satisfactory service under Government.

3. All other men concerned must be replaced as early as possible by men satisfying the new conditions.

Port St. George, February 15, 1927.

No. 63.—The following notification of the Government of India is reprinted:—

LEGISLATIVE DEPARTMENT.

New Delhi, 16th February 1927.

No. F. 3 XIX/26 A.C.—The Governor-General is pleased to accept the resignation by Mr. F. B. Evans, C.S., of his office of Member of the Legislative Assembly.

No. F. 3 XIX/26 A.C.—In pursuance of the provisions of sub-rule (2) of rule 18 of the Legislative Assembly Electoral Rules, the Governor-General is pleased to nominate Sir George Frederick Fickens, C.S., being an official, to be a Member of the said Legislative Assembly.

No. F. 3 XIX/26 A.C.—In pursuance of the provisions of sub-rule (2) of rule 18 of the Council of State Electoral Rules, the Governor-General is pleased to nominate Mr. Frederick Edmund Evans, C.S., being an official, to be a Member of the said Council of State.

LEAVE.

Port St. George, January 11, 1927.

No. 26.—Mr. A. R. O. Savelle, L.C., Assistant
to the Deputy Inspector-General of Police, Eastern
Bangal, Railway, and C.I.D., leave on average pay
for six months from or after 31st March 1927, under
Fundamental Rule 41.

No. 27.—M.R.B. P. T. Dhanwardi Avargal,
Deputy Superintendent of Police, Rajahmundry,
leave on average pay for four months from or after
the 31st April 1927.

EXTENSION OF LEAVE.

Port St. George, February 16, 1927.

No. 28.—M.R.B. Rao Sahib S. Ponnappa
Mudalayar Avargal, Deputy Superintendent of
Police, on extension of leave on average pay for
twenty-seven days from 2nd February 1927.

NOTIFICATION.

Port St. George, February 22, 1927.

No. 22.—The following notification of the Govern-
ment of India is republished:—

HOME DEPARTMENT.

King's Police Medal (France.)

New Bill, 1st January 1927.

No. 23-IV.—The Police.—His Majesty the
King, Emperor of India, has been pleased to

order the King's Police Medal, and in two cases a
bar to the medal previously awarded, as the follow-
ing officers and men of the Indian Police establish
their merits:—

Four of officers and six of men of the Indian Police
for whom the notification has been published.

RECORDS.

1. Frederick Rogers, Superintendent of Police, 2.
Kandiah Sub Inspector of Police, 3. Colonel
Nathan Savelle, Inspector of Police.—On the 16th
October 1923 a party of some 40 armed Thug
patrol in charge of Mr. Rogers, District Superin-
tendent, were in the village of Unnath, Bellary
district, for keeping the peace on the occasion of a
religious procession which had long been under
dispute. While passing through the village the party
was suddenly attacked from the houses and from
behind by a mob with showers of stones and other
minerals. Several were hurt and a considerable one was
killed. Several were dragged to safety by Mr. Rogers.
The mob attacked a great stone house, but
in spite of the Mr. Rajagopala Achariyar and Mr.
Savelle, who were at the time attempting to
induce the mob to disperse, and their ground not
contained paralyzing though exposed to a hail of
stones. They were between the mob and the armed
police and did not desert to their side in any order
to seek safety behind the armed police by
Mr. Rogers. The armed appeared likely to rush the
police and it was found necessary to open fire in
order to drive them back. Mr. Rogers then took his
men out of the village to turn back the procession
which was at a distance of about half a mile.
Meanwhile an informed crowd of about 2,000 men
from the village, and Mr. Rogers, who was in the
open, had to prevent them from rushing and
attacking the procession. By skilful handling of the
mob to work them, and though the crowd threat-
ened him at one quarter he sustained him from
being hit. The mob and the procession then hurried
charges to each other and at times attempted to
get to grips. Mr. Rogers frustrated them by himself
driving them into the field between them. During this
period the other two officers were again doing their
 utmost to induce the mob to disperse. Mr. Raja-
gopala Achariyar received two severe and wounds
in the course of his efforts and Mr. Savelle was
fortunate in escaping with a couple of minor wounds.
The latter also organized and led the
armed police outside the village. The Thug
patrols except the crowd and contributed greatly
to their survival and dispersal.

By his coolness, skilful handling of his men and
the untiring use of his arms Mr. Rogers prevented
a serious loss of life. Mr. Rajagopala Achariyar
and Mr. Savelle displayed great courage, resource
and devotion to duty throughout the proceedings.

4. For Sub Inspector Kandiah, Bangalore Appen-
tary, Temporary Deputy Superintendent of Police.—
On 14th July 1924 arrangements had to be made at
Puducherry in the Cuddalore district to put through
a Hindu procession which was objected to by the
Muslims as it was during the Muharram.
The procession was timed for 4-30 p.m. Parties of
police had been placed in parties by 1 p.m., and the
officer and a Magistrate were in charge. At 3 p.m.
a large crowd of Muslims gathered and in a highly
excited manner to such the police were in a state
in which the Hindu people was moved placing
them with stones. Rao Sub Inspector Kandiah and
other displayed conspicuous courage in withstanding
the mob and in inducing the police party of some
20 men, which showed signs of wavering, to stand the
ground. Though the procession was not held
it abstained from opening fire. Two Muslims and
three Christians suffered injuries from stones.

Three-quarters of an hour after the attack began the District Superintendent of Police and the District Magistrate arrived on the scene. Up to then the Rao Bahadur had been in sole charge of the Police, and he has attendance and held over the men he enabled them to withstand the first on slught of the mob. If the Police had given way, there would have been a disaster. The situation was still critical when the District Magistrate and the District Superintendent of Police arrived, and the mob was not dispersed for several hours.

The Rao Bahadur was awarded the King's Police Medal in 1915 for very distinguished services rendered during the trouble at Madras Town. On 2nd December 1922, and he is now awarded a Bar to the Medal.

S. Mammura Pithi, Assistant Pithi, Sub-Inspector of Police.—This Sub-Inspector was put on special duty to arrest a gang of five Kanavars who had been committing serious crimes in the Salem district and were residing there. He and his party arrested two of the gang. On this occasion a shot was fired at the police. Some weeks later the Sub-Inspector effected the arrest of another of the Kanavars after some resistance. Finally Kanava Kandan was located in a temple at the foot of some hills. On the approach of the police party he rushed out with a loaded gun intending to fire upon them. This Sub-Inspector promptly dashed at him and succeeded in overpowering him before he could shoot.

This action was awarded the King's Police Medal in 1915 for his courageous arrest of a gang of robbers. He is now awarded a Bar to the Medal.

A. T. G. CAMPBELL,
Chief Secretary.

FINANCE DEPARTMENT

NOTIFICATION.

For St. George, February 21, 1927.

No. 28.—The following telegram, dated the 15th February 1927, from the Controller of the Currency, Calcutta, to the Assistant-Comptroller, Madras, is published:

Date of exchange applicable to RGS, Rs., fixed during March 1927 eighteen paise per rupee. No exchange discrepancy allowance is admissible money paid during that month.

G. T. BHAG,
Secretary to Government.

ACQUISITION OF LAND.

For St. George, February 3, 1927.

Under section 5, Act I of 1924, the Government in Council hereby declares that the land mentioned below and measuring 10.28 acres, be the same is little or more land, is needed for a public purpose, to wit, for the extension of the Madras State Salt Factory, and undivided land 7 of the same Act, the Revenue Division Officer, Vengalpetam, is appointed to perform the functions of a Collector under the Act and directed to take notice for the acquisition of the said land. A plan of the land is kept in the office of the Revenue Division Officer, Vengalpetam, and may be inspected at any time during office hours. Under sub-section (4) of section II of the Act, the Government in Council further directs that the possession of the said land may be taken on the expiry of fifteen days from the date of the publication of the notice mentioned in section 5-1 of the Act.

1418, 1419, 1420, 1421, 1422, 1423, 1424, 1425, 1426, 1427, 1428, 1429, 1430, 1431, 1432, 1433, 1434, 1435, 1436, 1437, 1438, 1439, 1440, 1441, 1442, 1443, 1444, 1445, 1446, 1447, 1448, 1449, 1450, 1451, 1452, 1453, 1454, 1455, 1456, 1457, 1458, 1459, 1460, 1461, 1462, 1463, 1464, 1465, 1466, 1467, 1468, 1469, 1470, 1471, 1472, 1473, 1474, 1475, 1476, 1477, 1478, 1479, 1480, 1481, 1482, 1483, 1484, 1485, 1486, 1487, 1488, 1489, 1490, 1491, 1492, 1493, 1494, 1495, 1496, 1497, 1498, 1499, 1500, 1501, 1502, 1503, 1504, 1505, 1506, 1507, 1508, 1509, 1510, 1511, 1512, 1513, 1514, 1515, 1516, 1517, 1518, 1519, 1520, 1521, 1522, 1523, 1524, 1525, 1526, 1527, 1528, 1529, 1530, 1531, 1532, 1533, 1534, 1535, 1536, 1537, 1538, 1539, 1540, 1541, 1542, 1543, 1544, 1545, 1546, 1547, 1548, 1549, 1550, 1551, 1552, 1553, 1554, 1555, 1556, 1557, 1558, 1559, 1560, 1561, 1562, 1563, 1564, 1565, 1566, 1567, 1568, 1569, 1570, 1571, 1572, 1573, 1574, 1575, 1576, 1577, 1578, 1579, 1580, 1581, 1582, 1583, 1584, 1585, 1586, 1587, 1588, 1589, 1590, 1591, 1592, 1593, 1594, 1595, 1596, 1597, 1598, 1599, 1600, 1601, 1602, 1603, 1604, 1605, 1606, 1607, 1608, 1609, 1610, 1611, 1612, 1613, 1614, 1615, 1616, 1617, 1618, 1619, 1620, 1621, 1622, 1623, 1624, 1625, 1626, 1627, 1628, 1629, 1630, 1631, 1632, 1633, 1634, 1635, 1636, 1637, 1638, 1639, 1640, 1641, 1642, 1643, 1644, 1645, 1646, 1647, 1648, 1649, 1650, 1651, 1652, 1653, 1654, 1655, 1656, 1657, 1658, 1659, 1660, 1661, 1662, 1663, 1664, 1665, 1666, 1667, 1668, 1669, 1670, 1671, 1672, 1673, 1674, 1675, 1676, 1677, 1678, 1679, 1680, 1681, 1682, 1683, 1684, 1685, 1686, 1687, 1688, 1689, 1690, 1691, 1692, 1693, 1694, 1695, 1696, 1697, 1698, 1699, 1700, 1701, 1702, 1703, 1704, 1705, 1706, 1707, 1708, 1709, 1710, 1711, 1712, 1713, 1714, 1715, 1716, 1717, 1718, 1719, 1720, 1721, 1722, 1723, 1724, 1725, 1726, 1727, 1728, 1729, 1730, 1731, 1732, 1733, 1734, 1735, 1736, 1737, 1738, 1739, 1740, 1741, 1742, 1743, 1744, 1745, 1746, 1747, 1748, 1749, 1750, 1751, 1752, 1753, 1754, 1755, 1756, 1757, 1758, 1759, 1760, 1761, 1762, 1763, 1764, 1765, 1766, 1767, 1768, 1769, 1770, 1771, 1772, 1773, 1774, 1775, 1776, 1777, 1778, 1779, 1780, 1781, 1782, 1783, 1784, 1785, 1786, 1787, 1788, 1789, 1790, 1791, 1792, 1793, 1794, 1795, 1796, 1797, 1798, 1799, 1800, 1801, 1802, 1803, 1804, 1805, 1806, 1807, 1808, 1809, 1810, 1811, 1812, 1813, 1814, 1815, 1816, 1817, 1818, 1819, 1820, 1821, 1822, 1823, 1824, 1825, 1826, 1827, 1828, 1829, 1830, 1831, 1832, 1833, 1834, 1835, 1836, 1837, 1838, 1839, 1840, 1841, 1842, 1843, 1844, 1845, 1846, 1847, 1848, 1849, 1850, 1851, 1852, 1853, 1854, 1855, 1856, 1857, 1858, 1859, 1860, 1861, 1862, 1863, 1864, 1865, 1866, 1867, 1868, 1869, 1870, 1871, 1872, 1873, 1874, 1875, 1876, 1877, 1878, 1879, 1880, 1881, 1882, 1883, 1884, 1885, 1886, 1887, 1888, 1889, 1890, 1891, 1892, 1893, 1894, 1895, 1896, 1897, 1898, 1899, 1900, 1901, 1902, 1903, 1904, 1905, 1906, 1907, 1908, 1909, 1910, 1911, 1912, 1913, 1914, 1915, 1916, 1917, 1918, 1919, 1920, 1921, 1922, 1923, 1924, 1925, 1926, 1927, 1928, 1929, 1930, 1931, 1932, 1933, 1934, 1

No. 118.—Under section 12 of the Code of Criminal Procedure, 1898, M.H. 37, T. Pancharani Pind Awaraj, Nagpur District in the District of Nagpur, is appointed to be a Magistrate of the first class and under section 37 he is invested with all the powers specified in the fourth schedule as powers which the Government may confer on a Magistrate of that class except the powers to try cases summarily under section 208 and to hear appeals from the sessions of second and third-class Magistrates.

T. RAGHAVAN,
Secretary to Government.

NOTIFICATIONS.

Fort St. George, February 12, 1937
[G.O. No. 454, Law (General).]

No. 170.—In exercise of the powers conferred on Government by section 11 (3) (A) of the Indian Motor Vehicles Act, 1914, it is proposed to issue the following rules regulating the plying of motor vehicles within the limits of Kankhal.

2. Notice is hereby given that the draft rules will be taken into consideration on or after the 1st May 1937. Any objection or suggestion which may be received from any person with respect to the draft rules before the aforesaid date will be taken into consideration.

DRAFT RULES.

All motor vehicles plying from Kankhal to Kankhal shall pass only through Chokkela West street and all motor vehicles coming from Kankhal shall pass only through Chokkela Middle street of Kankhal town.

Fort St. George, February 12, 1937
[G.O. No. 454, Law (General).]

No. 151.—Under clause (1) of sub-section 1 of section 11 of the Motor Vehicles Act, 1914 (VIII of 1914), the Government in Council hereby directs that the driver's license held by Yasa-Sathya, a licensed motor-car driver in the East Indian district, be suspended for a period of one year.

Fort St. George, February 12, 1937.

No. 122.—In exercise of the powers conferred by section 11 of the Indian Motor Vehicles Act, 1914 (VIII of 1914), the Government in Council is pleased to issue the following amendments to the Madras Motor Vehicles Rules, 1914, published in the Law Department Notification No. 208 at page 327 of my in Part I of the Fort St. George Gazette, dated the 19th March 1933:—

AMENDMENTS.

For the existing rule 28 (b) and (c) substitute the following:—

(b) The drivers of a motor vehicle, when turning into a side street, if in the left, shall keep close to the corner, if in the right, shall make a wide turn. He shall further:—

(i) when about to turn to the right or about to pull out to the right side held out his right arm horizontally in the right of the vehicle;

(ii) when about to turn to the left extend the right arm and hand horizontally and they swing them forward and towards the left side with a circular swing on a level with the shoulder;

(iii) when about to stop, raise his right arm vertically outside his out palm to the front; and

(iv) when making a turn lawfully stand his hand.

When approaching cross roads, he shall stand his hand and extend such his arm the direction in which he intends to proceed.

28. (c) A motor vehicle entering a main road from a branch or side road shall take the main road

slowly giving precedence to vehicles approaching from the right hand side and taking precedence over vehicles approaching from the left hand side. While so giving the driver shall sound his horn.

No. 124.—In exercise of the powers conferred by section 11 of the Indian Motor Vehicles Act, 1914 (VIII of 1914), the Government in Council is pleased to issue the following amendments to the Madras Motor Vehicles Rules, 1914, published in the Law Department Notification No. 208 at page 327 of my in Part I of the Fort St. George Gazette, dated the 19th March 1933:—

AMENDMENTS.

1. After clause (d) of sub-rule (5) of rule 1 the following clause shall be inserted, namely:—

(e) "Street Road" means a road notified as such by the District Magistrate of the district in which it lies, by means of notice boards placed where such roads begin and end.

2. After clause (d) of rule 26 of the said rules the following clause shall be inserted, namely:—

(4) In a situation where a motor vehicle going down hill meets a motor vehicle going up hill, the former vehicle shall stop and allow the latter vehicle to pass it.

3. In condition 2 of the "G" Permit, for the words "shall arrange for its registration" the following words shall be substituted, namely:—

"shall get it cranked."

4. After condition (4) of the "G" Permit of the said rules the following condition shall be inserted, namely:—

4-A. In the case of a motor vehicle plying for hire on short runs, the owner shall get it cranked once in three months by a person approved by the District Magistrate. The provisions of condition (4) shall otherwise apply mutatis mutandis to such vehicles.

V. T. KRISHNAMA ACHARIYAR,
Secretary to Government.

Fort St. George, February 14, 1937
[G.O. No. 474, Law (General).]

No. 126.—The following name of an addressee who has been granted a certificate by the Madras Government in accordance with the rules made under section 104 (2) of the Indian Companies Act, 1913, is published for general information:—

Madigan.
Pezhambal.
Jaggayyapeta.

Kankhal.
Gandiyar.

T. RAGHAVAN,
Secretary to Government.

Act No. 40, February 19, 1927
(G.O. No. 510, Second).

No. 40.—The following draft Madras Land Revenue Settlement Bill is published for general information. Any objections or suggestions in respect of the said draft Bill should be made before the 1st of May 1927:—

MADRAS LAND REVENUE SETTLEMENT BILL.

WHEREAS it is expedient to provide for the assessment of areas that may hereafter be newly brought under ryotwari settlement and for the revision of assessment on areas now or hereafter settled on ryotwari tenure and whereas the previous sanction of the Government has been obtained to the passing of this Act; It is hereby enacted as follows:—

1. (1) This Act may be called the Madras Land Revenue Settlement Act, 1927;

(2) It extends to the whole of the Presidency of Madras except (a) the tract in which the Madras City Land Revenue Act, 1851, applies, (b) the Laccadive Islands including Minicoy and (c) the Ganjam, Vissapattanam and Odishan Agencies;

(3) It shall come into force at once.

2. In this Act unless there is anything repugnant to the subject or context

(1) 'Estate' means and includes an estate as defined in the Madras Proprietary Estates' Village Service Act, 1894, and a temporarily settled manikdar;

(2) 'Holding' means a parcel or parcels of land which does not form part of an estate and which is held by one individual or in joint ownership by more than one individual;

(3) 'Proprietor' means and includes any person who is entered in the village accounts or is recognized by the Settlement Officer as the registered holder of any land not forming part of an estate.

(4) 'Prescribed' means prescribed by this Act or by rules made under this Act.

(5) 'Settlement Officer' means any person appointed to be a Settlement Officer under section 6.

(6) 'Village' means any local area now recognized as a village or hereafter declared by Government to be a village.

3. All land not forming part of an estate is liable to the payment of land revenue to the Government except to the extent to which such land has been or

may be partially or wholly exempted from such liability by special grant of or contract with the Government or by the provisions of any law for the time being in force or by order of the Government and for so long as such exemption lasts.

4. Land revenue shall be assessed with reference to the use of the land

- (1) for agricultural purposes,
- (2) for non-agricultural purposes.

5. When land assessed with reference to its use for agricultural purposes is used for non-agricultural purposes, it shall forthwith become liable to a non-agricultural assessment:

Provided that the erection on land assessed with reference to its use for agricultural purposes of buildings required for the convenient or profitable use or occupation of such land for agricultural purposes shall not be deemed to be a user for a non-agricultural purpose.

6. (1) The Local Government may by notification appoint any person either by name or by virtue of his office to be a Settlement Officer for all or any of the purposes of this Act.

(2) Subject to the control of the Local Government, every person so appointed shall for such purposes exercise and perform the powers and duties of a Settlement Officer within such local limits and for such periods of time as the Local Government may direct.

(3) The Local Government may delegate its powers under sub-sections (1) and (2) to the Board of Revenue or to such officer or authority as it thinks fit.

CHAPTER II.

INITIAL SETTLEMENTS.

7. The Local Government may by notification direct the settlement of the rates at which land revenue shall be paid in any tract not already brought under ryotwari settlement which does not form part of an estate.

8. When the settlement of a tract has been directed under section 7, the Settlement Officer shall, subject to such rules as may be prescribed, prepare a register of holdings for each village in accordance with occupation and shall classify

(1) lands used for agricultural purposes as 'dry' or 'wet single crop' or 'wet double crop' with reference to agricultural and irrigated produce,

(ii) lands required for public or communal purposes as *paramakhs*, and

(iii) unoccupied lands, not so required, as *assured* or *unassured* according as they are fit or unfit for cultivation.

9. (1) The Settlement Officer shall publish in the manner prescribed a notification inviting all persons who have an interest in a holding to attend either in person or by a duly constituted agent before himself or any of his duly authorized subordinates, at a specified place and time, for the purpose of giving information in respect of such holding.

(2) A notification published in a village or other specified area under sub-section (1) shall be held to be a valid notice to every person having any interest in the holding situated in such village or such specified area.

10. (1) The Settlement Officer shall also publish a notification inviting representations on the subject of the fixing of the rates of assessment from all persons having interest in land in the tract.

(2) The Settlement Officer shall consider such representations as may be received by him in pursuance of the notification under section 10 (1) and shall frame a scheme for the settlement of the tract.

11 Subject to such rules as may be prescribed by the Local Government in this behalf, the Settlement Officer shall in preparing his scheme for the assessment of lands used for agricultural purposes be guided by the following instructions:—

(1) He shall classify the soils in the tract according to their mechanical composition and such other natural factors as affect their fertility.

(2) He shall determine the product or products to be taken as the standard for each district or tract under consideration.

(3) He shall estimate the quantity of each standard product or products that each description of soil may yield.

(4) He shall prepare a table grouping together soils having the same productive value.

(5) He shall estimate the deduction to be made from the gross produce on account of the vicinities of season and of susceptible areas within holdings.

(6) He shall determine commutation prices by calculating the average price of each standard product in the years' selling months during a period of twenty years immediately preceding the settlement excluding years which the Local

Government may notify to be or to have been famine years in respect of the tract under settlement.

(7) He shall estimate the percentage deduction from the commutation prices to be made for cartages and merchants' profits.

(8) He shall then deduct from the gross produce of the several descriptions of soil the allowances made under clause (5) and convert the remainder into money at the commutation rate as reduced by the allowances for cartage and merchants' profits under clause (7).

(9) He shall deduct from the money value arrived at under clause (8) the estimated cost of cultivation.

(10) He shall group the villages in the tract according to (a) their proximity to markets and (b) the facilities of transport.

(11) He shall classify irrigation sources according to their efficiency.

(12) The Settlement Officer shall draw up a table exhibiting the money value of the net produce for each tenure and propose rates of assessment per acre thereon so that the Government demand shall not exceed half the money value of the net produce.

(13) In fixing the assessment on land allowances shall be made for the additional value which may have been imparted to it by improvements effected at the cost of the possessor.

Provided that the preparation of land for growing wet crops with the aid of Government water shall not be considered as improvement for the purpose of this section.

(14) (i) Dry lands in the second or a lower group of villages shall be placed in the tenure next below those occupied by land of the same soil classification in the next higher group.

(ii) Wet lands under an irrigation source in the second or a lower class shall be placed in the tenure next below those occupied by land of the same soil classification in the next higher class of irrigation.

(15) Finally statements shall be prepared showing the financial results of the assessment proposed as compared with the revenue, if any, previously derived from the tract.

12. The Settlement Officer shall also collect information and report on the following matters:—

(1) the value of the land as shown by houses and *moo-deeds*; and

(2) the general economic condition of the tract.

13. The Settlement Officer shall have his scheme for the measurement of lands used for non-agricultural purposes on an estimate of the non-agricultural rentals in such manner as may be prescribed.

14. When the Settlement Officer has prepared a scheme as provided above he shall submit it to the Local Government through the Collector of the district and the Board of Revenue and shall publish the scheme in such manner as may be prescribed.

15. The Local Government shall also lay the scheme on the table of the Legislative Council for a period of two months.

16. (1) The Local Government after considering the remarks of the Collector and the Board of Revenue and the recommendations of the Legislative Council and such other public opinions as may be made on the scheme framed by the Settlement Officer, shall pass such orders on the scheme as they may think fit.

(2) The term of a settlement shall ordinarily be thirty years but a shorter or longer term may be enacted provided that no term exceeding 55 years shall be enacted without the previous sanction of the Governor-General in Council.

17. When the Local Government has issued orders under section 16 (1) the Settlement Officer shall publish in the manner prescribed a notification embodying the main principles of the settlement and shall then proceed to introduce the settlement in accordance with the procedure specified hereinafter.

18. (1) A notice showing for each field or subdivision of a field such particulars as may be prescribed shall be issued to the pottadar concerned. The notice shall also indicate the time and place at which objections to an entry therein or omission therefrom shall be heard.

(2) The Settlement Officer shall return into such objections and at any stage of the inquiry may, after directing such subdivision or survey as he may deem necessary, pass orders in such objections.

(3) The orders passed by the Settlement Officer on any objections preferred under this section shall be in writing and shall contain the reasons for such order.

(4) The purport of the order shall be communicated forthwith to the pottadar if he is present and a copy thereof shall be furnished to him on his application and at his cost.

19. The Settlement Officer shall then prepare a final settlement register showing the names of the pottadars and the area and assessment of each survey field or subdivision in such form and with such other particulars as may be prescribed.

The entries or changes made under the provisions of sections 3, 18, 21 and 22 shall be incorporated in the settlement register.

20. Subject to such rules as may be prescribed a Settlement Officer may, on application made to him or of his own motion, correct any mistake or inaccuracy in any settlement register prepared under section 19 but not so as to affect any orders passed by a superior authority under section 21 or 22 provided always that where such correction affects the right of a pottadar, it shall not be made until after reasonable opportunity has been given to him to appear personally or by duly authorized agent and be heard in the matter.

21. (1) An appeal shall lie from the orders of the Settlement Officer under section 18 or 20 to the officer prescribed whose decision shall be final subject to the provisions of this section and of section 24.

(2) An appeal under sub-section (1) shall be liable to be rejected unless filed within two months from the date of the communication of the order of the Settlement Officer under section 18 or 20.

Provided that the prescribed officer may admit an appeal after the expiry of the said period on being satisfied that the applicant had good and sufficient cause for not preferring the appeal within such period.

(3) The Board of Revenue may on the application made to it in this behalf or of its own motion, direct the revision of any entry in the settlement register prepared under section 19. Such revision shall not be made so as to affect the rights of any pottadar unless and until he has been given a reasonable opportunity to appear personally or by duly constituted agent and to put forward his contentions, if any, before the Board.

22. The Local Government or the Board of Revenue may revise an order passed by any subordinate authority in connexion with the settlement of any land.

23. (1) Where any area which is less than a whole village and does not form part of an estate is newly brought under

ryotwari tenure the assessment of the rates payable shall be made (subject to the control of the Board of Revenue) by the Collector by applying the rates of assessment in force for lands of similar quality under ryotwari settlement in the neighbourhood.

(2) These rates will be in force for the remainder of the period for which the settlement of the district is current and will be subject to revision at the end of that period in the manner provided for in Chapter III of the Act.

CHAPTER III.

RENTALMENT.

24. Subject to the terms of settlements made before or after the passing of this Act, the Local Government may by notification direct the revision of assessments on lands not forming part of an estate except where by special grant or contract with the Government or by the provisions of any law for the time being in force or by orders of the Government the assessments are exempt from revision or are regulated by the express terms of such grant, contract, provisions or orders.

25. When the Local Government have directed the revision of assessments in any area under section 24, the Settlement Officer shall publish a notification inviting representations from all persons having interest in land in that area on the subject of the rentalment.

26. The Settlement Officer shall consider such representations as may be received by him in pursuance of the notification under section 25 and shall frame a scheme for the rentalment of the tract.

27. In preparing a scheme for the revision of assessment on lands used for agricultural purposes under section 24, the Settlement Officer shall not ordinarily frame a new scheme of settlement but shall propose percentage variations of the immediately previous rates.

Such variations shall, subject to such rules as may be prescribed, be based on a due consideration of—

(a) Increase or decrease in the recorded prices of the standard products of the tract.

Explanation.—The average of the prices of the standard product in the ryots' selling months recorded under the authority of the Local Government during twenty years immediately preceding the commencement of rentalment

operations shall be compared with the examination prices of the same products during the twenty years preceding the settlement under revision. In such case the prices recorded for the years which the Local Government may certify to be or to have been famine years in respect of the tract under rentalment shall be excluded and appropriate deductions shall be made for cartage and merchants' profits.

(b) Increase or decrease in the ordinary expenses of cultivation.

28. The Settlement Officer shall also collect information and report on the following matters:—

(a) Sale and lease values of land at the beginning and end of the period of the settlement under revision,

(b) Increase or decrease of population,

(c) Expansion or contraction of the area under occupation,

(d) Increase or decrease in area under the more valuable crops,

(e) The economic position of holders of agricultural lands in the tract during the settlement under revision, and

(f) The extent to which it has been necessary to resort to coercive measures in the collection of land revenue and the general character of recent seasons.

29. (i) If the Settlement Officer finds that any general revision of the classification of soils or of the grouping of villages or of the classification of irrigation sources is necessary, he shall, before preparing his scheme, report the matter for the orders of the Local Government with information as to—

(a) any improvement or deterioration in the facilities of transport during the settlement under revision so far as this affects the grouping of villages,

(b) any improvement or deterioration in the efficiency of the irrigation sources in so far as this affects their classification,

(c) other grounds on which revision is considered necessary.

(ii) The Local Government shall pass orders on this report and the Settlement Officer shall then prepare his scheme accordingly. Where a reclassification or regrouping is ordered, the scheme shall state so far as may be practicable the effect thereof on the proposed assessment report from the effect of any changes consequent on a general rise or fall of prices.

30. The Settlement Officer shall base his scheme for the revision of the assessment on lands used for non-agricultural purposes on an estimate of the difference between the non-agricultural rentals at the beginning and at the end of the term of the settlement under revision in such manner as may be prescribed.

31. When the Settlement Officer has prepared a scheme of resettlement in accordance with the foregoing provision he shall submit it to the Local Government through the Collector of the district, and the Board of Revenue and shall publish the scheme in such manner as may be prescribed.

32. The Local Government shall lay the scheme on the table of the Legislative Council for a period of two months.

33. (3) The Local Government after considering the remarks of the Collector, and the Board of Revenue and the recommendations of the Legislative Council and such other public opinions as may be made on the scheme framed by the Settlement Officer shall pass such orders on the scheme as they may think fit.

(2) In the case of agricultural lands where the proposals for the revision of assessment include a percentage enhancement of or decrease in the immediately previous rates on the ground of a rise or fall in prices, the enhancement or decrease on this account shall not exceed 15 per cent.

(3) The term of a resettlement shall ordinarily be thirty years but a shorter or longer term may be enacted provided that no term exceeding 30 years shall be enacted without the previous sanction of the Governor-General in Council.

34. The resettlement of any tract directed under section 33 (1) shall take effect from the year following that in which the previous settlement of the tract expires or from such later year as the Local Government may direct.

35. When the Local Government has issued orders under section 53 above the Settlement Officer shall publish in the manner prescribed a notification embodying the main principles of resettlement so finally decided and shall then proceed to introduce the resettlement in accordance with the procedure specified hereinafter.

36. (1) The Settlement Officer shall have power to revise soil classification in the case of particular fields and the classification of particular irrigation sources for reasons to be recorded by him.

(2) Notwithstanding anything contained in section 55, the Settlement Officer, subject to such rules as are prescribed, shall have power at any time during the course of resettlement operations to effect changes—

(a) in the registration of holdings and

(b) in the registration of lands as dry, wet double crop, wet single crop, panna-baka, assessed and unassessed and to carry out such other changes as the Government may direct.

Nothing in this section shall affect the powers of the Collector subject to the orders of the Board of Revenue to make changes in the registration of holdings or of land during the currency of settlement not inconsistent with its terms.

37. (1) A notice showing for each field or subdivision of a field such particulars as may be prescribed shall be issued to the pottadar concerned. The notice shall also indicate the time and place at which objections to an entry therein or omission therefrom shall be heard.

Provided that in any area in which the resettlement takes the form of a percentage enhancement of the previous rates of assessment without a general revision of soil classification or village grouping or of classification of irrigation sources, the Local Government may authorize the issue of notices under sub-clause (1) prior to the issue of orders under clause 33.

Provided further that it shall not be open to any individual pottadar to prefer any objection to rates of assessment revised solely with reference to a rise or fall of prices.

(2) The Settlement Officer shall inquire into the objections made under sub-clause (1) and at any stage of the inquiry may, after directing such subdivision or survey as he may deem necessary, pass orders on such objections.

(3) The orders passed by the Settlement Officer on any objection preferred under this section shall be in writing and shall contain the reasons for the order passed.

(4) The purport of the order shall be communicated forthwith to the pottadar if he is present and a copy thereof shall be forwarded to him on his application and at his cost.

38. (1) The Settlement Officer shall then prepare a settlement register showing the names of the pottadars and the area and assessment under each

survey field or subdivision in such form and with such other particulars as may be prescribed.

(2) Subject to such rules as may be prescribed a Settlement Officer may, on application made to him or of his own motion, correct any mistake or inaccuracy in any settlement register prepared under section 38 but not so as to affect any orders passed by any superior authority under sections 40 and 41 provided always that where such correction affects the right of a proprietor, it shall not be made until after reasonable opportunity has been given to him to appear personally or by duly authorized agent and be heard on this matter.

(3) The changes made under sections 39 and 41 shall be incorporated in the settlement register prepared under this section.

39. (1) An appeal shall lie from the orders of the Settlement Officer under sections 36, 37 and 38 to the prescribed officer whose decision shall be final subject to the provisions of this section and of section 41.

(2) An appeal under sub-section (1) shall be liable to be rejected unless filed within two months from the date of the communication of the order of the Settlement Officer under section 37 or 38.

Provided that the prescribed officer may admit an appeal after the expiry of the said period on being satisfied that the applicant had good and sufficient cause for not preferring the appeal within such period.

(3) The Board of Revenue may, on application made to it in this behalf or of its own motion, direct the revision of any entry in the settlement register prepared under section 38. Such revision shall not be made so as to affect the rights of any proprietor unless and until he has been given a reasonable opportunity to appear personally or by duly constituted agent and to put forward his contentions, if any, before the Board.

40. Where as the result of a resettlement the assessment on any individual holding exceeds the amount previously paid in respect of such holding by more than 25 per cent, such excess shall, subject to such rules as may be framed by the Local Government, be spread over a series of years so that the increase in the initial year be not more than 25 per cent and the increase in any subsequent year be not more than 12½ per cent of the sum previously paid.

41. The Local Government or the Board of Revenue may revise an order passed by any subordinate authority in connection with the settlement of any land.

CHAPTER IV.

42. The Settlement Officer shall have power at any stage of the proceedings to carry out under the provisions of the Modern Survey and Boundaries Act, VIII of 1923, such survey or resurvey as may be found necessary for the purposes of this Act.

43. (a) For the purpose of any settlement, resettlement, inquiry, or other proceeding under this Act, the Settlement Officer or any of his subordinates shall have power to enter upon, inspect or demarcate any land.

(2) The prescribed officer to whom an objection or an appeal is preferred under sections 38, 41, 37 and 39 of this Act may, for the purpose of any inquiry, survey or other proceedings under this Act, summon and enforce the attendance of any person for giving evidence or for the production of documents or for the purpose of rendering assistance in the survey of any land in which such person has an interest and the provisions contained in the Code of Civil Procedure in regard to the summoning and enforcing the attendance of witnesses shall apply so far as they may be made applicable.

44. The correctness of any entry in a settlement register prepared under sections 38 and 39, or corrected under sections 21 and 22 and 39 and 41 shall not be questioned in any court of law provided that any person may institute a suit under Chapter VI of the Specific Relief Act, 1877, for the declaration of his right to be entered as proprietor in respect of any land; provided also that in any such suit or in any appeal therefrom in which an order or decree is passed *ex parte* against the Secretary of State for India in Council, the said Secretary of State for India in Council shall not be liable in costs.

45. (1) The Local Government may, from time to time after previous publication in the *Port of George Gazette*, make rules for the purpose of generally carrying out the objects of this Act.

(2) In particular and without prejudice to the generality of the foregoing powers, such rules may provide—

(a) for the collection and record of any information in respect of any land which has been or is about to be settled or resettled;

(b) for prescribing and limiting the powers and duties of officers conducting proceedings under this Act and for regulating their procedure;

(c) for the publication of all notifications and schemes issued or prepared under this Act and for the issue and service of all orders, communications and notices to be issued, recommended, given or served under this Act;

(d) for the preparation and issue of notices in tracts under settlement or resettlement and for the hearing of objections thereto;

(e) for the grant of increment remissions under section 40;

(f) for the ascertainment of any of the factors specified in section 11, including the appointment of a Committee or Committees to assist the Settlement Officer in such ascertainment;

(g) for the ascertainment of non-agricultural estimated rentals under sections 13 and 30;

(h) for the preparation of a settlement register under sections 50 and 51.

(5) A draft of such rules shall be laid on the table of the Legislative Council for a period of not less than two months while the Council is in session. The rules as finally approved by the Local Government shall be published in the Port St. George Gazette, and on each publication shall have the same effect as if enacted and contained in this Act.

46. No suit or other legal proceedings shall lie against any officer of Government for anything in good faith done or purporting to be done under this Act.

47. No settlement or resettlement completed and no proceedings or act of any Settlement Officer taken or done before the passing of this Act in the progress of any settlement or resettlement shall be called in question on the ground that such proceedings or act has not been taken or done in accordance with the provisions of this Act.

STATEMENT OF OBJECTS AND REASONS.

In this Preliminary the settlement and the revision of the assessment on ryotwari lands are regulated by executive rules.

In their report on the Government of India Bill the Joint Select Committee recommended legislation embodying the main principles on which the assessment of these lands is based. Since the introduction of the reforms, the demand for such legislation has become more and more insistent.

A draft Bill was prepared by the Board of Revenue in 1921 and was examined by a mixed committee of officials and non-officials. In 1924, this Bill was introduced into the Legislative Council with a clause, then for the first time inserted, restricting the percentage enhancement of any revision on the sole ground of rise in prices to 15 per cent. The Bill was rejected by the Council at the first reading.

2. The present Bill is in respect of its scope somewhat different from its predecessor. Chapter II sets out in statutory form the procedure which has been applied in the Presidency to the original settlement of ryotwari land revenue. For areas less than a whole village this procedure would be both cumbersome and inappropriate and it is accordingly proposed to continue the existing procedure under which isolated areas previously bought under assessment are dealt with on the lines of the settlement current in the district.

4. This chapter includes also proposals for the assessment of lands used for non-agricultural purposes with reference to their rent. This matter is dealt with in clause 13 and provision for revision of assessments as fixed is made in Chapter III.

6. In this province house-sites in towns are granted subject to payment of ground-rent which is fixed in accordance with the principles laid down in Board's Standing Order No. 21. In villages, house-sites are by long usage granted to and held by the villagers free of assessment, but in the case of assignments made since 1800 the Government have by a provision in the public reserved the right to charge ground-rent, should the village ever be declared a town.

8. Whatever justification may exist for continuing the old usage of free plots in respect of ancient house-sites in villages, there is no valid ground for extending this immunity to other lands. Government have accordingly directed the levy of assessment in recent cases in which they found it necessary to make systematic reassessments for the extension of house-sites in assigned villages. The Bill accordingly reserves power to Government to levy non-agricultural assessments at rates laid assessed, with respect to the usage for agricultural purposes is used for non-agricultural purposes. Similar provisions exist in the Bombay Land Revenue Code and the Central Provinces Land Revenue Act, 1917.

7. Chapter III deals with the revision of existing settlements and sets out in statutory form the existing procedure with the following main modifications—

With reference to the price or exchange, dated 17th May 1924, issued on this subject, a provision restricting to 15 per cent. the variation of assessment made at settlements on the sole ground of a rise or fall in prices has been incorporated in this Bill.

9. Sections 15 and 24 provide for the laying of settlement or resettlement schemes on the table of the Legislative Council for a period of two months before Government pass orders on them.

Convey, notice to that effect is hereby given to all whom it may concern in accordance with the provisions of section 4 (1) of Act I of 1894, as amended by the Land Acquisition Amendment Act XXXVIII of 1923, and the Governor in Council hereby authorizes the Revenue Divisional Officer, Mayarvaran, and his staff and the Executive Engineer, Cavery division, Tanjore, and his subordinates to cause the persons referred by section 4 (2) of the Act and under section 5 appoint the Revenue Divisional Officer, Mayarvaran, to perform the functions of a Collector under section 5-A of the Act. All persons interested in the lands are required to lodge before the Revenue Divisional Office, Mayarvaran, within thirty days from the date of publication of this notification, a statement in writing of their objections, if any, to the proposed acquisition.

Port Et. George, February 11, 1927.

Whereas it appears to Government that the unimproved lands are needed for a public purpose, to wit, for the provision of Pattanam Island Project, widening Main Canal in Telukavipatti and Ainarvi villages, notice to that effect is hereby given to all whom it may concern in accordance with the provisions of section 4 (1) of the Land Acquisition Act I of 1894, as amended by Act XXXVIII of 1923, and the Governor in Council hereby authorizes the Revenue Divisional Officer, Rajahmundry, his staff and workmen to cause the persons mentioned by section 4 (2) of the Act. All persons interested in the lands are required to lodge before the above-mentioned officer, within thirty days after the issue of this notification, a statement in writing of their objections, if any, to the proposed acquisition. Under sections 2 (4) and 5-A of the same Act, the Governor in Council appoints the Revenue Divisional Officer, Rajahmundry, to perform the functions of a Collector under the Act.

ERRATUM.

In notification No. 91 of Part I-A of the Fort St. George Gazette, dated 16th January 1927, relating to the acquisition of lands for a surveying line behind Annamalai street in Salem municipality, for 'Mada Varma' the owner of T.R. No. 1447-B, read 'Mada Narsimha'.

A-1

NOTIFICATIONS.

No. 216.—Under clauses (c) and (d) of sub-section (1) of section 40 of the Madras Town Planning Act, 1920, the Government make the following appointments on the Madras City and Suburban Town Planning Board by virtue of office with effect from the 15th October 1926:—

- (1) The Collector of Madras to be Chairman and Treasurer.
- (2) The Collector of Chingleput to be a Trustee.
- (3) The Commissioner of the Corporation of Madras to be a Trustee.
- (4) The Director of Public Health to be a Trustee.

C. B. CUTTERELL,
Secretary to Government.

No. 222.—Under section 21 of the Madras Town Planning Act, 1920, the Government appoint the Revenue Divisional Officer, Ponnampet, to be the Arbitrator in regard to the adjacent lands below mentioned by the Government in G.O. No. 2157, P.H., dated 7th November 1926, and G.O. No. 2123, P.H., dated 19th November 1926:—

- (1) The Venkateswari Garden Town Planning scheme, Palurda.
- (2) The Palurda Garden Town Planning scheme, Palurda.

H. B. CHILLI,
Deputy Secretary to Government.

No. 223.—Under rule 114 of the rules for the election of members of District boards by which boards published with the notification of the Local Government in the Local Self-Government Department

sample all the premises of the Madras Hindu Religious Endowments Act, 1926 (Act II of 1926), except sections 68 (1) and (2) relating to the levy of contributions towards the expenses of the Board and the Committee, before making a notification under the proviso to section 4 of the Act as recommended by the Board, the Government desire to know whether any licensee of the temple or any worshipper has any objection to urge against such application. If no such objection is received by the Government within a month from the date of the publication of this notification in the District Gazette, the Government will proceed to issue a notification under the proviso to section 4 of the Act applying all the provisions of the Act except sections 68 (1) and (2) to the said temple.

C. R. COTTERELL,
Secretary to Government

Fort St. George, February 15, 1927
(S.O. No. 205 L & M.)

No. 227.—Under section 28 (3) of the Madras Hindu Religious Endowments Act, 1926 (Madras Act II of 1926), the Local Government hereby notify that the vote for which each of the following temple committees has been constituted shall form the electoral area for the election of members to the Committee concerned:—

Name of the Committee.	Area for which constituted.

S. No. 212-3, bounded on the north by Sivaganga Zamindari taluq; and by S. No. 212-2, south by Sivaganga Zamindari taluq; and by S. No. 212-2, and by S. No. 212.	9
Total ..	31.97

T. E. RAMACHANDRA MUDALIYAR,
Assistant Secretary to Government.

NOTIFICATIONS BY COLLECTOR AND LOCAL AUTHORITIES

Under section 81 (2) of the District Municipalities Act V of 1920, it is hereby notified that the undivided land measuring 4,340 square feet, in the

name of a little area or less, in the Chittoor taluk, patta within the boundaries given below, will be excluded from the control of the Chittoor Municipal Council from and after the date of this notification:—

CHITTOOR.

S. No. 403, bounded on the north by Thangapalli taluk, and on the south by road to Thangapalli, and by road to Thangapalli.

H. L. BRAHMEDEV,
Collector.

Chittoor Collector's Office,
12th February 1927.

Under sections 4 (2) (b) of the Madras Local Boards Act, 1926, and with the approval of the Inspector of Local Boards and Municipal Councils, the District Board, Bellary, hereby notifies that the Union Board constituted for the revenue village of Hishanahalli under Notification No. 77, published at page 95, Part I-A of the Fort St. George Gazette, dated 22nd January 1926 will be dissolved with effect from the 1st April 1927 and the area comprising the said village will hereafter be constituted from the operation of the said Local Boards Act of 1926.

M. GOVILASWAMI MUDALIYAR,
President.

Bellary District Board Office,
7th February 1927.

Under rule IV (1) of the rules for the election of presidents and vice-presidents of local boards, M.H.R. D. S. Pudukottai District Board is declared duly elected as Vice-President of the Pudukottai Taluk Board.

A. JAGANNADHAM,
President.

Pudukottai Taluk Board Office,
26th February 1927.

Under section 28 (1) of the Madras Hindu Religious Endowments Act, 1926 (Madras Act II of 1926) and under rule III (4) of the rules for the election of presidents and vice-presidents of temple committees, M.H.R. P. M. Sreenivasulu Chettiar Annapal and M.H.R. Mammadul Pilla Dhanraj Pillai Annapal have been declared to have been duly elected as President and Vice-President, respectively, of the Madras Sri Mahalinga, Sankaravaram, Venkateswara Committee in the Madras District.

P. M. SHANMUKAM CHETTI,
Presiding Member.

Madras, 16th February 1927.

Mr. Solomon Michael Cheliah being the only widely nominated candidate for Ward II of the Kottakudi municipality, he is hereby declared duly elected as a Councillor for that ward. His term of office will expire on 31st October 1927.

C. P. SREEMIDI,
Chairman.

Kottakudi Municipality Office,
12th February 1927.

NOTIFICATIONS

Fort St. George, February 15, 1921

[G.O. No. 215, Law and Education].

No. 11.—In the rules relating to the provision fund for teachers in non-permanent service, published on pages 204-251 of Part I-B of the Fort St. George Gazette, dated 18th November 1919, as subsequently amended, the following amendments shall be made:—

(1) In rule 5 (i) for the words "shall be taken to the treasury in the hands of Government" according to the last sentence but three, substitute the following:—

"Amount paid back to the management or management concerned."

(2) In the same rule for the words "to be advanced to Government" according to the end of the penultimate sentence, substitute the words "to be paid back to the management or management concerned".

(3) In rule 10 (d) for the words "the balance shall be credited to Government" according to the last sub-paragraph, substitute the following:—

"The balance shall be paid back to the management or management concerned."

(4) In Appendix D to the rules for the present heading of savings 15, substitute the following:—

"Amount paid back to the management or management concerned."

T. RAGHAVAN,
Secretary to Government.

Fort St. George, January 25, 1921

[G.O. No. 114, Law (Education)].

No. 25.—In exercise of the powers conferred on them by sections 35 and 36 of the Madras Elementary Education Act, 1920, the Government (Ministry of Education and Local Self-Government) are pleased to substitute the subjoined form for the form of the budget estimate of Elementary Education. Form prescribed in Notification No. 251, dated 19th October 1920, published on pages 750-51 of Part I-B of the Fort St. George Gazette, dated 17th October 1920.

K. R. RAOHAYAN,
Off. Superintendent

Govt. Museum, Trivandrum, Malabar,
12th February 1937.

GOVERNMENT SCHOOL OF ENGINEERING,
TIRUPATAPATI.

Applications accepted from candidates residing in, or belonging to, the Tirupat District, that is to say, in the Districts of Rayachoti, Vengalpet, Bellary, Kanna, Bellary, Nellore, Chittoor, Chittoor, Kanna, Bellary and Rayachoti, for admission into the Probationary Subordinate class of this school for the year 1937-38. There will be no admission for the above class in the College of Engineering, Guindy.

2. Students who are admitted into the above class will undergo a course of two years, and if they qualify, at the end of the course, will pass on to complete the Lower Subordinate course of training in the third year. At the end of the second year of the course, a certain number of the passed students will be selected in the order of merit in the Upper Subordinate class of the College of Engineering, Guindy.

3. Candidates for admission must be either holders of completed Secondary School Leaving Certificate or holders of a preliminary training, or must have passed the Metropolitan Examination of the Madras University or an examination accepted by the Director of Public Instruction as equivalent thereto, and must be under twenty years of age on 30th June 1937. But this age limit shall be extended by two years in the case of Madras, Orissa and United Provinces candidates.

4. Forty candidates will be admitted. The fee for registration for admission is Rs. 5 which will, under no circumstances, be refunded.

5. Applications in the prescribed form will be received by the Superintendent, School of Engineering, Tirupat, up to the 20th Jan 1937. Every application must be accompanied by—

(a) a receipt showing that the registration fee has been paid into a Government treasury;

(b) copies of testimonials of good character covering the last two years (one of the testimonials must be from the head of the college or school the candidate last attended);

(c) copy of satisfactory certificate of age, if the applicant is not a holder of a Secondary School Leaving Certificate;

(d) Secondary School Leaving Certificate, if original, if the applicant is a holder thereof.

6. Any candidate who wishes to secure himself of the receipt of application in this school must enclose an addressed postcard with his application.

7. The names of the selected candidates will be published in the *Port St. George Gazette*, approximately by post.

8. The selected candidates will join the school on 4th July 1937 and must make deposit on that date with the Superintendent—

(a) a sum of Rs. 100 which will be in the candidate's pocket and shown against his introduction, books and stationery that will be supplied through the agency of the school;

(b) a sum of Rs. 40 (payable in advance as tuition fee for the whole course, or Rs. 5 per session payable in four monthly instalments);

(c) a contribution of Rs. 4, recreation and athletic fee for the whole course;

(d) a health certificate (in the prescribed form supplied by the school) from a Government Medical Officer to the effect that the candidate is fit for the outdoor work of the Public Works Department and that he has had measles or has been vaccinated;

(e) University certificate, if a Matriculate;

(f) original testimonials of character of which copies were furnished with his application;

(g) original certificate of age or an attested copy, if the applicant is not a holder of a Secondary School Leaving Certificate; and

(h) a leaving certificate from his last college or school.

SCHOLARSHIPS.

9. There are scholarships granted by Government, local, boards and private bodies. Candidates who send their applications for admission should, if they so desire, apply for the scholarships, and if they are poor, state exactly the financial position of their parents or guardians.

HOSTEL.

10. There is a hostel attached to the school for all students whose residence is compulsory for all students except under special circumstances.

Form of application for admission to the Probationary Subordinate.

Candidate's name (in full).

Candidate's address.

V. RANGASWAMI AYYANGAR,
Superintendent.

Govt. School of Engineering, Tirupat, Malabar,
12th February 1937.

PRESIDENCY TRAINING SCHOOL FOR MISTRESSSES, BOMBAY.

It is hereby notified for the information of Managers of Schools and Inspecting Officers that applications of women students for admission into the Presidency Training School for Mistresses, Equated, on July 1927 for Elementary Higher Grade Training will be received in this school.

Period of Training.—From the date of admission in July 1927 up to the 31st March 1928.

Qualifications for admission.—Candidates must have satisfactorily completed the Third Form course of a recognized secondary school or gained the eighth standard examination of higher elementary school.

Age limit.—The candidate's age must be not less than 14 and must not exceed 25 years on 1st July 1927. In the case of a candidate who has been employed as a teacher in a recognized school for not less than three years, her age should not exceed 25. **Exemptions from examination.**—A woman admitted to a Civil Surgeon's or from a registered medical practitioner verifying to the effect that the candidate is physically fit to perform efficiently the duties of a teacher.

A certificate of general education in support of the statement regarding qualifications.

A certificate of conduct which must be signed by an Inspecting Officer of the Department, President of the Local Board, or the Chairman of a Municipal Council, or the Principal or Manager or Head Teacher of a recognized secondary school.

Applications may be obtained from the school on any working day between 10 a.m. and 4 p.m.

A selection examination in Arithmetic and General knowledge will be conducted on or about the 25th April 1927.

The maximum number of potential stipendiarists that will be admitted into the school is only 25 and the rate of stipend is Rs. 30-5-0 per annum.

The selected candidates should join the school on the date they are asked to join; if they fail their places will not be reserved.

Each student will be on probation for 40 working days. The students selected should abide by the rules and regulations and should enter into an agreement to be governed under the rules.

Each applicant should be recommended by the Manager of a recognized school in column 12 A. Following the candidate an appointment immediately on her discharge from the Training School. It

should also be recommended by the Inspecting Officer in column 12 B.

The student should furnish her address in the application form.

No action will be taken of applications which are not received on or before the 31st March 1927, except in any respect as required in the notification.

A. J. KRISHNA,
Superintendent.

Presidency Training School for Mistresses,
Equated, Madras, 18th February 1927.

VACANCIES.

A. UVENDRA PAI,
Collector.

South Arcot Collector's Office,
2nd February 1927.

It is hereby notified under section 5 of the Indian Treasure Trove Act VI of 1873 that on 14th December 1926 a copper coin (Vishnu) 284 mm in weight and worth about Rs. 14-12-6 was found in S.P. No. 46-a, Guzmanamangalam dry land in Madhav village, Mysore taluk, Mysore district.

3. All persons claiming the said treasure or any portion thereof are hereby required to appear personally or by agent before the Collector of Mysore at his office at Mysore at 2 p.m. on the 6th day of June 1927, where the matter will be inquired into and determined according to law.

R. S. SHIELD,
Collector.

Tanjore Collector's Office,
25 January 1927.

It is hereby notified under section 5 of the Indian Treasure Trove Act VI of 1873 that treasure consisting of twenty three old gold mohurs (weighing in all 13 1/2 lbs.) of the total value of about Rs. 216 was found on 11th July 1926 in the field of Khoti Choudhri of Ganadu village in the Jeppore taluk of the Tanjore district by Doodi Choudhri and five others, while they were ploughing in the field.

3. Any person claiming the above treasure or any portion thereof is hereby directed to appear personally or by duly authorized agent, before the Collector of Tanjore at his office in Villuputur on 3rd March 1927 at 2 p.m.

G. A. ROUTER,
Collector.

Tanjore Collector's Office,
24th September 1926.

DEPARTMENT OF AGRICULTURE.

RAIDY CROP OF 1926-27—THIRD ON FINAL REPORT.

[On an average of the five years ending 1924-25, the area under paddy in the Madras Presidency has represented 13.2 per cent of the total area under paddy in India.]

The area sown with paddy in the Madras Presidency in 1925-27 is estimated at 29,307,000 acres against 11,650,000 acres estimated in the corresponding date of the previous year. The latter estimate is 5.5 short of the finally recorded area of 11,322,400 acres by two and a half per cent. This year's estimate is less than the final area of the previous year by three and a quarter per cent and is four per cent below the average area of 11,468,000 acres.

2,807,000 acres have been reported as sown since the December statement mainly in West Godavari, Anantapur, the Coromandel (South Arcot 122,000 acres), Coimbatore, North Arcot, Tanjore, Madurai, Kanyakumari, Travancore, and South Arcot. This area is less than the corresponding figure of the previous year by 17 per cent. The area under second crop paddy will be much less than in the previous year owing to insufficient rain supplies in most of the irrigation canals, especially in the Madurai, and a result of the partial failure of the north-east monsoon. The reduction in area under the second crop has more than set off the increase in area under the first crop and more crops for which there were sufficient supplies in the irrigated regions.

3. There is an appreciable increase in area in Krishnagiri where the season was bad in the previous year. The area shows a slight increase in Tanjore, Coimbatore, Anantapur, Salem, Coimbatore, Tanjore, and North Arcot. In Coimbatore, the area is the highest reported. The area is stationary in Kanyakumari. There is a reduction in area in the other districts, especially in the Coromandel (Chingleput—20,000 acres) and North Arcot where the area under second crop is usually large but has been affected by the failure of the north-east monsoon. In Chingleput and South Arcot, the area is the lowest reported since 1910-11.

4. The harvest of the main crop has been finished in most districts.

On the West Coast, first crop paddy and single crop paddy were good yields owing to the well-distributed rainfall. The yield in Malabar would have been better still but for the attack of stem-borer. Second crop paddy on the West Coast was affected by drought. Paddy crops where normal are reported in Godavari (East and West), Coimbatore, and South Arcot and several fields in Malabar, Coimbatore, Malabar, and the Nilgiris. The crop has been affected by drought in the other districts, especially in Tanjore, Villuputur, the Coromandel (South Arcot 75 per cent), North Arcot, Salem (74 per cent), Travancore, and the South (Salem 48 per cent). In Chingleput, South Arcot, Salem, Madurai, and Pudukottai, the yield per acre was the lowest reported. In parts of Travancore, the crop suffered from the attack of insect pests. It was less than in the previous year except in Godavari (East and West), Anantapur, and Coimbatore and on the West Coast and 11th.

The average, better for the Presidency, works out at 50 per cent against 100 per cent in the previous year. This is the lowest reported since the bad year 1918-19. On this basis, the yield works out at 8,777,000 cwt of standard rice on non-irrigated soil against 12,410,000 cwt. estimated for the previous year, a decrease of 12.9 per cent. The present estimate is less than the average estimated yield of 10,784,000 cwt. by about 14 per cent.

8. Figures by districts are given in the annexed statement.

Statement showing the inland consumption and exports of raw cotton in the Madras Presidency for the week ending 15th February 1927.

(Note.—All figures are in bales of 400 lb. net.)

Madras, 12th February 1927.

ADJOURNMENT OF COURTS.

Notice is hereby given that the Madras City Civil Court will be closed for the annual term for two months from Monday the 16th May to Saturday the 11th July 1927, both days inclusive.

1. During the adjournment, no plaint, petition or other papers will be received.

2. Arrangements will, however, be made for granting copies of judgments, decrees, orders and other papers and documents in which parties are entitled to their places or others are entitled, provided that applications for such copies have been presented before the adjournment.

PAUL APPASWAMI,
City Civil Judge.

Madras, 12th February 1927.

Notice is hereby given that the Courts of this District will be closed for the summer recess as follows:—

District and Sessions Court, Gaster, and the Subordinate Judges' Courts of Gaster and Repalle.—For two months from Monday the 15th April 1927 to Saturday the 15th June 1927, both days inclusive.

District Munsiff's Court of Repalle.—For six weeks from Monday the 15th April 1927 to Saturday the 15th May 1927, both days inclusive.

District Munsiff's Courts of Gaster, Narayanaswami, Narayana, Tenali, Repalle and Dapla, and Official Receiver, Gaster.—For six weeks from Monday the 15th May 1927 to Saturday the 15th June 1927, both days inclusive.

3. During the adjournment, no plaints, petitions or other papers will be received. Arrangements will, however, be made for granting copies, provided that applications for such copies have been made before the commencement of the recess.

4. Urgent applications for bail during the District Judges' absence from the Gaster should be made to the High Court, Madras.

E. P. WALSH,
District and Sessions Judge.

Gaster, 14th February 1927.

Notice is hereby given that the Courts of the Tanjore District will be closed for the annual recess of 1927 as follows:—

The District and Sessions Court, Tanjore, and the Courts of the Subordinate Judges of Tanjore and Tuticorin.—From Monday the 16th May 1927 to Saturday the 11th July 1927, both days inclusive.

The Courts of the District Munsiffs of Tanjore, Srirangapatnam, Palanichand, Kollipati and Tuticorin.—From Monday the 16th May 1927 to Saturday the 15th June 1927, both days inclusive.

The Courts of the District Munsiffs of Ambasamudram and Tuticorin.—From Monday the 15th May 1927 to Saturday the 11th July 1927, both days inclusive.

2. During the adjournment, petitions, etc., will not be received, nor will copies of papers be granted other than those for which applications have been presented before the adjournment.

3. Urgent applications for bail during the Sessions Judge's absence from the court should be made to the High Court.

J. C. NEEDHAM,

Deputy and Sessions Judge

Tuesday, 14th February 1927

IN THE HIGH COURT OF JUDICATURE AT MADRAS.

OF 1860-1920.

NOTICES TO MARINERS.

No. 3 of 1917.

INDIA—WEST COAST—MALAKKA COAST—

COCHIN SOUNDING.

Golden Pathways (H) Tug) has in 18 feet of water L.W.S.T. leaving from Cochin Lightship West by North (210), S. Cochin, and along the Yards south of the dredges 'Lord Wellington' now dredging in the bay.

Boatmen should proceed with the lower harbour should proceed with the lower.

Although fishing is not compulsory for vessels under 100 tons, it is advisable, in the interest of safety, that Master of all such vessels should apply for the services of the Pilot during the time that dredging operations in Cochin cause roads are in progress.

Commissioner of Income-tax.

Madras, 12th February 1927.

OFFICIAL ADVERTISEMENTS.

AUCTION FOR SUPPLY OF RATIONS AND MISCELLANEOUS ARTICLES TO THE SUB-JAIL, CALCUTTA.

Notice is hereby given that the Superintendent will hold an auction at the Sub Jail, Calcutta, South Malabar, on 16th March 1927 at 2 p.m. for the supply of the following articles of rations during the year 1st April 1927 to 31st March 1928. Intending bidders are requested to be present. In the case of supplies who may be unable to attend the auction, sealed tenders will be accepted, provided they reach the Superintendent on or before the day and hour mentioned above, and are accompanied by the correct money specified in the schedule. Tenders, which will only be received on printed forms to be had free of cost on application, should be superscribed "Tender for the supply of rations and miscellaneous articles to the Superintendent, Sub-Jail, Calcutta". They will be opened on the day of auction, and the offered rates considered along with the bids. The money should be quoted in pounds and ounces per rupee for delivery at the Sub-Jail, Calcutta, the quantities being specified in pounds as well as in figures. Samples of the articles required can be seen at the auction. Suppliers may bid or tender for all or any one of articles mentioned in the schedule on depositing the requisite earnest money. All suppliers must be up to the samples accepted by them or approved by the Superintendent.

Successful bidders or tenders will be required to enter into stamped agreements with the Jail within seven days from the date of receipt of instruction by them that their rates have been accepted. In addition, they should, before signing such agreements, deposit a security of 10 per cent of the total value of the supplies undertaken. (With the approval of the Superintendent of Prisons the total amount may be reduced in the case of approved contractors.) For full compliance within the time specified, the earnest money may be refunded, and in the event of withdrawal, they will also be liable to pay any difference between the prices accepted and those ultimately obtained by the Jail. The earnest money received from successful bidders or tenders will be taken towards their security deposits and those from others returned at the close of the auction.

3. The Superintendent reserves the right to accept or reject any bid or tender without assigning any reason.

4. Contracts should not be sublet.

5. Any rates accepted and contracts entered into will be subject to confirmation by the Superintendent of Prisons, Coimbatore, whose decision shall also be final in all questions of infringement.

6. As the quantities given against each article in the schedule are only approximate, contractors will be under an obligation to supply the entire required amount during the period of two contract, plus as much as may be needed in but for a whole month thereafter, provided, in respect of all or some quantities, that written orders are given within a fortnight of the termination of the agreement. At the same time, the Superintendent does not bind himself to receive the quantities or amounts noted in the schedule if they are not required.

7. No article is to be supplied to the Jail, except on a requisition signed by the Superintendent, or some responsible person authorized by him in writing to do so "by order".

8. No advance of such bill on any account be made to the contractors when giving orders, nor will the Jail pay freight or other charges on consignments to be afterwards debited from bills, but payment for articles delivered at the Jail on order will be made promptly after they have been inspected and passed. Contractors must submit to receive payments of these bills in whole or in part, to which and upon forming part of the order due on each bill will be disregarded, unless they constitute a formal receipt to hold notes or more, when they will be treated as a whole paper for the purpose of the amount.

9. During the prevalence of plague in the vicinity of the Jail or in that the area from which supplies are drawn, all goods, etc., will be liable to be first exposed to the sun outside before being taken in. Also, if for any other reason the Superintendent considers exposure of articles to be necessary.

10. Contractors are required to tender a weekly and a monthly statement of articles sold daily, showing the number of quantity tendered for each piece. Also to sign and return within a week of payment by cheque, cash order, or remittance transfer receipts, all cancelled bills forwarded by the Superintendent, for the purpose. Questions in connection with any payment about payment, may be referred to the Superintendent separately, but are not to be made an excuse for delay or refusal to sign.

11. In addition to any difference in price that may be recoverable from insurances or account of purchases obtained, necessary elsewhere by failure, neglect or refusal on their part to supply according to the terms of their agreements, a flat 5% exceeding Rs. 50 may be levied at the discretion of the Superintendent, for each and every such case of default. For repeated defaulting of the contractors, the amount for the other justifiable causes, he may also consider, recovering all losses sustained by the Jail in consequence of the default, from the monthly payment by the contractors, or other receipts due to them and in the event of any refusal, by legal measures, if so advised.

12. All wages fixed to occur in excess of the maximum percentages prescribed in the schedule will have to be made good by the contractor.

13. Further information on any point concerning the regulations set out here, may be had from the Jail office.

14. When any of the rates offered at an auction, or by tender have been accepted, lower quotations from others to the Superintendent, or to the Inspector-General of Prisons, will not be considered.

Superintendent.

Sub-Jail, Chidest,
10th February 1937.

TENDER FOR THE SUPPLY OF RATION ARTICLES TO THE SUB-JAIL, KORAPUT.

Notices are hereby given that sealed tenders for the supply of the undermentioned ration articles required during the year 1937-38 will be received by the Superintendent, Sub-Jail, Koraput, up to 12 noon on Monday the 15th March 1937. Tenders should be accompanied by Bankers for the supply of ration articles to the Sub-Jail, Koraput. The rates should be quoted in pounds and pence per rupee for delivery at the Sub-Jail, Koraput, the quantities being specified in words as well as in figures. Suppliers may tender for all or any one of the articles mentioned in the schedule on depositing current money of 5 pence each on the total value of articles tendered for. All supplies must be up to the samples accepted by them or approved by the Superintendent.

2. Successful tenders will be required to enter into a written agreement with the Jail within seven days from the date of receipt of notification by them that their rates have been accepted. In addition they should, before signing such an agreement, deposit a security of 10 per cent of the total value of the supplies undertaken. Failing compliance within the time specified, the current money may be forfeited and, in the event of withdrawal, they will also be liable to pay any difference between the price accepted and their ultimately obtained by the Jail. The current money received from successful tenders will be taken towards the security deposits and then from others retained at the close of the tender.

The contractors should attach a certificate to his schedule to the following effect:—"I, the contractor, agree to have the current money refunded to Government, in case of my failure to undertake the contract."

3. The Superintendent reserves the right to accept or reject any tender without assigning any reason.

4. Contracts should not be subject.

5. Any price accepted and contracts entered into will be subject to modification by the Inspector-General of Prisons, Government, whose decision shall be final in all questions of interpretation.

6. As the quantities given against such articles in the schedule are only approximate, contractors will be under an obligation to supply the entire requirements during the period of the contract, plus or minus as may be needed to last for a whole month (approximately), provided in respect of the entire quantities that within orders are given within a fortnight of the termination of the agreement. At the same time, the Superintendent does not bind himself to receive the quantities or numbers stated in the schedule if they are not required.

7. No article is to be supplied to the Jail except on a requisition signed by the Superintendent or some responsible person authorized by him in writing to do so "by order".

8. No admission of guilt will on any account be made to the satisfaction when giving evidence, nor will the fact pay freight on any other objection consequent upon the admission be deducted therefrom, but persons who are actually delivered at this Hall an order will be made immediately after they have been inspected and passed. The satisfaction shall extend to receive payment of his bill in whole rupees (i.e. fractions of his bill are disregarded and half a rupee and over are taken as a rupee) (In the case of bills amounting to Rs. 25 and upwards and the total of bills for less than Rs. 25 should be rounded to the nearest anna (1/4), amounts below six pice and above are taken as an anna).

8. During the prevalence of plague in the vicinity of the Jail as in that of scores from which supplies are drawn, all goats, etc., will be liable to be first exposed to the ran antiseptic before being taken in. Also if for any other reason the Superintendent requires exhibition of articles to the man necessary.

16. Contractors are required (under a penalty set forth in Rs. 35) to continuously send with each supply a memorandum or advice note, duly signed, showing the number and quantity tendered for acceptance. Also to sign and return, within a week of payment by cheque, cash order, or promissory transfer receipt, all accepted bills forwarded by the Superintendent for the purpose. Questions in connection with any supposed short payment may be referred to the Superintendent separately, but are not to be made an excuse for the delay or refusal to sign.

11. In addition to any difference in power that may be accountable from contractions on account of weakness considered accessory exclusively by failure, engross or refusal on their part to supply according to the terms of their agreement, the contracting party, it may be further, the destruction of the Subcontract, for such and every such cause of default. Forfeiture of assignment of the stipulations of the contract or the other justifiable reasons. It may also sound it, constituting all losses suffered, while by the full or nonperformance of the subcontract from the security deposited by the contractors, or any amounts due to them, and, in the event of any violation by local extension, if an advised

12. All waste(s) found to occur in excess of the respective percentages presented in the schedule will have to be made good by the stationers.

15. Further information at any point concerning this notification can be had from the Jail office.

18. When state the sales offered, is any bond or harm been wrought, fewer questions from others to the Superintendent as to the Inspector General's Presence will not be recorded.

[illegible]

Name of solution.	Approximate quantity required.	Percentage of weight.
Oreans	5,610 lb.	To be chosen out of good quality, no dirty stuff.
Thinned kieselguhr ..	4,000 "	Thinner and is used 10 per cent.

AUCTION FOR THE SUPPLY OF RATION
ARTICLES, ETC., TO THE CENTRAL JAIL,
SALEM.

Notice is hereby given that the Superintendent will hold an auction at the Central Jail, Solon, at 4 p.m. on Wednesday the 15th March 1927 for the sale of the following articles of value during 1926-1927. Intending bidders are requested to be present. In the case of supplies who may be unable to attend the auction, sealed tenders will be accepted, provided they reach the Superintendent's office not later than 12 noon on the day above and are accompanied by the correct invoice. Tenders, which will only be received on sealed forms to be had free of cost on application, should be accompanied by Tender for the supply of various articles and sundries stored in the Central Jail, Solon. They will be opened at the time of auction and the offerors will be informed of the result. The articles should be packed in packets and marked per packet for delivery at the Central Jail, Solon, the quantities being specified in words as well as in figures. Samples of the articles required can be seen at the auction. Supplies may bid or tender for all or any one of the articles mentioned in the schedule on depending on the regular or casual supply. All supplies accepted by the Superintendent.

§ 8. *Signatures.* Holders attending will be required to state in the stamped agreement with the Jail within seven days from the date of receipt of notice by them that their notes have been assigned. In addition, they should, before signing such agreement, deposit a sum of 10 per cent of the total value of the supplies undertaken. (With the exception of the Hospital-General of Ponce, the other hospitals are not required to accept such assignments.) Before compliance with the last stipulation, the current money may be confiscated and, in the event of withdrawal, they will also be liable to pay any difference between the prices accepted and those ultimately obtained by the Jail. The current money received from attendance holders or laborers will be taken towards their monthly deposits and those from their release at the close

3. The Superintendent reserves the right to accept or reject any bid or tender without assigning any reason.

4. Customers should not be misled.

3. Any order accepted, and estimate entered into will be subject to confirmation by the Inspector General of Prisons, Unaccompanied, whose decision shall also be final in all questions of infringement.

4. As the quantities given against each article in the schedule are only approximate, contractors will be under an obligation to supply the entire requirements during the period of the contract, prior to which it may be needed to last for a whole month thereafter, provided, in respect of the same quantities, that written orders are given within a fortnight of the termination of the agreement. At the same time, the Superintendent does not hold himself to reserve the quantities or numbers noted in the schedule if they are not required.

5. No article is to be supplied to the Jail except on a requisition signed by the Superintendent, or some responsible person authorized by him in writing to do so "by order".

6. No advance of cash will on any contract be made to the contractor when, owing to delay, he will the Jail pay freight on other charges on any goods to be afterwards delivered from bills, but payment for articles delivered to the Jail on order will be made promptly after they have been inspected and passed. Contractors must submit to secure payment of their bills in whole respect, to which end some form of part of the sum due on each bill will be discharged unless they procure a further equivalent in half a rupee or more when they will be treated as a whole rupee for the purpose of the account.

7. During the prevalence of plague in the vicinity of the Jail or in that of the areas from which supplies are drawn, all goods, etc., will be liable to be first exposed to the sun outside before being taken in; also if for any other reason the Superintendent considers exposure of articles to be necessary.

8. Contractors are required (under a penalty not exceeding Rs. 25) to personally deal with each supply a memorandum or advice note duly signed showing the number or quantity ordered for acceptance, due to sign and return within a week of payment by cheque, cash order, or remittance transfer receipt, or by receipted bills forwarded by the Superintendent for the purpose. Quotations in accordance with any approved order payment may be referred to the Superintendent separately, but no act is to be made an excuse for delay or refusal to sign.

9. In addition to any difference in price that may be recoverable from contractors on account of purchase rendered necessary elsewhere by failure, neglect or refusal on their part to supply according to the terms of their agreements, a fine not exceeding Rs. 50 may be levied at the discretion of the Superintendent for each and every such case of default. For repeated infringement of the obligations of the contract or other justifiable reasons, he may also suspend, restricting all future supplies by the Jail in consequence of the contract, from the security deposited by the contractors, or other moneys due to them, and in the event of any refusal by legal assistance if so directed.

10. All wastage found to occur in excess of the respective percentages provided in the schedule will have to be made good by the contractor.

11. Further information on any point concerning this notification may be had from the Jail office.

12. When new the rates offered at an auction, or by tender have been put, lower quotations from others to the Superintendent or to the Inspector General of Prisons will not be accepted.

L. H. M. UPSHON,
Superintendent.

Contracted Jail, Bahar,
16th February 1927.

TENDER FOR SUPPLY OF ARTICLES OF DIET AND OTHER HOSPITAL REQUIREMENTS FOR THE GOVERNMENT HAWA-PURAM HOSPITAL, MAHARAS.

Notice is hereby given that sealed tenders in duplicate will be received up to 11 o'clock (overnoon) on Monday, the 27th February 1927 by the Superintendent, Government Hawa-Puram Hospital, for the supply of the following articles:-

1st (per bill):-consists of perishable articles of diet supply (supply to commence from 1st April 1927 to 31st March 1928). An initial deposit of Rs. 1000/- will be given to the contractor. Payment will be made on monthly bills.

2nd (per bill):-consists of articles of diet supply (supply to commence from 1st April 1927 to 31st March 1928). An initial deposit of Rs. 1000/- will be given to the contractor. Payment will be made on monthly bills.

3. The articles required are detailed in the attached schedule annexed and information as to samples, etc., may be had on personal application at the hospital.

5. A separate tender must be sent in for each article. If a composite phrase is used in one and the same form for more than one article, the tender rate for each article will be considered separately and not in relation to others.

6. Tenders will be opened by the Superintendent at the Government Dispensary Hospital at the appointed time in the presence of those interested who may choose to attend.

7. Tenders to be submitted in the manner specified in paragraph 1 and to be covered by the words "Tenders for Hospital Supplies" written. Each tender must contain not only the item but the total value of each item of supply entered on a separate column, the items of which must be listed so showing the aggregate value of each article tendered. The rate quoted by each tender should be expressed in words also.

8. Each tender must be accompanied by a deposit (in Government preliminary notes or bank receipt) for amount money of the amount stated against each article. When several articles are tendered for, one bank receipt for the total amount of sum of money will be accepted. In default of such deposit the tender will be rejected, nor will any tender be received after the time fixed for the opening of tenders. No such will be received. The deposit in bank shall be in the name of the Superintendent of this hospital. This deposit will be returned in accordance to whom it is entitled and to the others as soon as they have lodged the security mentioned in paragraph 8 (b) above.

9. No person making a tender shall be allowed to withdraw his tender for the space of thirty days from the date thereof, and, in the event of his so doing, his deposit shall be forfeited to Government.

10. The successful tenderer must, within three days from date of opening of tenders, that his tender has been accepted, lodge security, viz. 10 per cent on the total value of the articles, failing which his deposit will be forfeited to Government. He shall also pay the value of the proper stamp duty on the contract.

11. No advance of such will be made to the contractor. Payments will be made after delivery of the articles on monthly bills by the Superintendent of the hospital. The date of payment and the amount actually paid by the Assistant General, Medical, for the bills presented by him should be immediately intimated by the contractor to this hospital.

12. A fee, not exceeding 10 per cent of deposit money, will be levied for any infringement of the conditions of the bond, and, if frequently repeated, the amount will be forfeited and the contract forfeited to Government. The contractor's security, if not forfeited, will be returned to him immediately on completion of his contract.

13. The contract must not be sublet without the permission of the Superintendent of the hospital.

14. The Superintendent reserves to himself the right to decline or reject the tender for any one or more of the articles involved for by the successful tenderer without assigning any reason for so doing. The Superintendent also reserves to himself the right of rejecting tenders without assigning any reason for so doing.

15. Government preliminary notes lodged as tender money deposit for a period of twelve months or less shall not be returned to the Superintendent but shall remain in the name of the Assistant General Medical, who will appropriate or convert the notes as per G.O. No. 3385, dated 2nd March 1910, Mysore, authority to that effect being duly entered in the contract or other document provided by the tenderer.

16. With reference to the stipulations contained in the preceding paragraph 15, the tenderer should attach a statement to his schedule or schedule to the following effect:—

"I, the tenderer, agree to have the amount money if in Government preliminary notes or bank receipts submitted to Government in case of my failure to redeem the contract."

17. No article shall be supplied to the hospital except on the authority signed by the Superintendent or by some responsible person authorized by him to act in his stead.

18. Samples of dress, sterilizable articles, surgical dressings and bandages and clothing only should be sent along with the tender; other samples are not required unless called for. When called for, they must be sent in within two days. If approved and tender accepted, the samples received will be retained as part of the supply. If rejected, the samples will be returned. Tenderers are distinctly understood that, if the tender is accepted, the balance of the articles or articles required must in every way be equal to the approved sample. The opinion of the Superintendent will be final on this point.

19. Bond.—The bond supplied in the bond should be free from stain and rail, an amount equivalent to not more than 5 a.c. Mutual and, per 100 grammes of bond. The maximum limit of cash permissible in the case of bond is 50 per cent (calculated on the total value) payable in form of bank notes and.

(2) Samples of bond accepted from each tenderer will be subject to analysis by the Public Analyst, King Institute, Secy.

(3) The bond supplied to hospitals from time to time will be subject to analysis and the contractor will be liable to a penalty for exceeding the percentage laid down above. This penalty will be subject to the maximum of 10 per cent of the security amount deposited by the contractor.

20. The number or quantity entered in the schedule is the probable number or quantity which the Superintendent undertakes to require to be supplied and may be less or more according to actual requirements. The Superintendent does not bind himself to receive the full quantity or number stated in the schedule. But the contractor will be under an obligation to supply such larger number as increased quantity as the Superintendent may require him to supply.

21. The system of recording all fractions of a rupee in the lowest paper in the case of bills amounting to Rs. 50 and upwards, and in the case of bills for less than Rs. 50 are rounded to the nearest anna, i.e., amounts below six paise are disregarded and six paise and above are taken as one anna, rounded in G.O. No. 555, Mysore, dated 14th August 1910, will be adopted in all maintained bills.

22. The contract note should include charge for delivery of the articles at this hospital.

23. Every correction in the tender must invariably be initialed by the tenderer, failing which the tender will be rejected.

24. The articles used in the schedule should be supplied in such quantities and at such times as may be indicated for by the Superintendent. Information regarding quantities required at a time may be had on personal application at the hospital.

25. Any information regarding tenders may be had on personal application at the office.

26. All contracts will be subject to confirmation by the Government, who will be at liberty within a period of three months from the date of acceptance of the tenders by the Superintendent to cancel the contract either entirely or in respect of the supply of any particular article or any number of articles, supplied before the date of such cancellation and however being effected.

16. The contract must not be subject. The contractor's security will be returned to him immediately on completion of his contract.

17. The Superintendent reserves to himself the right to decline or accept the tender for any one or more of the articles tendered for by the successful tenderer without assuming any reason for so doing.

15 The successful bidder will be required to pay the value of the proper stamp duty on the deed.

28. Government promissory notes lodged as collateral money or security deposit for a period of twelve months or less shall not be withdrawn, stay in the Representative's, but shall remain in the name of the Corporation. The Government will appropriate or assign the notes as per G.O. No. 1158, dated 1st March 1885, with a note thereof in the contract or other document executed by the donor.

20. With reference to the stipulations contained in the preceding paragraph No. 18, the teachers should attach a certificate to his schedule or schedule to the following effect:—

"I, the tenderer, agree to have the earnest money if in Government's preliminary order or Bank receipt cashed in to Government in case of my failure to undertake the contract."

21. No articles shall be supplied to the hospital except on authority signed by the Superintendent or by some responsible person authorized by him in writing to do so.

22 Printed forms of invoices can be had on application at the General Hospital, Medway.

30. If samples submitted are approved and tested, accepted, the samples received will be couriered on next day of the week. If rejected, the samples will be

part of the supply. If required, an empty bottle will be returned. Teachers are asked to supply articles as per approved samples. The opinions of the Superintendent to be final on this point. Receipts will be required in sealed bottles etc.

24 The number or quantity entered in the form of tender is the probable minimum number or quantity to be supplied, but the contractor will be under an obligation to supply as much as the Superintendent may require him to supply. The Superintendent does not bind himself to receive the full number or quantity used in the schedule.

REMARKS.—If the whole of this group is included in one under the 100 will be secured an almost deposit.

* Examples of items with safety labels can be seen in the accompanying set of General Hospital and Lin supplies used in case studies in *General Hospital* (2002).

Article	Quantity	Unit Price	Estimated Quantity Required	Estimated Amount
Firewood, well split, 2 feet long 12	100	1.00	100	\$100.00
Gasoline for generator	100	1.00	100	\$100.00
Oil, kerosene	100	1.00	100	\$100.00
Oil, motor	100	1.00	100	\$100.00

Notes: 1. It is the intent of this group to include in the budget the 100 well split 2 feet long 12

amount, either by direct or by other means, the contractor will receive a voucher for payment of the amount he will be paid according to the estimated scale.

be increased greatly, as the Superintendent may require him to supply. The Superintendent does not bind himself to receive the full number as quantity used in the schedule.

24. Government promissory notes lodged as interest security money as security deposit for a period of twelve months or less shall not be returned over to the Superintendent but shall remain in the name of the depositor. Government will appropriate around the notes as per R.O. No 2348, dated 24th March 1989, authority to that effect being duly entered in the record as other agreements entered by the Director.

27. The blood supplied to the hospital should be free from clots and paid an acidity equivalent to 100 mm. Hg. It is a very important factor in the selection of the maximum limit of pH permissible in the case of blood to 8.0 per cent (calculated on the dried solids) available in China hydrochloric acid. Samples of blood received from such a donor will be subject to analysis by the Public Analyst, King Institute, Gweru. The blood supplied to the hospital from time to time will be subject to analysis and the acceptance will be liable to a penalty for exceeding the permissible limit down above. This penalty will be subject to the maximum of 10 per cent of the weekly amount deposited by the

24. The tenderer should attach a certificate to his tender or tenders to the following effect:—

²⁰ I, the trader, agree to have the earnest money forfeited to Government in case of my failure to conduct the tender."

12. The contractors should furnish at once specimens of their signatures to the Assistant General Medicine, along with their first contingent bills endorsed to them by this hospital to avoid any delay in the payment of their claims.

50. Any information regarding tenders may be used as general application at this Hospital.

Period of delivery—(To be supplied monthly or otherwise as required from 1st April 1927 to 31st March 1928).

LIST OF UNCLAIMED GOODS LYING
IN THE PORT TRUST PREMISES.

Notices hereby given that the undermentioned packages remaining unclaimed in the Trust's premises will be sold by public auction under section 84 of the Marine Port Trust Act, II of 1910 if not cleared within ten days from the date of this notice.

Goods advertised by the auctioneers for sale will not be permitted to be withdrawn by the owners of such goods except on payment of a deposit sufficient to cover harbor dues, bonded dues and other charges due thereon.

Delivery of unclaimed unclaimed goods will not be allowed unless the purchaser produces a receipt from the auctioneers showing the purchase money to have been paid.

Lot number	Trust's serial number and register number.	Trust's name and date of arrival.	Marks and contents of the packages.	Number of packages, description and contents.

Madras, 22nd February 1937.

TENDER FOR CARDBOARD JACKETS.

Sealed tenders will be received by the undersigned at his office up to 5 p.m. on 15th March 1937 for the supply of 100 Cardboard Jackets.

2. Tenders should be addressed to the Secretary to the Executive Engineer, and should be accompanied by "Tender for Cardboard Jackets". Each tenderer should send along with his tender, a sample of the Cardboard Jacket which he proposes to supply.

3. The undersigned will reserve to himself the right of rejecting all or any of the tenders without assigning any reasons for so doing.

4. The acceptance of the tender will depend on the quality of the cloth as well as the price quoted.

5. The successful tenderer will deliver twelve jackets of the acceptance of his tender and he should supply the balance within a month of the receipt of work instructions.

6. The jackets should be similar in all respects to the approved sample. Any of the jackets not up to the sample will be rejected and fresh ones should be supplied.

7. The successful tenderer should deposit a sum of Rs. 50 (fifty) immediately as receipt of notification that his tender has been accepted. The amount will be held as security for the due fulfilment of the contract.

8. Failure to fulfil the contract will entail forfeiture of the deposit money.

W. A. BEITO,

Secretary to the Commissioner of Ennis

Madras, 15th February 1937.

TENDER FOR REPAIRS TO BHAI VAIKEAL DRAIN IN THIRUTHURAIPOUNDI TALUK.

Sealed tenders will be received by the undersigned at his office up to 5 p.m. on 15th March 1937, for the work, viz. Repairs to the Bhai Vaikal drain in Thiruthurai poundi taluk, G.S. No. 4 of 34-37.

8. Tenders should be addressed to the Executive Engineer, Vanner division, and should be accompanied by "Tender for Repairs to the Bhai Vaikal drain in Thiruthurai poundi taluk."

3. Each tender should be accompanied by an amount of money of Rs. 50 in cash or currency notes which will be returned to the tenderers whose tenders are not accepted.

4. The Executive Engineer, Vanner division, will reserve to himself the right of rejecting all or any of the tenders without assigning any reasons for so doing.

5. As soon as the acceptance of the tender is notified, the successful tenderer will be required to deposit a further sum of Rs. 500 which, with the amount money received, will be held as security for the due fulfilment of the contract.

6. The successful tenderer will also be required to sign an agreement in the proper departmental form K-3 for the due fulfilment of the contract.

7. Failure to comply with conditions 5 and 6 above will entail forfeiture of the amount money.

8. The contract must not be sublet.

9. Other conditions of contract and the contract documents can be seen at any time between 11 a.m. and 4 p.m. in the working days in the Vanner division office from which blank forms of tender can also be obtained.

PROPORTION FOR LAYING AND JOINTING CAST IRON
PIPES AND SPECIALS AND FOR FIXING ELBOW
PIPPERS, AND VALVES, ETC., AT TOWN DISTRICTS
CHARGE.

COIMBATORE W/ENCL. RETURN TO:

URGENT FOR LAYING AND COPIES LAST TWO
SIXES AND SPECIALS AND FOR FIXING SLICK
VALVES, AIR VALVES, ETC., AT TOWN DISTRIBUTION
CENTER.

1 *Receipt of materials*—The contractor shall grant ordinary receipts to the officer in charge of the works for all materials received by him in good condition. These receipts shall be in duplicate and shall be signed by the contractor or his agent (fully authorized in writing to grant receipts on behalf of the contractor).

The duplicate receipt should be signed by the officer-in-charge and returned to the contractor as his agent in token of acceptance of the correctness of the receipt.

When articles are received by the contractor in a damaged condition the receipt of these articles shall be entered in his book in a special receipt with a note of the extent of the damage. As in the case of ordinary receipts, the duplicate receipt for damaged articles, when signed by the officer in charge, will be returned to the contractor. The contractor is required to provide all labour, plant, tools, etc., necessary for carrying out the work as hereinafter detailed.

The pipes, valves and specials will be supplied and delivered to the contractor by the department along side of road or street in which they are to be laid. All articles taken over by the contractor will be considered as having been received by him in good condition.

2. *How laid.*—The contractor shall provide a certified plan sheet at an approved site where articles such as valves and such other small items may safely be deposited until wanted for use.

3. *Interference with public.*—The contractor shall not deposit materials at any site which shall seriously inconvenience the public and the manner of deposit shall be approved from time to time by the officer in charge of the work. The officer in charge may require the contractor to remove any materials which are considered by him to be a danger or inconvenience to the public or cause them to be removed at the contractor's cost.

4. *Careful of materials at work site.*—The contractor shall be responsible for the safe custody of all materials deposited on site adjacent to their position in the work, unless, however to the direction and control of the officer in charge for the purpose of inspecting, weighing or testing the pipes and materials at the site and on site.

5. *Responsibility for damage to material.*—Any pipes, valves or other articles which shall have been carried over to the contractor in good condition and which thereafter shall be damaged before, when or after, being placed on the work, shall be paid for by the contractor at the rate originally paid for such articles plus 10 per cent in excess of such rate. Should the spigot ends of any pipes be crushed or broken after they are covered by him, the contractor shall if the crushed portion be less than half the pipe) not the damaged part off at his own expense and pay for the actual length cut off plus 10 per cent extra. Should the damage be at a socket end, or much or half the length from the spigot end, then the contractor shall pay the cost of the whole pipe plus 10 per cent and the pipe then shall become his property.

6. *Excavation of trench.*—The trenches shall be excavated along the line as set out on the ground by the officer in charge. These lines shall be so set out that the pipes will be in long straight lines to one side or side of a street or a branch, main or a trunk road so as to leave the centre of the street or road for a street.

The line of pipes shall not be laid nearer the side than three feet and sharp curves shall be whenever possible avoided.

The depths at which the pipes are ordinarily to be laid are shown in the schedule. These depths and breadth may be varied by the officer in charge. The questions of excavation are based on the scheduled depths and breadth with side slopes 1 in 1 foot. The contractor will be paid for the actual excavation executed subject to the following portion:—

He will not be paid for a greater depth than the scheduled depth unless he produces an order in writing from the officer in charge regarding the greater depth.

He will not be paid for a greater bottom breadth than the scheduled breadth.

He will not be paid for a greater top breadth than the top width calculated with smooth slopes at 1 to 1. He shall not be paid for the scheduled depth when the officer in charge ordered it to be a less depth. The contractor in making his tender shall consider these prices and enter a note which will cover any shoring, planking, bulging or other necessary measures which he considers may be required.

7. *Damage to property.*—The contractor shall be responsible for any damage which may be caused to any building, house or wall or pipe by the contractor resulting from the excavation of a trench or trench excavated by him in the execution of the water works such as shoring, house, wall or pipe, due to insufficient shoring, planking or the result of being or pumping.

8. *Order of removal from excavation site.*—And after materials and equipment of the same.—In digging the trenches, which shall ordinarily be along two sides of the streets in which pipes are to be laid, the contractor shall first remove the material, where such exists, and shall carefully deposit it so that it shall not be mixed with earth, small or refuse material from the trench and so that it shall be the same as required in one side, so that when the trench is filled they may again be used in the proper order so that the original state of the surface of the ground shall be restored.

9. *Protection of excavation.*—The off or in charge will settle the order in which the trenches for mains or branches are to be excavated. In forming the trenches they shall be cut so that the bottom is a regular bed and no filling in, with loose soil will be permitted. Should the contractor be taken out deeper than the depth indicated the pipes may be laid at that depth or the level brought up with earth or gravel, watered and rammed as may be directed by the officer in charge. The pipes in all situations shall be laid on a firm foundation carefully prepared. After excavating the trench to the correct level, pits should be cut under every joint to allow the joints from seepage to properly reach the joint and lead. These pits will be 2' x 3' x 1' each and will be paid for at the tendered rate for earthwork according to the nature of the soil.

10. *Closure of road during repairs in force.*—If any excavation is in such which requires flagging, the contractor shall observe any regulations which may be in force in the district at the time and such further regulations that the officer in charge of the work may issue for the safety of the public.

11. *Road crossing.*—All road crossings cut more than one half the breadth of a road shall be opened at a time not shall two or more shall at their position be opened except in such manner as shall avoid all interference with the traffic. The contractor shall provide suitable planking over manholes for feet, sinks or vehicle tracks at all places mentioned necessary by the officer in charge.

12. *Shoring, lighting and watching.*—Open excavations shall be protected with a strong fence or other fencing during the day, and in addition threats at night the contractor shall provide lights and watchmen. The contractor shall be responsible for any accident which may occur owing to insufficient fencing or lighting. The contractor shall be responsible for any damage done to any adjacent property by his negligence. Should the shoring, lighting or watching be at any time insufficient, the contractor shall be called on by the officer in charge to provide sufficient fencing, lighting or watching to the satisfaction of the officer in charge. If the contractor fails to provide sufficient fencing, lighting or watching, or if the contractor fails to provide sufficient fencing, lighting or watching, or if the contractor fails to provide sufficient fencing, lighting or watching, the cost of doing so shall be decided by the officer in charge from any moneys due to the contractor. Not such action as the part of the

above is change in providing sufficient fencing, lighting and watching shall not relieve the contractor from the responsibility for damage caused by failure on his part in providing sufficient fencing, lighting and watching.

12. *Estimated depths for pipe laying.*—The pipes shall normally be laid at the depths noted in the schedule, but before commencing to lay any pipes the contractor shall ascertain from the officer in charge of the works whether owing to presence of drains, cesspits, or other causes, the estimated depths require to be increased or decreased, and, on obtaining orders in writing the contractor shall lay the pipes at the new depths indicated by the officer in charge. Payment will be made only for the amount of excavation ordered by the officer in charge and no payment will be made extra for any depth excavated by the contractor in excess of that actually ordered by the officer in charge.

LAYING AND JOINTING PIPES AND SPECIALS.

14. *Pipes to be assembled and joined.*—The pipes shall be assembled before laying for drains and specials and shall be also thoroughly cleaned inside. The pipes before being laid shall be scraped and brushed throughout to remove any soil or stones that may have accumulated in or on the pipes. The inside of the socket and the outside of the spigot end of each pipe shall be carefully cleaned. In the case of small pipes, these pipes may be fitted up to remove any accumulation. The pipes shall then be laid in position, the socket ends of all pipes facing the direction from which the water is to flow, so that the water when it does flow, shall first enter the socket end of every pipe. But in steep locations it may be necessary to lay the pipes that the socket shall always point up-hill in order to avoid drawing of joints. These pipes shall be directed by the officer in charge who, when an alteration from the general rule is required shall give directions in writing to the contractor.

15. *Each of pipes to be closed in ready work for the day.*—The open end of the last pipe to be assembled, on working work for the day with a strong wooden plug filling the ends of the pipes.

16. *Careful lowering of pipes into the trench.*—The pipes will be carefully lowered into the trench and supported on both ends in the centre, plus being left at the joints for laying. The spigot shall be truly centred in the socket. The socket will then be caulked with not less than three rows of open joints, twisted into ropes of uniform thickness, packed up to the shoulder of the socket and leaving the correct depth for the lead. The tops of joints must be all, when longer than the shoulders of the socket. No made up joints will be allowed. The minimum depths for the lead will be as noted below:

17. *Minimum lead joints.*—For cast iron pipe, wrought and socket pipes, cast pipes and other similar pipes and specials to be laid joined, the following circumstances shall be observed:—

After the pipes are joined in correct positions for joining and the caulking with a open joint has been completed as per instructions laid down in the preceding paragraph, the minimum depths for the lead following are as noted below:—

Diameter of pipe.	Depth of lead joint.
2" to 4"	1 1/2"
4" to 12"	2"
12" to 18"	2 1/2"
18" to 24"	3"

The pipes shall rest on the bottom of the trenches throughout their entire length of each pipe except at the bottom where pits are made to enable the joining to be done. The pipes shall then be caulked for two and half inch at the open left in the socket shall be fitted by packing or caulked lead. This may best be done by using rubber jointing

rings. When these are not available, a ring of hemp soaked with clay shall be wrapped round the pipe at the end of the socket, leaving an opening at the top of the socket into which the lead can be poured. The hemp rope shall be supported by clay packing as is noted, the operation of lead pouring.

The lead must stand to the best British pig lead, approved by the department, free from impurities and shall be carefully skinned of all scale when melted in a cast iron pot or potting melting machine. Softest lead shall then be taken from the pot by a ladle and run hot into the joint, and the joint filled at one reading, with the lead flush with the outside of the joint which shall then be 'set up' by a suitable caulking tool and a 4 lb hammer when set, and the lead is at least one-eighth inch within the edge of the socket. The number of joints of each description will probably vary slightly from those given in the second schedule. The contractor will be paid according to the number of such descriptive actually executed. The caulking should not be carried out until 200 feet of piping in advance has been laid.

18. *Cutting pipes.*—The cost of cutting off the ends of pipes damaged and the cost of cutting round pipes which it may be necessary to do in order to lay down branches, bends, valves or other specials in any particular position shall be paid for at the tender rate according to the actual number of pipes of each size which it may be necessary to cut. The pipes damaged in trench shall not have their damaged portions cut off till they are actually required for use as bends, valves or other specials. It is of course impossible to state the number of each descriptive of pipes which may require to be cut, therefore, viz, that the rates are to be in proportion of the number to be cut and whether small or large pipes.

19. *Laying of leads.*—The net length, measured on the curve shall be taken as the length to be paid for and the rates shall be the same as for plain pipes.

20. *Laying of bends.*—Suppose a cast iron bend to be say, 6" x 12" x 24" inside, the net length of the 12" pipe (6" x 12") will be paid for at the rate for laying a similar length of 12" plain pipes and the bend's part at the net length for a 24" pipe measured from the outside of the 12" pipe.

21. *Laying of specials.*—The net length will be paid for at the rate for plain pipes of the largest diameter of a taper. For example a taper of 4 feet in length, 6" x 12" will be paid for as 4 feet of 12" plain pipe.

22. *Laying of valves.*—The gross length of the outlet will be paid for at the same rate as the pipes they are used in connection.

23. *Fixing air valves.*—Air valves shall be fixed at the extremities of pipe lines.

A galvanized iron pipe shall be taken from the top of the main pipe on which an air valve is to be fixed at the side of the road where a suitable site for the air valve has been selected by the officer in charge.

This galvanized pipe shall be laid and the air valve shall be fixed at the pipe in such a way that air finding its exit at the extremity of the main will escape by a gradually ascending gradient from the main until it ultimately passes the air valve. The air valve shall be fixed on a suitable masonry pier for protection and care shall be taken that a suitable weep hole is provided for the escape of water which may pass the air valve with the escaping air.

The air valve shall be fixed as per design No. 20, Fig. 10. The rate includes all work necessary for fixing the air valve including valve pier and weep hole and also tapping the main for fixing the valve.

24. *Finely smooth side*.—At all depressions on a main there shall be fixed a sewer valve at least of diameter equal to half the diameter of the main which it is intended to cover subject to a maximum of 3 inches in diameter. The sewer valve shall be fixed so that the outlet is from the underside of the main it is intended to cover and not from the side as is usually the case.

The outlet shall be led to the nearest ditch or low place and special care shall be taken that the outlet is above ordinary flood level. The parts of a sewer connection shall be a branch with the branch opening pointing downwards, a quarter bend a straight piece of pipe a stop valve in a pit and the necessary length of straight pipe to carry the sewer water to a suitable depth. From the point of discharge at the main to the ditch there shall be without interruption a continuous downward gradient.

In some cases where a suitable ditch is not available within a reasonable distance of say 100 feet for part of the straight pipe after the stop valve shall be substituted two quarter bends so that the top of the second quarter bend is above flood level.

The second quarter bend shall be provided by a necessary block.

25. *Finely smooth valve*.—The stop valves shall be fixed as per design shown Nos. 2 and 3 & connected. The rate includes all work necessary for fitting these valves including valve pit and joining the outlet and tail pipes into the existing pipes.

26. *Finely smooth*.—The position of the hydrants are shown on the plan of the distribution mains. A 1½ inch branch pipe shall be taken from the distribution main and led to the side of the road-side drawing No. 20 of 1926. On this branch there shall be a stop valve in a pit and the continuation of the branch shall be connected by a flange joint to a cast iron hydrant pillar provided with a standard hose connection on the side of the pillar facing the centre of the road. The rate for fitting includes all work from providing fitting of stop valve to including laying of pipe and lead joints between the main and the above valve.

27. *Finely smooth and double tap fountain*.—The fountain to be erected shall be of the following description:—

	Approximate cost
(1) Single tap fountain	£ 10
(2) Double tap fountain	£ 15

The fountain shall be as shown in the drawings 5 and 6 & 7 which will be furnished to the contractor. From the 1½ inch line on the main a 2 inch galvanized iron pipe shall be taken to the side of the street to a site selected by the officer in charge according to the sanctioned plan of the distribution system. At the end of this branch there shall first be a 2 inch x 1½ inch reducing coupling and a 1½ inch stop cock in a masonry pit provided with a cast iron cover the top of which shall be at ground level.

From the stop cock a 1½ inch galvanized pipe shall be taken as far as the first 2 inch tap connection as shown in the drawing.

The assembly shall consist of a pillar of brick in each corner and a platform of brick masonry placed with correct level.

The platform shall be surrounded by a retaining wall of brick on edge and shall slope in a drain running alongside the pillar. The outlet of this drain shall be provided with a 4 inch x 4 inch grating of wire mesh 1 inch diameter and 4 inch apart and the spill water shall be conveyed by a 2 inch galvanized iron pipe to the nearest open drain. In the case of a sewer being available the connection shall be a 4 inch drainage pipe through a 4 inch syphon trap adjoining the retaining wall of platform.

II-33

When a suitable public field or natural water course is available within 100 feet of a fountain the 2 inch galvanized pipe outlet shall be extended to discharge into this field or water course.

In cases where neither an open drain, sewer or a natural water course is available to receive the spill water from a fountain the spill water shall be led into a filter well or trench.

The rate includes all work shown in the design including valve pit, galvanized stop cock and pressure pipe but excludes painting of 2 inch galvanized iron pipe to the 2 inch branch or to on the main and laying and pointing of the 2 inch galvanized iron pipe between main and stop cock. Any extra work or drains from fountain will be measured up and paid for separately at the rates shown in the last four items of tender.

28. *Finely smooth*.—The connection required for laying galvanized iron pipes shall be done in the same order and manner as specified for the connection for laying cast iron pipes and the material galvanized shall be replaced as detailed in this specification.

The connection for laying galvanized iron pipes shall not exceed in diameter 12 inches in width and 18 inches in depth but if a less width than 12 inches is required by the contractor he shall not be paid for more width than that actually required. The depth however of the trench excavated shall not be less than 18 inches.

The sewer deposits of the tubes and fittings shall be carefully preserved from damage and before joining they shall be cleaned and covered with red lead or best hessian oil. When straight galvanized iron tubes are joined the coupling shall be covered back on one tube so that when the adjoining tube is inserted into the coupling or the coupling is inserted back on the second tube each tube shall show evenly on each side. In cases where the joints require it owing to thickness of water tubes, cast iron threads inserted with red lead may be used to make a water tight joint. Such procedure shall only be allowed by the officer in charge when he considers it necessary owing to thickness of joints.

The contractor shall not tap the couplings or cover the ends of pipes in such a manner as will result in damage of joints when covered together.

Taps and dies shall only be used by the contractor for straightening sewer threads which have become bent or damaged and shall not be used for tapping off the threads as to make them slack when pressure would result in a non-water-tight joint.

The schedule accompanying the specification will give the approximate quantities of galvanized iron tubes and fittings to be furnished but the quantity shall be varied by the officer in charge on instructions or requirements of the work done and the contractor shall be bound to lay and joint such less or greater quantity of such galvanized iron tubes and fittings in the field as is directed by him and on the request or writing of the officer in charge.

29. *Finely smooth*.—The pipes after being laid and pointed shall be tested by the officer in charge in such lengths as seems to him desirable under the circumstances of availability of water for testing purposes.

Before testing is proceeded with on a length of pipe, the pipe shall be covered with excavated earth to a depth of 1 foot above the top of every pipe but leaving a length of 10 on each side of every joint uncovered so that the joint may be inspected when under test pressure.

The 3 feet of each pipe surrounded by earth shall be covered with mats, grass, logs, or other forms as shown kept down so as to avoid damage to the joint by the pressure and contraction from variation of temperature.

Notes.—The mortar used in the different classes of stone work shall be similar to that specified for brick work.

36. **Close joints.**—Close joints under masonry towers shall be dressed so that they do not show on their beds so that the masonry has seats fairly and evenly on the stone. The joints between the stones shall not show of the falling into the water pit. The stone shall be laid dry (not bedded in mortar) on top of the brick work so that it may be easily removed and replaced when repairs to masonry are necessary.

37. **Red stone for stone masonry.**—Red stone for stone masonry shall have their lower surfaces dressed true, and the upper surfaces cut and set in a ready reserve the bottom of the water race.

38. **Concrete plaster.**—Concrete plaster shall not be less than half an inch in thickness and shall be made from Portland cement up to Standard British Specification, and shall be mixed in the proportion of one masonry and two of stone sharp sand.

39. **Pointing.**—In pointing, the mortar in any joint shall be mixed out to a depth of 1 inch. The joint shall then be brushed out of the joint and the joint washed with water. The mortar for pointing shall then be placed in the joint by a small trowel and smoothed down with edge of joint. Within an hour of pointing the partially set mortar shall be fixed with a key so as to follow the line of jointing.

40. **Masonry is to be kept damp.**—All masonry work and concrete plaster shall be kept moist all winter and all water used shall be free from salt.

41. **Disposal of surplus paper, sprays and materials.**—The contractor shall deliver, store and stock all surplus paper, sprays and materials at such place as the officer in charge may in writing direct and the contractor will be held for such waste at the rate tendered by him and accepted by the officer in charge.

42. **Sealing pipes.**—When pipes are returned on the back spot with the assistance of Anger Smith's composition damaged, that is broken or in patches the officer in charge of the works shall have the patches repaired with Anger Smith's composition before the pipes are laid in the trench.

A quantity of this composition will be obtained with pipes. The composition shall first be heated to 440° or 500° Fahrenheit in a suitable iron cylinder and then applied while hot to the patches requiring remedying.

Care shall be taken when joining pipes that the mauling tool or hammer shall not injure the coating on any pipe but in the event of such coating being injured, fresh composition as specified above shall be applied to the injured pipe before the trench is refilled.

In cases where a supply of Anger Smith's composition is not available the following composition shall be used:—

- One part red wax;
- Three parts thoroughly pitch or asphaltum;
- Five part cement sand.

The tar shall be placed in a cylinder and heated until the asphaltum in it has been evaporated which will occur in a few minutes.

The pitch or asphaltum shall be broken into pieces, the size of an egg and shall be gradually added to the mixture and stirred until the asphaltum is dissolved in the tar.

The heated oil shall then be added and well stirred into the mixture and heated until the temperature is sufficiently high.

43. (a) Testing will be done in the presence of a qualified officer of the department.

(b) Test pump and other tools required for the testing will be supplied by the department free of charge.

(c) Compensation charges for water required for testing, when tested will be paid for at the rates specified in the schedule noted below, with the permission of the Executive Engineer, when the distance to be covered exceeds half a mile. When the distance is half a mile and below water will be conveyed by the contractor at his own cost.

* Compensation charge per 100 gallons above cost of water:—

	Rs.	A.	P.
1 to 1 mile	0 4 0
1 to 2 mile	0 6 0
2 to 3 mile	0 7 0
3 to 4 mile	0 8 0
4 to 5 mile	0 10 0

Add 1000 ft. for every 1/2 mile over 5 miles.

VACANCIES.

WANTED an Assistant Foreman Engineer for
Cable Factory, Aruvakkudi, with good electrical
and mechanical experience, capable of holding
charge of a hydro-electric power station when
required.

2. Salary Rs. 375-12-435 per annum rising
by further increments to Rs. 480 in the tenth year
of service (five quarters and two months attendance
years) guaranteed in the first instance with pro-
portion of being continued if found suitable. Appoint-
ment non-permanent. Benefits of Indian Civil Service
Department Provident Fund in lieu.

3. Applications giving particulars regarding
(1) full name, (2) date of birth, (3) qualifications and
previous experience, (4) nationality, (5) present
employment, if any, with the pay and (6) past
appointments held and reasons for their termina-
tion, together with copies of testimonials, should
be sent to the following address before the 20th
February 1927:-

Superintendent, Cable Factory,
Aruvakkudi (Sikkim).

4. Applicants must satisfy the following
conditions:-

(a) Must have served a period of practical
training with electrical engineering firm of system
specializing in manufacture of electric machinery
and must be capable of taking charge of winding
department.

(b) Must have received good technical educa-
tion.

(c) Must have sound electrical experience in
three phase high and low tension working,
particularly with power station or sub-station
equipment and also a good general electrical and
mechanical training in erection, maintenance and
plant repairs.

A. UDOCHART, District-Officer,
Superintendent.

Cable Factory, Aruvakkudi,
20th February 1927

Applicants are invited from duly qualified candidates for the post of a Probationary Revenue Inspector, vacant in the district. The applications should be in the form appended below and should reach this office on or before 15th March 1927—

- (1) Name; (2) Father's name; (3) Date; (4) Age; (5) Educational qualifications; (6) Service; (7) Station/wards; (8) Residence in service; (9) Address and (10) Remarks.

F. C. DUTT,
Collector.

Trichinopoly Collector's Office,
16th February 1927.

Wanted a Mechanical Draughtsman with sound knowledge and good experience in Mechanical Drawing. Pay Rs. 100—120—150. Applications stating qualifications and with copies of testimonials should reach the undersigned by 6th March 1927. Only experienced men need apply.

L. IRISHAW,
Executive Engineer, Pudukottai & Madhavari Districts,
Quarry & Water Project,
Madhavari Project P.O., 16th February 1927.

PRIVATE ADVERTISEMENTS.

On or after 1st March 1927 I intend moving the High Court to contest me as a Vakil thereof.

S. RAMANATHAN.

The Standard Barometer and Thermometer are read at 5 a.m., 10 a.m., 4 p.m. and 8 p.m. and the daily means are obtained by the application of hourly corrections, obtained from twenty years' observations. The station of the Barometer is twenty-two feet above the level of the sea, and the records of the Rain Gauge is two feet from the ground. The wind, rain and general weather

registered are for the current civil day—from midnight to midnight.

The total quantity of rain collected since 1st January is 7.10 ins., the average due for the same period being 7.16 ins.

Madras, 21st February 1927.

ABSTRACT of the MEAN METEOROLOGICAL CONDITIONS of MADRAS in January 1927 compared with the average of past years.

SUPPLEMENT TO PART II
OF
THE FORT ST. GEORGE GAZETTE.

No. 8.] MADRAS, TUESDAY EVENING, FEBRUARY 25, 1927. [PART, 2 of 2 p.

REVIEW OF THE SEASON AND CROPS OF THE MADRAS
PRESIDENCY IN FASLI 1335 (1925-26)

SECTION I—SEASON.

The South-West monsoon commenced on the West Coast about the end of May, earlier than usual and gave heavy and continuous rainfall till the end of August, with breaks from the 8th to the 18th of June and the 3rd to the 9th July. These breaks retarded agricultural operations in South Kanara to some extent. There were heavy floods in July in all the rivers in south Kanara. The damage done by them to crops was not, however, so great as in the previous two years. Government gave timely relief to the distressed people for the redemption of their bonds by granting loans to the extent of Rs. 15,000 at the concessional rate of 4 per cent interest. The monsoon commenced in time in the Circars and gave good and fairly well distributed rainfall till the end of August, when it slackened. There were breaks from the 4th to the 16th June and the 5th June to the 10th July. Freshes came down the rivers copiously from July and there were abnormal floods in the Cehar and Budameru in the Kistna district. There was some loss owing to submersion in the low-lying parts of the Sarnaidih taluk of Vizagapatnam, the Patapuram Division of East Godavari, the taluks of Bhimavaram and Narapur of West Godavari, and the taluks of Beranda, Kaikalar, Godirada, and Bandar of Kistna. The monsoon was weak in Salem and the South; water-supplies were received in the main rivers, only about the end of June. In the Deccan, Caudat, and Central districts (Salem excepted), the monsoon was late by a fortnight. There were slight showers on the 10th and 15th June but there was little or no rainfall afterwards for a month. The monsoon strengthened in the middle of July and, with short breaks at intervals, gave fairly good rains till the 29th August. These rains gave partial supplies to tanks in North Arcot and parts of the Deccan and the Carnatic. The rainfall in September was seriously in defect, as there was a long break till the 17th September except in Chingleput and South Arcot. The rainfall in the South-West monsoon period was up to or above the average in the Circars, Cuddapah, Nellore, Chingleput, and Coimbatore, and on the West Coast; it was, however, less than in the previous year except in the Circars. The rainfall in Karaul, Bellary, and South Arcot was timely though it was below the average.

Water-supply was good in the Circars and on the West Coast but was inadequate in Bellary and Anantapur and in parts of the Central and Southern districts, except.

especially in Coimbatore, where the supply of water in garden wells in several places was low owing to inadequate rainfall in previous years.

Sowings. Sowings of early crops were generally satisfactory, especially in the Deccan and the Carnatic, as ryots eagerly availed themselves of the rains that fell, even though they were inadequate in parts. Sowings of dry crops were restricted in the South. The total area of dry crops sown during this period was generally less than in the previous year except in the Carnatic, but sowings of wet crops were greater than in the previous year except on the West Coast.

Standing crops. Early crops in parts of Godavari (East and West) and Kistna were slightly affected by the heavy rains of August while dry crops in parts of Salem, Coimbatore, Trichicopoly, and Madras suffered from drought. Dry crops in parts of Amavapur were affected by grasshoppers, but the lands were mostly rescued and the damage was slight. Dry crops in parts of the taluka of Harpasehalli and Hadagalli of Bellary were slightly damaged by grasshoppers.

Yield. Early crops gave fairly good yields, especially in the Circars.

Character of the monsoon. On the whole, the South-West monsoon was fairly favourable except in North Arcot, Salem, and parts of Coimbatore and Madras.

North-East monsoon—Rain-fall. 2. The North-East monsoon commenced in time at the beginning of October and gave heavy rains in the Carnatic and Tanjore till the end of December with occasional breaks. Heavy rains were also received in the first half of October in the Circars, Deccan, Chittoor, and North Arcot, and on the West Coast. The monsoon slackened thereafter in the Circars (Guntur excepted) but good rains continued to be received at intervals up to the end of November in most of the other districts, viz., in the Deccan (about the middle and end of November), Chittoor and North Arcot (second week of November), Coimbatore and the South (two months from the 22nd October), and on the West Coast (second fortnight of October and the second week of November). Heavy floods were received in the Tanjore district; many tanks and channels breached and numerous fields under crop were silted up especially in the Srirangapatnam taluk of Tinnevely. On the 10th and 11th November, a violent cyclone swept over the coast of Malabar from Bolegum to Cannanore and inland for a distance of about 20 miles, resulting in loss of life and damage to a number of fishing boats, thatched houses, and coconut and plain trees in the taluks of Kottayam, Kumbakonam, and Calicut. Excessive rains were received in the first half of December all over the Presidency except in the Circars, and they filled most of the irrigation sources. There were floods in the Vengal; some of the channels in the Udumalpet taluk of Coimbatore breached on the 11th December and caused damage to crops. The excessive rainfall assisted in the growth of weeds, increased cost of sowing and cultivation of late crops, affected the condition of crops in various stages of growth, interfered with harvests, and caused an increase in some of the more important insect pests; seedlings of karuppanni cotton in the South were damaged in parts and fields had to be rescued. The rainfall in the North-East monsoon period was up to or above the average in all districts except Salem. It was also more than in the previous year in most districts.

Water-supply. Water-supply was generally sufficient except in parts of Bellary, Amavapur, the Central districts, and the non-Tanjur area of Madras.

Sowings. Sowings of late crops were satisfactory in the Circars and the South, but restricted in the Carnatic owing to excessive rainfall and in the Deccan and Central districts owing to the sowings having been pushed through earlier in the season. Sowings of dry crops were greater than in the previous year except in the Carnatic while sowings of wet crops were almost the same.

Standing crops. Crops in parts of Salem and Bellary suffered from drought.

Yield. The yield of the main paddy crop in the Circars was good. The yield of masoori or early cotton in the Deccan was reduced both in quality and quantity. Heavy rains interfered with the harvest of groundnut.

Character of the monsoon. On the whole, the North-East monsoon was fairly favourable in most districts.

3. There was a revival of monsoonic conditions in the last week of January, especially in South Arcot, Tanjore, and the Nilgiris where more than 6 inches were received. The heavy rains in South Arcot and Tanjore fell just when the major perils of the paddy crop was ready for harvest and therefore reduced the yield to some extent. Load slips on the Nilgiri Mountain Railway and on the New Ghat Road from Mettupalayam to Ootacamund impeded the transport of food-grains to the hills for a time. Cotton crops in the Deccan were affected by cloudy weather in January. There were local rains in the second week of March except in the Deccan and on the West Coast. They were harmful to the Coorgs cotton under harvest but beneficial to the late pluggelly crop. There were fair showers between the 6th and the 12th April and the 26th and the 28th April. There were adequate showers in May only in Gōdāvari (East and West) and in parts of the Deccan and the South. The hot weather showers were less than in the previous year except in Ramnad and Tinnevely.

Rainfall later in the season.

4. The total rainfall in the year was up to or above the average in all districts except Bellary, Salem, and Trichinopoly. It was appreciably less than in the previous year in the plains portion of Vangapattam and East Gōdāvari, in Bellary, and on the West Coast and Hills.

Total rainfall in the year.

The year was generally favourable to agriculture. The Circars, Chingleput, and Chittoor experienced a good season. In Nellore and the Deccan, the season was not so good as in the previous year, but it was better than in 1925-26 and 1923-24. The season was better than in the previous two years in North Arcot and Madras, and on the West Coast. The other districts, however, were severely affected to a more or less extent, Coimbatore and Tanjore suffering most and Salem and Trichinopoly coming next. In Salem, the year was, however, better than in 1918-19 and 1923-24.

Character of the season.

5. Owing to the inadequate rainfall during the South-West monsoon, the season was not satisfactory in parts of Coimbatore. The early crops raised on unirrigated lands in parts of the Kangayam division of the Dharwad taluk withered. Agricultural operations were somewhat restricted and there was some unemployment in consequence. Three fairs last works were, therefore, opened on the 1st December 1926, but the attendance was not large owing to the receipt of heavy rains between the 4th and the 12th December. The works were, therefore, closed on the 15th December.

Relief work.

6. Seasonal remissions on a large scale were granted on account of inadequate rainfall and scanty supplies in irrigation sources in Anantapur (Rs. 1,28,031—mainly Hindupur and Madakurra), North Arcot (Rs. 62,198), and Salem (Rs. 1,33,760). Remissions on account of inundation and loss of crop were granted mainly in West Gōdāvari and Kistna. As the season was fairly favourable in Bellary, there was no need for suspension or remission of dry seasonwork. The postponed revenue of fairs 1333 and 1343 in the taluks of Alur and Bellary and of fairs 1383 in the Rayadurg taluk was collected in the year. The recruitment increase of fairs 1334 was collected except in Rayadurg taluk where it was remitted in view of the comparatively unfavourable season during the previous three fairs. The collection of loan instalments was postponed in the taluks of Alur, Bellary, and Rayadurg.

Remission.

SECTION II—CLASSIFICATION OF AREA.

8. The area of the Madras Presidency in 1925-26 was 91,705,413 acres according to traverse survey, but owing mainly to the unsurveyed zamindari in Kistna and Ramnad, details were available only for 90,693,413 acres. The taluks of West Gōdāvari were reconstituted with effect from the 4th January 1926. The area accounted for represented an increase of 100,553 acres over the figures for the previous year, due mainly to the adoption of revised areas in West Gōdāvari, Coimbatore, Trichinopoly, and Ramnad. Forests constituted 14.5 per cent of the total area and barren and uncultivable lands 23.3 per cent. Of the area available for cultivation, 21.9 per cent was waste and 18 per cent was fallow.

General.

Forests.

Forests exceeded 50 per cent of the total area in Kurnool, Giddipah, Coimbatore, and the Nilgiris. The proportion was less than 5 per cent in Tanjore and Ramnad. As compared with the previous year, there were increases in area mainly in Kistna due to revised classification, in Salem due to afforestation, and in Coimbatore due to the adoption of Survey of India figures for a reserved forest. This was partly set off by reductions in area mainly in Vengalparam, West Godavari, Gunthar, Kurnool, North Arcot, and Tanjore due to disafforestation.

Not available for cultivation.

Barren and uncultivable lands exceeded 40 per cent of the total area in Ganjam, Vengalparam, and East Godavari. The proportion was less than 10 per cent in Kurnool, Bellary, Anantapur, and Coimbatore. The reduction of 391,742 acres in the year under review was the net result of increases in Ganjam, Kistna, Kurnool, Coimbatore, Trichinopoly, and Ramnad and of reductions in the other districts, especially in Malabar, Nellore, Salem, South Kanara, Anantapur, West Godavari, and Giddipah. The variations were mainly due to revised classification.

Cultivable waste other than fallows.

Cultivable waste other than fallows exceeded 20 per cent of the total area in Vengalparam, Anantapur, and Chittoor, and on the West Coast. It was only 5 per cent in Coimbatore and 1 per cent in Tinnevely. This area included an extent of 688,153 acres of babul trees, casuarinas, hatching grass, etc., against 702,664 acres in the previous year. Babul trees, etc., are mainly grown in Ganjam, Vengalparam, and the Carnatic. The area in Giddipah and Tinnevely fell from 35,828 acres to 14,400 acres. Excluding the area under babul trees, etc., the area under cultivable waste other than fallows was 11,603,539 acres against 11,563,127 acres in the previous year. There was an increase in area mainly in Giddipah, Nellore, Trichinopoly, and Malabar and a reduction in area in most of the other districts, especially in East Godavari, Kistna, Anantapur, and Coimbatore. The variations were due to revised classification.

Current fallows.

The area under current fallows exceeded 20 per cent of the total area in West Godavari, Trichinopoly, and Tinnevely. It was only 2 per cent in Malabar. The increase of 75,145 acres was the net result of increases mainly in the Circars (East Godavari excepted), Kurnool, Anantapur, Nellore, Salem, and Ramnad and of reductions in most of the other districts, especially in East Godavari, Bellary, Chittoor, North Arcot, Tanjore, and Tinnevely.

Net area cropped.

The net area under cultivation in 1925-26 represented 37.4 per cent of the total area against 36.8 per cent in the previous year. The proportion exceeded 50 per cent in West Godavari, Kistna, Gunthar, Bellary (65 per cent), South Arcot, Tanjore, and Ramnad; it was less than 25 per cent in Vengalparam, East Godavari, Chittoor, South Kanara, and the Nilgiris (22 per cent). In the other districts, the proportion of the cultivated area to the total area did not differ much from the average for the Presidency.

SECTION III.—IRRIGATION.**Area irrigated from different sources—General.**

9. The extent of land irrigated increased from 9,113,514 acres to 9,242,945 acres owing to fairly good supplies in the irrigation canals in many districts but it was less than the figure in 1922-23 by more than 250,000 acres. Tanjore contributed about a million acres and Ganjam (721,007 acres), Vengalparam (702,813), Giddipah (East and West), Kistna, Chingleput, and South Arcot, more than half a million acres each. The increase of 134,433 acres was the net result of increases in Vengalparam (+254,087 acres), Giddipah (East and West), Giddipah, Chingleput, South Arcot, Chittoor, North Arcot, Tanjore, and Madras and of reductions in the other districts, especially in Ganjam, Anantapur, Nellore, and Coimbatore.

Percentage of area irrigated to net area sown.

The area irrigated in the year from different sources was 27 per cent of the net area sown as in the previous year, against 18 per cent in 1923-24 and 29 per cent in 1921-22 and 1925-26. The proportion exceeded 40 per cent in Ganjam and Chingleput (54 per cent) and in the Bellary districts of East Godavari, West Godavari (77 per cent), Kistna, and Tanjore (74 per cent); it was 14 per cent in Salem and below 10 per cent in Kurnool, Bellary (2 per cent), and Anantapur. There is no need for artificial irrigation on the West Coast and the Hills owing to the heavy rainfall.

The table below gives comparative figures of the area under each source of irrigation, the relative importance of each source, and the districts in which each source is important.

Area under each source of irrigation.

Source of Irrigation.	Area of land irrigated by the source in		Proportion to the total irrigated area of the region in		Districts in which the source is important and the percentage of area irrigated by it in the total irrigated area of the district
	1914-15.	1915-16.	Colours (1)	Colours (2)	
(1)	(2)	(3)	(4)	(5)	(6)
Government canals ..	1,500,000 OF 4,500	1,500,000 OF 4,500	81.7	81.7	Delhate districts—21 per cent in East Godavari and more than 50 per cent in West Godavari, Kistna, and Tanjore.
Private canals ..	547	547	87	87	Canjara (18 per cent) and Vengalpur (2 per cent).
Total canals ..	1,547	1,547	81.7	81.7	
Tanks ..	1,200	1,200	80.0	80.0	Chingleput (67 per cent), more than 50 per cent in Chittoor, Madras, and Tanjore; more than 50 per cent in the area in North Arcot and Tanjore; more than 50 per cent in Chittoor, Vengalpur, Kistna, and Tanjore.
Wells ..	1,000	1,000	80.0	80.0	Chittoor (22 per cent), Salem (18 per cent), more than 40 per cent in Chittoor and Tanjore.
Other sources, i.e., spring, streams, etc.	400	400	5.3	5.3	Chittoor (18 per cent) and Vengalpur (22 per cent).
Grand total ..	3,147	3,147	100	100	

Note.—Canals, tanks, and wells are about equally important in Chingleput and Tanjore.

- (1) Greater than in the previous year.
- (2) Highest reported in 1915-16 (2000-25 completed).
- (3) Less than in the year 1915-16 to 1925-26.
- (4) Lowest reported since 1915-16; less than the figure in 1915-16 by more than 50,000 acres.
- (5) Highest reported since 1915-16 (1915-16 complete).

There was a slight reduction in the area irrigated by Government canals in the delta districts of East Godavari, Kistna, and Tanjore; there was an increase in area in most of the other districts, especially in the Canjara.

Variations under each source: (a) Government canals. (b) Private canals.

The area irrigated by private canals in Nellore and Salem fell from 5,539 acres to 2,769 acres but this was partly made up by an increase in area in the other districts.

There was a reduction in the area irrigated by tanks in Canjara (— 42,510 acres), Bellary, Anantapur (— 19,391 acres), Nellore (— 24,711 acres), South Arcot, Salem, Trichinopoly, and the South which was more than made up by increases in area in the other districts, especially in West Godavari, Chittoor, and North Arcot. The area in Canjara and Nellore was the lowest reported since 1915-16.

There was an increase in the area irrigated by wells in Vengalpur, Anantapur, Chingleput, South Arcot, and Madras and a reduction in area in most of the other districts, especially in Nellore (— 41,713 acres) and Chittoor (— 23,419 acres). The reduction in Nellore was due to less need for well irrigation owing to the good rainfall of the North-East monsoon. In Chittoor, the supply of water in the wells was low owing to the unfavourable season.

There was an increase of 115,572 acres in Vengalpur and 21,850 acres in East Godavari in the area irrigated by other sources.

14. Counting separately areas cropped and irrigated more than once in the year, the area of crops irrigated amounted to 11,216,845 acres in 1925-26 or 51,624 acres more than in the previous year, of which about 90 per cent was under cereals and pulses against 89 per cent in the previous two years. The increase in area was due to the fact that more water was available for second crop cultivation as the North-East monsoon was more favourable than in the previous year. The area of crops irrigated was 29 per cent of the area sown as in the previous year. The proportion exceeded 40 per cent in Canjara, Nellore, and Chingleput (69 per cent), and in the delta districts of East Godavari, West Godavari (67 per cent), Kistna, and

(c) Other sources. Crops irrigated—Cereals.

Tanjore (75 per cent); it was below 10 per cent in Guntur, Karnool (5 per cent) Bellary (3 per cent), Anantapur, and Salem. As compared with the previous year, there was a reduction in area in Ganjam (- 22,018 acres), Guntur, Karnool, Bellary, Anantapur (- 46,035), Salem, Coimbatore, Trichinopoly, and Ramanad. This was more than counterbalanced by an increase in area in the other districts, especially in Visnupatnam (+114,943 acres), Chingleput (+102,907), North Arcot (+64,194), and Tanjore (+60,602). The table below shows the percentage of the irrigated area to the total area in the case of important crops—

Crop.	Normal area irrigated.	Area irrigated in		Percentage of the irrigated area to the total area under the crop in		Districts where the irrigated crop is important.
		1935-36.	1934-35.	1935-36.	1934-35.	
(1)	(2)	(3)	(4)	(5)	(6)	(7)
Paperum	2,000,000	1,000,000	1,000,000	50	50	Irrigated mostly in the West Coast.
Paddy	8,161	10,000	7,773	77	79	Mostly irrigated abroad in the special prices of Ganjam, Visnupatnam, and East Godavari, in the West Coast, and in parts of Ganjam, Chingleput, South Arcot, Tanjore, and Ramanad.
Ragi	1,700	1,000	1,000	59	59	Ganjam, Visnupatnam, Anantapur, Chingleput, the Central, Coimbatore, North Arcot, Coimbatore, Madras, and Ramanad.
Reddy (a)	—	—	—	—	—	Chingleput, Madras (10 per cent), Chingleput, and Salem.
Chingleput (b) ..	—	—	—	—	—	Ganjam, Visnupatnam (25 per cent), Madras (10 per cent), and Chingleput.
Cholan	100	100	100	10	10	Anantapur, Salem, Coimbatore (25 per cent), and the North.
Coimbatore	100	100	100	10	10	Chingleput, Madras (25 per cent), Salem, Coimbatore, and Trichinopoly.
Coimbatore (c) ..	100	100	100	10	10	Salem, Coimbatore (25 per cent), Trichinopoly, Madras, and Salem.
Coimbatore (d) ..	—	—	—	—	—	Chingleput, South Arcot (25 per cent), and Chingleput.
Other crops	—	—	—	—	—	—

(a) Highest reported since 1913-14.

(b) Lowest reported since 1913-14.

(c) Normal only on wet land other paddy.

(d) Lowest reported (1913-14) excepted.

(e) Area less than in the previous year.

(f) Highest reported since 1913-14.

(g) Lowest reported since 1913-14.

(h) Nearly constant area.

(i) Area less than in the previous year.

(j) Nearly constant area.

(k) Highest reported (1913-14) excepted.

The case of each main crop is discussed below.

Irrigated paddy.

Sowings of irrigated paddy were restricted in Ganjam but satisfactory in the rest of the Coasts (especially Visnupatnam), Cuddapah, the Carnatis (especially Nellore), Tanjore, and Tinnevely. Sowings were restricted in the rest of the Deccan, the Central districts (especially Salem), Madras, and Ramanad though the area was appreciably greater than in the previous year in North Arcot.

Irrigated ragi.

Sowings of irrigated ragi were very much restricted in Cuddapah, Coimbatore, and Trichinopoly where the area was the lowest reported. The area was less than in the previous year in most districts, especially in Visnupatnam, Anantapur, Cuddapah, and Nellore.

Irrigated cholam.

Sowings of irrigated cholam were much restricted in Nellore and Coimbatore. The area was the lowest reported in Coimbatore.

Irrigated eumbu.

The area under irrigated eumbu was much less than in the previous year in Nellore.

Irrigated gingelly.

There was a reduction in the area under irrigated gingelly in Ganjam, Visnupatnam, and East Godavari, partly set off by an increase in area in West Godavari.

Irrigated groundnut.

There was a reduction in the area under irrigated groundnut in Ganjam, Karnool, and North Arcot which was more than counterbalanced by an increase in area in most of the other districts.

Irrigated cotton.

In Salem, irrigated cotton partly replaced paddy for which there was not sufficient supply of water; the area was the highest reported. The area was normal in Coimbatore though much less than in the previous year. The area was above the normal in Trichinopoly and Madras but less than in the previous year. Sowings were restricted in Ramanad.

The area under irrigated indigo was much greater than in the previous year in Cuddapah and Nellore.

11. The table below compares the number of irrigation sources in use in 1920-21 and 1925-26:—

Irrigation sources.		* Number in actual use.		Remarks.
		1920-21.	1925-26.	
Tanks with systems under 10 acres.	Government.	4,325	8,450	The increase was mainly in Ramnad where the number rose from 9 to 1,181.
	Private ..	5,548	2,151	
Tanks with systems not exceeding 100 acres.	Government.	10,317	14,114	There were 20 tanks in Ramnad, while there was none in 1920-21.
	Private ..	1,413	5,685	
Total ..		15,634	19,764	
Canals	Government.	14,756	10,440	The decrease occurred in Andhra Pradesh and Coimbatore.
	Private ..	1,370	1,843	
Wells	Government.	5,426	4,619	In Travancore, the number fell from 1,179 to 71.
	Private ..	124,742	442,404	

The increase in the number of wells in use in the Central districts, Madhara, and Ramnad from 365,552 to 418,241 shows that ryots realized the necessity of protecting the crops from the partial failures of successive seasons. Government helped them by giving advances. The number of wells fell from 84,706 to 79,145 in South Arcot and from 30,613 to 27,545 in Tinnevely. The average area irrigated by a well varied from 15 acres in Vinayagadam to 3 in Nellore, 4 acres in Coimbatore, and a little more than half an acre in Chingleput and North Arcot. The number of oil engines in working order rose from 265 to 314. The number fell from 85 to 14 in Cuddapah and from 17 to nil in Tanjore, while it rose from 69 to 137 in South Arcot, 11 to 31 in North Arcot, nil to 14 in East Godavari, and 64 to 76 in Coimbatore.

SECTION IV—AREA SOWN WITH CROPS.

12. The total area cropped and the net area cropped were the highest since 1917-18. The area in the Circars has been increasing gradually since 1920-21 and was the highest on record in the year under review.

The increase in area was mainly under non-food crops, the area under which was the highest recorded, exceeding the area in 1917-18 by more than a million acres or 14 per cent. The area of non-food crops, especially groundnut and cotton, has been steadily increasing since 1921-22 at the expense of food crops as shown below:—

Figure of area in the units of acres, (1/4 = 1000 aulakhs).

Particulars.	1921-22.	1922-23.	1923-24.	1924-25.	1925-26.	Percent.
Area under food crops	27,128	25,036	18,762	17,318	18,074	21,114
Area under non-food crops	8,691	1,131	1,627	1,774	2,514	1,174
Percentage of the area under food crops (a) ..	47	39	50	57	57	47

(a) The percentage is to the total area under crops.

The area of food crops was lower than in previous years with the exception of 1918-19, 1923-24, and 1924-25. It was less than the area in 1919-20 by about 2½ million acres. The relation of the area between food crops and non-food crops is important and the growing tendency to reduce the area under food crops in districts liable to scarcity is of grave economic significance.

Irrigated indigo.

(4) Lowest: important,

Important variations for each crop are explained in the next paragraph.

13. About two-third of the total area under paddy was in the Circars, the Paddy. Carnatic, and Tanjore. The area was much below the normal in Karaul, Bellary, Anantapur, Salem, Trichinopoly, and Madurai due to late rains and insufficient supplies in irrigation canals for the main crop. In Salem and Trichinopoly, the area was the lowest reported, the figure for Salem being less than half of the normal. The area was slightly below the normal in South Arcot, North Arcot, Coimbatore, Tanjore, Ramnad, and South Kanara. There was an increase in area in the other districts, especially in Nellore owing to timely rains and sufficient irrigation supplies in rivers and tanks. In the Circars and Nellore, the area was greater than in the previous five years. In Tinnevely and Malabar, the area was the highest reported. In most of the districts, a large area was put under second crop as the irrigation sources received good supplies owing to the heavy rains received in December and January. As compared with the previous year, there was an appreciable reduction in area only in Anantapur and Salem; there was an increase in area in most of the other districts, especially in Coimbatore, Nellore, Chingleput, and North Arcot.

About six-seventh of the total area under cholam was in Kistna, Guntur, the Cholam. Decan, Nellore, Salem, Coimbatore, Trichinopoly, and Madurai. As compared with the normal, there was an increase in area in Nellore and Salem and a reduction in area in the other important districts, especially in the Decan and Coimbatore as the crop was partly replaced by groundnut and cotton. Insufficient and ill-distributed rainfall for sowing or early cholam was another cause for the reduction of more than 500,000 acres in Karaul and Bellary. In Karaul and Coimbatore, the area was the lowest reported since 1915-16. In Nellore, Chittoor, and North Arcot, the reduction in area under irrigated cholam was more than made up by an increase in area under unirrigated cholam. In Coimbatore and Trichinopoly, the reduction in area was greater under irrigated cholam than under unirrigated cholam. In Madurai, the reduction in area was under unirrigated cholam. As compared with the previous year, there was a slight increase in area only in Kistna, Bellary, Nellore, and Trichinopoly; there was a reduction in area in the other important districts, especially in the Decan (Bellary excepted) and Madurai.

More than three-fourth of the total area under combs was in Vengalpetam, Combs. Guntur, Anantapur, the Central districts, Ramnad, and Tinnevely. As compared with the normal, there was a slight increase in area in Vengalpetam, West Godavari, Chingleput, Chittoor, Salem, and Coimbatore. In Bellary and Anantapur, there was an increase in area owing to good early rains in May. In Madurai, there was an increase in area owing to good rains in November for unirrigated combs; the area was the highest reported since 1915-16. There was a reduction in area in the other districts, especially under unirrigated combs in South Arcot, North Arcot, and Ramnad. The crop was partly replaced by groundnut in South Arcot and North Arcot and by cotton in Ramnad. As compared with the previous year, there was an appreciable reduction in area in Nellore and North Arcot and a smaller reduction in Vengalpetam, East Godavari, Guntur, Karaul, Coimbatore, Chittoor, and Salem; there was an increase in area in the other districts, especially in Bellary, Madurai, and Tinnevely.

Three-fourth of the total area under ragi was in Ganjam, Vengalpetam, South Ragi. Arcot, the Central districts, and Ramnad. As compared with the normal, there was a slight increase in area only in Vengalpetam, Chingleput, South Arcot, Chittoor, and Tanjore and a reduction in area in the other districts, especially in Ganjam, Coimbatore, and Trichinopoly where the area was the lowest reported since 1915-16. In Ganjam, the area under irrigated ragi showed an increase owing to the availability of water in irrigation canals in the second-crop season, but the area under unirrigated ragi was reduced owing to extensive rains for the summer and monsoon crops. In Coimbatore and Trichinopoly, the reduction in area was under irrigated ragi. The area was less than in the previous year except in Vengalpetam, Bellary, Chingleput, Chittoor, Salem, Coimbatore, and the South.

Korra is mainly grown in Guntur and the Decan. The area was below the normal in the Circars; in Ganjam, the area was only one-fifth of the normal. In Bellary, owing to inadequate rains in June and July for the pure crop, the area was less than in the previous year by more than 110,000 acres, though only slightly below the

normal. There was an appreciable increase in area in the rest of the Decan owing to the cultivation of poor lands as a result of good rains in August for the mixed crop (kura and cotton mixture); in Anantapur and Cuddapah, the area was the highest reported. In South Arcot, the crop was partly replaced by maize. There was an increase in area in most of the other districts.

Vasaga. About three-fourth of the total area under vasaga was in Kurnool, Nellore, South Arcot, North Arcot, Salem, Trichinopoly, Tanjore, and Ramnad. As compared with the normal, there was an increase in area in Cuddapah and Nellore, partly counterbalanced by a reduction in area in Madura where it was the lowest reported owing to the unfavourable South-West monsoon. The area was appreciably greater than in the previous year in Kurnool, Cuddapah, Chingleput, and Chittoor.

Sama. More than five-sevenths of the total area under sama was in Vinayapattam, Anantapur, Salem, Coimbatore, and Madura. In Anantapur, the area was the highest reported while, in Tanjavur, it was the lowest reported owing to excessive rains in November and December. The area was appreciably below the normal in Coimbatore and Madura though it was much greater than in the previous year in Madura.

Maize. Maize is mainly grown in Vinayapattam, Kistna, and Guntur (45 per cent). In Guntur, the area fell from 19,204 acres in 1924-25 to 7,978 acres in 1925-26 and 2,813 acres in 1926-27 (normal 19,030 acres). As compared with the normal, there was a reduction in area in Vinayapattam and on a yarrowse in most of the other districts, especially in Guntur where the area was the highest reported since 1916-17. Of the less important districts which showed a large proportional increase in the previous year, Nellore, Salem, and Ramnad did not maintain their positions but Trichinopoly and Madura improved their positions.

Other Cereals. More than five-sixths of the area in the Presidency under other cereals was in Vinayapattam, Guntur, Madura, Ramnad, and Tanjavur. As in the previous year, there was a slight reduction in the area under common millet in Guntur owing to heavy rains in the sowing season and maize was raised in its place in parts. There was a large reduction in the area under other cereals in Kurnool. Wheat and barley are very minor cereals in the Presidency. The area under wheat grown mainly in Bellary (37 per cent), Kurnool, Anantapur, Vinayapattam, the Nilgiris, and Guntur was the highest reported (1925-26 excepted). The area under barley grown mainly in the Nilgiris (19 per cent) was the highest reported.

Cereals. The area under cereals in the Circars and on the West Coast was normal. There was a reduction in area mainly in Kurnool, Bellary, South Arcot, Salem, Coimbatore, Trichinopoly, and Madura, partly counterbalanced by increases mainly in Nellore and Chingleput. Cereals occupied 66 per cent of the total area against 67 per cent in the previous year.

Pulses. About three-fourth of the area under pulses was in the Circars, Decan, Salem, and Coimbatore. The area was appreciably below the normal for redgram and bengalgram in Kurnool, greengram and horsegram in Nellore, blackgram in Salem, and blackgram and horsegram in Coimbatore. In Tanjavur, the area under horsegram was the lowest reported since 1918-17 and was less than the normal by about 50,000 acres as the season was late by nearly three weeks. In Coimbatore and Tanjavur, the area of blackgram was the lowest reported since 1918-19. There was an appreciable increase in area under horsegram in Chittoor and Madura, greengram and blackgram in East Godavari, and bengalgram in Kistna. The area of greengram in East Godavari was the highest reported. In Guntur, there was a reduction in area under horsegram and redgram, partly counterbalanced by increases under greengram, blackgram, and bengalgram. The increase in the area of horsegram in Bellary was partly set off by a reduction in the area of redgram which was the lowest reported since 1918-19. Blackgram in Ramnad was replaced partly by bengalgram. The area was appreciably less than in the previous year for greengram and horsegram in Guntur, greengram in Tanjore, redgram in Ramnad, and horsegram in Tanjavur. This reduction in area was more than made up by an increase in area under horsegram in Bellary, Anantapur, Coimbatore, and Madura.

Chillies. About two-third of the total area under chillies was in Vinayapattam, East Godavari, Kistna, Guntur (31 per cent), Kurnool, Coimbatore, and Tanjavur. The area was above the normal in Vinayapattam, East Godavari, and Tanjavur and below the

normal in the other important districts. The reduction of more than 20,000 acres in Guntur was due to the spread of groundnut.

The area under cowpeas, grown mainly in Guntur (55 per cent), Trichinopoly, and Tinnevely, increased from 89,146 acres to 105,053 acres but it is still lower than in any year previous to 1924-25. The areas under pepper mainly grown in Malabar and turmeric mainly grown in Ganjam, Vinayapatnam, Guntur, Chittoor, and Malabar were the highest reported. There was a large increase in the area under turmeric in Chittoor. The area under garlic, mainly grown in Vinayapatnam, East Godavari, Coimbatore, and Madras, was the lowest reported. The area under ginger in Malabar increased from 6,112 acres to 9,900 acres. The areas under cardamom in Coimbatore and cinnamon in Malabar were nearly the same as in the previous year.

The area under condiments and spices in Guntur declined gradually from 210,872 acres in 1923-24 to 159,578 acres in the year under review.

More than three-fourth of the total area under sugarcane was in Vinayapatnam (51 per cent), East Godavari, Bellary, South Arcot, Chittoor, Coimbatore and Trichinopoly. As compared with the normal, there was an increase in area in Vinayapatnam, South Arcot, and South Kanara owing to the popularity of the improved varieties introduced by the Agricultural department and to the introduction of improved farceses which do not require the purchase of outside fuel, but work on trash and muggas. In South Kanara, the area rose from 1,552 acres in 1906-07 to 3,721 acres in the year under review. There was a reduction in area in the other districts, due to the insufficient supply of water in the irrigation sources owing to the poor North-East monsoon of the previous year. The reduction was most marked in Anantapur, Chittoor, Salem, and Trichinopoly; in Chittoor, the area was the lowest reported. The area was less than in the previous year in South Arcot, Chittoor, Salem, and Trichinopoly and greater in most of the other districts.

Nearly three-fourth of the total area under other sugar crops was in Anantapur, Tinnevely (44 per cent), and Malabar. The area was normal.

Nearly three-fourth of the total area under mango was in Ganjam, Vinayapatnam (19 per cent), East Godavari, Chittoor, North Arcot, and Malabar (20 per cent). The area was the highest reported. There was a large reduction in area in Ganjam owing to the destruction of trees by the cyclone in November in the previous two years. The area in Malabar was about normal. There was an increase in area in the other important districts.

More than three-fourth of the total area under plantain was in Trichinopoly, the South, and Malabar (39 per cent). The area increased from 147,298 acres to 152,112 acres. As compared with the normal, there was a reduction in area in Ganjam and the Central districts which was made up by an increase in area in Vinayapatnam, East Godavari, and the South.

More than seven-tenth of the area under other fruits and vegetables including root crops was in Ganjam, Vinayapatnam, West Godavari, South Arcot, the South, Malabar (24 per cent), and South Kanara. The area was the highest reported, due mainly to increases in Ganjam, Vinayapatnam, West Godavari, Bannad, and Malabar. There was a large reduction in area in South Arcot. The area under onion was the lowest reported. The area under potato in the Nilgiris was nearly the same as in the previous year.

The Circars, the West Coast, and the South are the main tracts where fruits and vegetables including root crops are raised. There was a large increase in area in the Circars and a smaller increase in the other two tracts.

Malabar, Vinayapatnam, Bannad, and Salem are the main districts where miscellaneous food crops are grown. The area showed large increases in Vinayapatnam, Salem, and Bannad and a slight reduction in Malabar.

As compared with the normal, there was an increase in the area under food crops only in Vinayapatnam, Godavari (East and West), Elkor, Anantapur, Nellore, Chingleput, Chittoor, and Malabar. There was a reduction in area in the other

Other condiments and spices.

Miscellaneous food crops.

Food crops.

districts, especially in Kurnool, Bellary, Salem, Coimbatore, Trichinopoly, Madurai, and Tinnevely. As compared with the previous year, there was a reduction in area in Ganjam, Kistna, Kurnool, Bellary, Coimbatore, Salem, Trichinopoly, and Madurai which was more than made up by an increase in area in the other districts, especially in Chingleput.

Groundnut.

About five-sixths of the total area under groundnut was in the Deccan, South Arcot (18 per cent), and the Central districts. The area was below the normal only in Madurai where the sowing rains were late. The large increase in area in all the other districts was due to timely sowing rains, good foreign demand, and the high prices which prevailed in May and June. The increase of more than 170,000 acres in Kurnool was also partly due to crop rotation, groundnut being rotated with cotton and castor. The area was the highest reported in every one of these districts except Anantapur and Rajahmundry. In Anantapur, the area was however greater than in the previous year by more than 87,000 acres. There was a huge proportional increase in some of the less important districts, e.g., the Carnata (Vijayapattanam excepted), Bellary, Nellore, Chingleput, Chittoor, Tinnevely, and Malabar where the area was nearly three times the normal.

Gingelly.

More than seven-tenths of the total area under gingelly was in Ganjam, Vijayapattanam, Godavari (East and West), Salem, Coimbatore, Trichinopoly, and Tinnevely. About one-fourth of the total area relates to late gingelly mainly in Ganjam, Godavari (East and West), South Arcot, Trichinopoly, Tanjore, Rajahmundry, and Tinnevely. As compared with the normal, there was an increase in area in Ganjam, Godavari (East and West), Nellore, Chingleput, Chittoor, Salem, and Coimbatore owing to the good eleven sowing rains in May. The increase in area in Coimbatore and Tinnevely was under late gingelly. In Tinnevely, late gingelly was raised on the silted up wet lands after reclamation and the area under this crop was greater than in the previous five years. In Kurnool, Bellary, and Anantapur, the area was only about half of the normal owing to want of adequate sowing rains in June and July and groundnut was raised instead. The reduction in area in Vijayapattanam and Kistna was due to the expansion of groundnut. There was a reduction in the area under late gingelly in South Arcot and North Arcot; the area in South Arcot was lower than in the previous six years. The reduction in area in Trichinopoly, Tanjore, and Madurai was due to want of sufficient sowing rains between July and September. As compared with the previous year, there was a reduction in area in Ganjam, Kistna, the Deccan (Coimbatore excepted), South Arcot, North Arcot, Salem, and Trichinopoly which was more than counterbalanced by increases in most of the other districts.

Castor.

More than three-fourth of the total area under castor was in Kistna, Guntur (15 per cent), the Deccan (24 per cent), Nellore (14 per cent), and Salem. Sowings were very satisfactory in Guntur, Kurnool, and Nellore owing to the favourable season. The reduction in area in Bellary was due to the expansion of groundnut. The reduction in Coimbatore, Trichinopoly, and Madurai was due to insufficient sowing rains. The area was above the normal in Kistna but less than in the previous year. Insufficient early rains reduced the area in Anantapur and Coimbatore by more than 25,000 acres though it was still greater than in the previous year. The area in Salem was normal.

Cocnut.

Five-sixths of the total area under cocnut was in Malabar (50 per cent), South Arcot, East Godavari, and Tanjore. There were slight increases in area in these districts except Tanjore. The reduction in area in Ganjam was due to the destruction of trees by the cyclone of November 1925.

Other oil seeds.

More than three-fourth of the total area under other oil seeds was in Ganjam, Vijayapattanam (52 per cent), Bellary, and Anantapur. The area was less than the normal and in the previous year, mainly due to the fact that the area under rape and mustard was the lowest reported. In Ganjam, the area under this crop fell from more than 10,000 acres in previous years to 5,458 acres in 1924-25 and 2,955 acres in 1925-26. The crop was replaced partly by fruits (mango and plantain excepted) and vegetables. The area under linseed in the Presidency increased from 4,420 acres in 1925-26 and was the highest reported since 1912-13.

Oilseeds.

The Central districts, Deccan, South Arcot, Madurai, and Vijayapattanam are the main areas where oilseeds are grown. The area was above the normal and the

previous year in all districts, except Ganjam, Madras, and Bannard. The increase in area was most marked in Gunter, Kuruzol, Bellary, Cuddapah, and North Arcot.

Cotton accounted for 92 per cent of the area under fibre. About nine-tenth of Cotton. the area under cotton was in Gunter, the Deccan, Coimbatore, Madras, Bannard, and Tinnevely. Sowings were restricted in Bannard owing to the lateness of the season. The area was above the normal in most of the other districts. There was a large proportional increase in some of the less important districts, e.g. Godavari (East and West), Chittoor, North Arcot, and Salem, where the area was nearly 2½ times the normal. In Kistna, Bellary, Anantapur, Nellore, Trichinopoly, and Madras, the increase exceeded forty per cent. The area in Bellary was the highest reported. Tinnevely showed no increase of more than 184,000 acres but this is not likely to be more than 40,000 acres as there seems to be some mistake in the figures reported for the Kailpatti taluk; the matter is under investigation. As compared with the previous year, there was an increase in area, mainly in Gunter, Bellary, Anantapur, and Nellore owing to the favourable season. There was a fair increase in area in Trichinopoly. There was a reduction in area in most of the other districts, especially in Kuruzol, Cuddapah, and Coimbatore, partly due to the continued fall in the price of cotton. Other causes were the expansion of groundnut in parts of Kuruzol and Cuddapah and the lateness of the season in Coimbatore. In South Arcot, Chittoor, and North Arcot, the area fell from 18,844 acres to 8,912 acres partly owing to the apprehension that there would be no market for the cotton as a result of the restrictions imposed by the Cotton Transport Act. In Kistna, excessive rains in August slightly reduced the sowings. Tinnevelles accounted for 21 per cent of the area under cotton in the Presidency, namely 15 per cent, upam 6 per cent, radon and bourbon one per cent, northern and western 46 per cent, coconuts 10 per cent, and others one per cent. There was a reduction in area under all the varieties except coconuts. The reduction was most marked under the heavy, yielding irrigated coconuts. The area under cotton seems to increase and decrease alternately in cycles of three years as shown below:—

(Area in thousands of acres, i.e., 100 being omitted.)

Year.	Area.	Year.	Area.	Year.	Area.	Year.	Area.
1916-17 ..	2,568	1918-19 ..	2,339	1920-21 ..	2,568	1922-23 ..	2,568
1917-18 ..	2,500	1919-20 ..	2,532	1921-22 ..	2,532	1923-24 ..	2,532
1918-19 ..	2,332	1920-21 ..	1,768	1921-22 ..	1,768	1922-23 ..	2,568

* The figure reported was 2,862,483 acres but this is reduced by 84,000 acres to allow for the mounds of Cuddapah.

Other fibres consist mainly of sunhemp in Kistna (40 per cent), Gunter (37 Other per cent), East Godavari, and Viragupatnam and binlapatnam jute in Viragupatnam fibres (64 per cent), Gunter (25 per cent), and Kistna. The area under sunhemp rose gradually from 87,747 acres in 1920-21 to 177,570 acres in the year under review. The area in Kistna was the highest reported and was nearly double that of the previous year. The area under binlapatnam jute increased from 48,335 acres to 62,140 acres.

Indigo accounted for 96 per cent of the area under dyes. Five-sixth of the area Dyes. under indigo was in Kistna, Gunter, Cuddapah, Nellore (26 per cent), South Arcot, and Chittoor. The area was above the normal only in Nellore and Chittoor. The area was considerably less than the normal in all the other main districts owing to the very small demand for the dye, on the result of the competition of cheap synthetic dyes. The area was less than one-fourth of the normal in Gunter, one-third of the normal in Kuruzol, and half of the normal in Kistna, Cuddapah, and Chingleput. The area in Kistna and Gunter was the lowest reported. The area was greater than in the previous year in the other districts, especially in Cuddapah, the Cernate, Chittoor, and North Arcot owing to the increasing practice of growing indigo as a green manure crop on wet lands.

Tobacco accounted for about half of the area under drugs and narcotics. Nearly Tobacco. three-fourth of the total area under tobacco was in Viragupatnam (21 per cent), East Godavari, Gunter (29 per cent), Coimbatore, and Madras. Sowings were restricted in Kuruzol as groundnut replaced tobacco in parts. The area was above the normal in most of the other districts, especially in Godavari (East and West), Kistna,

Guntur, Madras, and Rajahmundry. The area was appreciably greater than in the previous year in Coimbatore and Madras and appreciably less in Guntur and Rajahmundry. The area under estate varieties in Guntur was the same as in the previous year.

Other
drugs
and
aromatics.

Other drugs and aromatics consist mainly of the following:—

- (1) Arecanut in Malabar (74 per cent) and South Kanara.
- (2) Coffee in the Nilgiris (45 per cent), Madras, Salem, Malabar, and Coimbatore.
- (3) Tea in the Nilgiris (40 per cent), Coimbatore (36 per cent), and Malabar.
- (4) Betelnut in the Central districts and the South and on the West Coast.
- (5) Opium in Kurnool.
- (6) Sesame in Rayachoti and Tirunelveli (81 per cent).
- (7) Clove in the Nilgiris (78 per cent) and Coimbatore.
- (8) A small area under Indian hemp in Guntur and North Arcot.

The area under arecanut was slightly higher than in the previous three years, but less than in the years 1918-19 to 1921-22. The area under coffee and betelnut was slightly greater than in the previous year. The area under tea and opium was the highest recorded. The area under sesame fell from 7,303 acres to 6,760 acres. The area under cinchona has fallen steadily from 4,115 acres in 1922-23 to 2,543 acres in the year under review.

Drugs
and
aromatics.

Drugs and aromatics were mainly grown in Tirunelveli (13 per cent), Guntur (14 per cent), Coimbatore (11 per cent), and Malabar (19 per cent). The area was above the normal, due mostly to an increase in the Circars.

Fodder
crops.

Ninety-six per cent of the total area under fodder crops was in Tirunelveli, East Godavari, Kistna, Guntur (44 per cent), Rayachoti, and Tirunelveli (21 per cent). The area was above the normal in all the important districts, especially in Tirunelveli where a large area was put under fodder crops to make up for the loss of fodder in the lands cultivated with cotton. The reduction in area as compared with the previous year was mainly in Kistna where the area fell by more than 85,000 acres. The reduction in area in Guntur was almost made up by the increase in area in Tirunelveli and East Godavari.

Miscellaneous
non-food
crops.

The area under miscellaneous non-food crops was slightly less than the normal but greater than in the previous year. The area under rubber, mainly grown in Malabar (91 per cent), was slightly less than in the previous year. The area under flowers fell from 5,310 acres to 4,557 acres.

Non-food
crops.

The area under non-food crops was slightly below the normal in Ganjam and Rayachoti. It was appreciably above the normal in most of the other districts, especially in West Godavari, Kistna, Kurnool, Bellary, Nellore, Chittoor, North Arcot, Salem, and Tirunelveli. The area was slightly less than in the previous year in Ganjam, Kistna, Guntur, Coimbatore, and Rayachoti. It was greater in the other districts, especially in the Deccan, Chittoor, North Arcot, Salem, and Tirunelveli.

Grand
total.

The total area sown with crops was satisfactory owing to the favourable season. It was above the normal in all districts except Ganjam, Kurnool, Salem, Coimbatore, Trichinopoly, Tanjore, Madras, Rayachoti, and South Kanara. The increase in area was most marked in Nellore, Chittoor, and North Arcot and the reduction in area in Coimbatore and Trichinopoly. It was up to or above the area in the previous year in all districts except Ganjam and Rayachoti. The increase in area was marked in Anantapur, Chingleput, and North Arcot.

Area
sown
more
than
once.

The area sown more than once exceeded the normal by 5½ per cent and the area in the previous year by eight per cent. It was greater than the normal and in the previous year in the Circars, Carnatic, North Arcot, Madras, Rayachoti, and South Kanara owing to the favourable North-East monsoon; the increase in area was most marked in Nellore, Rayachoti, Guntur, and Chingleput. It was less than the normal in the Deccan, Chittoor, Trichinopoly, and Malabar though greater than in the previous year. It was less than the normal and in the previous year in Salem, Coimbatore, and Tirunelveli.

Net area
cropped.

The net area cropped represents the area of lands on which crops were raised once, or more than once, in the year. It was greater than the normal and in the

previous year in Vingaspattam, Madhavari (East and West), the Decan (Karnool excepted), Chingleput, South Arcot, Chittoor, North Arcot, Tanjore, and Malabar; the increase in area was most marked in Chittoor and Anantapur where the area was the highest reported since 1917-18. It was greater than the normal but less than in the previous year in Kistna and Nellore. It was less than the normal but slightly greater than in the previous year in Kurnool, Salem, Coimbatore, and Tanjore. It was less than the normal and in the previous year in Ganjam, Trichinopoly, Madras, and Ramnad. The area in Ramnad was the lowest reported since 1916-17. There was a slight reduction in area in Guntur and South Kanara. On the whole, the net area cropped in the Presidency was slightly greater than the normal and in the previous year.

14. Paddy is important in all districts except the Decan, Salem, and Coimbatore; it occupied more than 75 per cent of the total area under crops in Tanjore and South Kanara. Dry cereals are of minor importance in Ganjam, Godavari (East and West), Chingleput, and Tanjore, and in the West Coast. More than 50 per cent was under cereals in Nellore, Chingleput, and Tanjore, while Tanjore had only half the area under cereals. Pulses other than horsegram are important only in Ganjam and Vingaspattam. Non-food crops accounted for more than 25 per cent in Guntur, the Decan, South Arcot, North Arcot, Coimbatore, Ramnad, Tanjore, and Malabar; they occupied less than 10 per cent in Ganjam, Nellore, and South Kanara.

Main crops in each district.

SECTION V.—YIELD OF CROPS.

15. The seasonal factor or condition figure, showing the effect of the season on the new yield of crops is the percentage borne by the seasonal factor as reported by the Collector to the average of the seasonal factors for all the previous years, for which figures are available, commencing with 1902-03. The percentage is modified in some cases to agree with the state of the season and the reports of Agricultural Officers.

Seasonal Factor—General Remarks.

Most of the crops gave fairly satisfactory acre yields. The seasonal factors for the most important crops in the Presidency are given below:—

Presidency seasonal factors.

A—Cereals and Pulses.

Year	Paddy	Cholam	Grain	Pigeon	Kann.	Varga	Samb.	Mann.	Main crops	Pigeon	Grain
1916-17 ..	90	90	90	91	90	90	90	90	90	90	90
1917-18 ..	100	90	90	90	90	90	90	90	90	90	90
1918-19 ..	90	90	90	90	90	90	90	90	90	90	90

B—Other Crops.

Year	Soyabean	Groundnut	Chingleput	Cotton	Cotton	Cotton	Total	Indigo	Tobacco
1916-17 ..	90	90	90	90	90	90	90	90	90
1917-18 ..	90	90	90	90	90	90	90	90	90
1918-19 ..	90	90	90	90	90	90	90	90	90

(a) Highest reported since 1917-18.

(b) Lowest reported (1917-18 and 1918-19 excepted).

(c) Highest reported since 1917-18.

(d) Highest reported (1917-18 excepted).

(e) Highest reported (1917-18 and 1918-19 excepted).

(f) Lowest reported.

(g) Better than in 1918-19 and 1919-20.

The yield per acre of most of the crops was up to or slightly above the normal in the Circars and Decan (cotton in Guntur and Bellary excepted), Nellore (cholam excepted), Chingleput, Chittoor, Madras (cholam, ragi, vanga, and cotton excepted),

District seasonal factors—General.

and Ramnad, and on the West Coast. The yields would have been even higher, but for the excessive rainfall of the North-East monsoon. The yield of cereals and oilseeds in South Arcot and Cereals (cholum and samai excepted) and horewren in Tinnevely was below the normal. The yield of most crops was below the normal in Salem and Trichinopoly, poor in North Arcot and Tanjore, and bad in Coimbatore. Important variations in the seasonal factor for each crop are explained in the next paragraph.

Paddy.

'16. In the Cinnam, Nellore, Chingleput, and Chittoor, the paddy crop was one of the best in recent years. The following causes however operated to reduce the yield to some extent—

(1) In the Cinnam, the crop in low-lying areas was damaged by floods and swamp paddy by heavy rains in October;

(2) paddy nurseries were damaged by grass-hoppers in parts of Kistna and Guntur; and

(3) there was unusually heavy rain at the time of the harvest of the first crop in Nellore.

In Madras, good yields were obtained in spite of heavy rains and floods at the time of the harvest of the main crop. In Kurnool, Cuddapah, and Ramnad, the crop was normal. The yield was below the normal in the other districts but greater than in the previous year in Anantapur, North Arcot, Trichinopoly, Tanjore, and Malabar. In Bellary and Anantapur, untimely rains reduced the yield of the main crop. In North Arcot, excessive rains in December and January reduced the yield. In North Arcot and Coimbatore, the crop suffered from drought in the early stages and too much rain in the latter stages. In Salem and Trichinopoly, the yield was reduced owing to late planting and want of sufficient water during growth; in Trichinopoly, the crop was also affected by stem-borer and silver-sheath pests. In Tanjore, the growing season was favourable but untimely rains in January at the time of harvest reduced the yield of the main crop; other causes for reduction in the yield were the attack of paddy blast (*Pyricularia*) on *Echinochloa crusgalli* grown in an appreciable area and the attack of stem-borer on second crop seeds and Ottandam. It has been discovered that the spores of *Pyricularia* retain their vitality on the straw seven months after the harvest. This indicates how it is carried over from crop to crop. The Agricultural Department is attempting to produce varieties which are resistant to the fungus. In parts of Tinnevely, the crop suffered from floods in the Tambaparni river and the extensive North-East monsoon rains. In Malabar, the crop in the early stages was attacked by the silver-sheath gall fly (*Pachyschelus argus*), due to the early burst of the monsoon, followed by a fairly long spell of dry weather. The yield was however better than in the previous two years. In South Kanara, first crop paddy suffered to some extent from want of sufficient rains at the end of the growing period and the attack of the rice-bug (*Scutellera*) in parts.

Other cereals.

Yields of other cereals were up to or above the normal in the Cinnam, Decatur, Nellore (cholum excepted), Chingleput, Chittoor, and Ramnad; the yields of cholum in Tinnevely and samai in Madras and Tinnevely were also above the normal. The yields of cholum and koma in Guntur, cholum and koma in Chittoor, cholum and samai in Tinnevely, koma in Kurnool, koma and samai in Anantapur, koma and vanga in the Decatur, maize in Vinagapattam, and samai in Madras were the highest reported in any year. In Bellary, where cholum did not grow as well as elsewhere, the yield was higher than in any previous year (1916-17 and 1918-20 excepted). The yield of cholum in Anantapur and ragi in Vinagapattam was the highest reported since 1917-18. In Nellore, cholum suffered from the heavy rains of December and the yield was the lowest reported, with the exception of the bad year, 1918-19. Yields of other cereals were below the normal in South Arcot, the Central districts (Chittoor excepted), and the South (Ramnad excepted). The yields were however almost the same as or better than in the previous year in North Arcot, Trichinopoly, and Tanjore; they were less than in the previous year only for cholum and vanga in South Arcot, cholum, koma, samai, and maize in Salem, koma and ragi in Coimbatore, ragi and vanga in Madras, and koma in Tinnevely. In cholum, cereals suffered from drought. In South Arcot and North Arcot, the yield of cholum was reduced by heavy rains when

the crop was in ears. In Coimbatore, cholera was affected to some extent by green ear bugs (*Callosia argentea*) and mixed cholera suffered from drought. In South Arcot, eumbu was unripe, unhealthy, and stunted owing to heavy and constant rains. In Tanjavely, eumbu suffered from the continued wet weather immediately after sowing and the yield was the lowest reported since 1916-17. In South Arcot, ragi put on vegetative growth and there was less grain and more straw, while in Coimbatore, it suffered from insufficient water-supply. In Madras, late season and heavy rains reduced the yield of ragi which was the lowest on record.

In Kistna and Ganjur, bengalgram was slightly affected by insect pests; the yield was however better than in the previous year in Ganjur. In Bellary, the crop was damaged by extremely rains and the bengalgram caterpillar (*Chorisa Obolus*) and the yield was much less than in the previous year. In Anantapur, the yield was the highest reported since 1917-18 though it was still below the normal. In Coimbatore, the crop was somewhat affected by heavy rains. In the other districts, the yield was above the normal.

Bengalgram.

In Tanjavely, horsegram was affected by heavy rains. The season was very favourable in the other districts, especially in Anantapur. The yields were the highest reported in Kurnool, Anantapur, Chittoor, North Arcot, and Salem. In Bellary, the yield was less than in the previous year though greater than in the preceding years and above the normal. In Cuddapah, the yield was the highest reported (1912-23 excepted).

Horsegram.

In Vengalpet, the yield of sugarcane was below the normal and the previous year owing to the unusual rains in March which delayed harvest and made the crop over-ripe; the crop was also attacked by red rot in parts. In the rest of the Circars and in Chittoor and Madras, the yield was above the normal; the yield in Chittoor was the highest reported (1913-19 excepted). The yield was below the normal in the other districts; it was however greater than in the previous year in Salem, Coimbatore, Trichinopoly, and the South, and on the West Coast. In Kurnool, Anantapur, South Arcot, North Arcot, Salem, and Trichinopoly, the crop suffered from drought during the early stages. In parts of South Arcot and North Arcot, the crop suffered from the attack of stem-borer during the South-West monsoon while heavy rains and winds in December and January lodged canes to some extent. In the Circars, the cultivation charges were high owing to the high price of ester cake and huskies and the high wages demanded by labourers. 'Mosaic' disease on sugarcane was noticed for the first time in the Presidency in East Godavari and South Arcot and in a few isolated fields in Trichinopoly and Coimbatore. The Agricultural Department is making every possible attempt to control its spread.

Sugarcane.

The summer crop of groundnut gave fair yields. The season was very favourable for the winter or main crop during the growing period but untimely heavy rains at harvest time reduced the yield and slightly affected the quality in most districts outside the Circars, especially in Salem, Tanjore, Trichinopoly, Coimbatore, and South Arcot. In the Circars, the yield was satisfactory. In Kurnool, bumper yields were obtained as in the previous year. In Bellary, the yield was slightly reduced as the soils are getting poorer owing to the crop being largely grown on the same field without rotation. In Anantapur and Chittoor, the yield was above the normal and was the highest reported since 1916-17. In Cuddapah, Chingleput, and Ramnad, the yield was normal. In South Arcot, the crop came up very well, at first, but heavy rains interfered with the proper formation of pods and the harvest and the yield was the lowest reported. In Salem, the crop suffered from drought up to December and untimely rains afterwards. In Madras, the yield was slightly reduced by drought. The yield was less than in the previous year except in Ganjur, Vengalpet, Anantapur, Cuddapah, and Chittoor.

Groundnut.

Early sowing gave good yields in the Circars and Ramnad. The yields in Gingelly, Ganjur and Vengalpet were the highest reported since 1917-18. The yield would have been higher in West Godavari but for the excessive rains during the growing period and at harvest. The yield was normal in Chingleput. In South Arcot and Tanjore, the yield was reduced by heavy rains at the time of harvest. In the Central districts, the yield was reduced by drought; in Coimbatore, the yield was the lowest reported, with the exception of the bad year, 1913-19. In Tanjavely, the yield was the highest reported though it was slightly below the normal. The

Gingelly.

late sown crop was generally normal. The yield was greater than in the previous year in all important districts except East Godavari, South Arcot, Salem, Coimbatore, and Madras.

• **Caster.**

In East Godavari, Kistna, Gunter, the Deccan (Bellary excepted), and Nellore, the season was very favourable for castor and yields were above the normal. In Kurnool and Anantapur, the yield was the highest reported while in Nellore, it was higher than in any previous year (1920-21 excepted). In Bellary, Chittoor, and Salem, the yield was normal. In West Godavari, the crop was affected by heavy rains. In Coimbatore and Trichinopoly, the yield was reduced to some extent by drought. The yield was greater than in the previous year in all important districts.

The yield of irrigated cotton was normal in Salem. In Coimbatore, untimely rains in the last week of January caused some loss of the combodia crop through early bud and flower shedding while untimely rains in the second week of March caused shedding of young bolls; the yield was therefore the lowest reported. The quality was not very good as yields in many places, in their eagerness to avail themselves of the sowing season which was short owing to late rains, purchased and sowed inferior combodia seed available in the bazaar. The yield of karunganni in Coimbatore was normal. In Trichinopoly, the summer pickings of combodia were poor. In Madras, the early sown crop suffered from excessive rains in November and December and the defective rainfall in May and June adversely affected the summer pickings. The yield was therefore the lowest reported. The crop fared better in Tanjore and Tinnevely though it was slightly below the normal; Manipattin (March-April sown) combodia was good.

In the South, the out of after-cultivation was greater than usual as wet weather prevailed for a long time immediately after sowing. In Madras, the yield of combodia was normal but the yield of thiruvellai was the lowest reported owing to the heavy rains of November and December for the first crop and to the defective rainfall in May and June for the second or summer crop. In Kurnool and Tinnevely, the sowing rains were late but sufficient rainfall was received afterwards with suitable spells of dry weather; the dry weather in February and March facilitated proper boll formation and bursting; the wind "Uppan" or sea breeze blew from the close of January and was beneficial; good rains were received in May for the summer crop. The yield was therefore only slightly below the normal in spite of the all round intensity of the crop. The quality was very satisfactory in Tinnevely as the percentage of karunganni admixture was higher than usual (as much as 60 to 80 per cent). In Coimbatore, the yield of karunganni was only slightly below the normal but the yield of the other varieties was reduced by untimely rains in the last week of January and the second week of March. In Salem, the yield was above the normal for uppan but below the normal for combodia. In Trichinopoly, combodia was very poor in growth but the yield of uppan was only slightly below the normal. Summer pickings of cottons were poor in the Central districts as the rainfall in May and June was much in defect. The yield of madara and barbon was poor in the Central districts. The cotton crop in Coimbatore and the South was freer from foreign admixture than formerly owing to the enforcement of the Cotton Transport Act.

(b) **North-
ern and
west-
erns.**

In the Deccan, untimely rains in the first half of December stained and lowered the quality of nasipuri or early cotton to some extent and reduced the yield slightly but the crop, especially in Bellary, put forth fresh leaves and flowers owing to the excess of moisture in the soil and gave a second picking which is unusual in this tract. The *Asapuri* or late crop gave a normal yield in Anantapur for the first time since 1917-18 and was better than in the previous year in Kurnool and Cuddanah though slightly below the normal owing to the rains of December and January. In Bellary, Akapuri cotton was attacked by *ashu* and shed the first formed flowers and bolls largely owing to untimely drizzle and cloudy weather in December and January; the bolls formed later had not sufficient time to mature before the commencement of summer; the vegetative growth was prolonged; the yield was therefore poor though better than in the previous five years. The quality of the crop was also lower than in the previous year.

(c) **Coim-
batore.**

In Gunter, cotton took to leafy growth owing to heavy rains and was attacked by *ashu*, *cutworm* (*Navodius armita*), and *leopard* *lice*; untimely rains in March reduced the yield further both in quantity and quality; the leaves were worm eaten, stained, and fell in colour and contained black leaf to some extent; the yield was

(d) **mainly
com-
bodia.**

Cotton
(unirri-
gated) (a)
thiruvellai,
com-
bodia,
karunganni,
uppan,
madara,
and bar-
bon.

the lowest reported since 1919-20. The quality of lint is reported to be gradually deteriorating in this district owing to—

(1) the practice in parts of the Palnad taluk, of picking the bolls too early and breaking them open artificially, and

(2) bad ginning and mixing of kapes in the ginning factories, especially in Narasaraopet centre where the bulk of Palnad cotton is ginned.

In East Godavari and Kistna, the yield was slightly below the normal and the previous year both in quantity and quality owing to the untimely rains in March. In Nellore, the season was favourable as in the previous year.

In Visnagapatam, the yield was the highest reported.

(3)
Others.

In Nellore and Chittoor, the yield of indigo was the highest reported since 1916-17. In Guntur, the yield was slightly above the normal but less than in the previous year. The yield was slightly less than the normal in Kistna, Kuranoel, Cuddapah, Chingelapat, and North Arcot, but greater than in the previous year except in Kistna. In North Arcot, the yield was poor but better than in the previous year. The manufacture of dye has been steadily decreasing for want of demand. A fairly large proportion of the crop was therefore utilized as green manure on wet lands, especially in the Carnatic and Central districts.

Aphis was reported as a serious pest on tobacco from various parts of the Presidency. In Visnagapatam, the yield was the highest reported. In the rest of the Circars, the yield was slightly below the normal as the early planted crop was affected by heavy rains; the quality also was lowered to some extent by heavy rains at the time of curing. In the Deccan, the yield was above the normal. In Salem, the yield was poor owing to insufficient water-supply. In Coimbatore, the crop suffered from untimely rain and the yield was the lowest reported. In Madras and Ramnad, the yield was about normal. The yield was less than in the previous year in all important districts except Visnagapatam.

Tobacco.

The yield of himalaya jute in the Circars was much better than in the previous two years. The mango crop was generally poor as in the previous year; in the Circars, cloudy weather caused the leaves to fall to some extent and the attack of the mango hopper reduced the yield. In Malabar, the flowering of mango trees was affected by the absence of the normal dew of the cold weather, owing to the untimely rains of December. *Phytophthora palmicola*, (Bat.) owing to the cyclone and heavy downpour in May 1925 and the subsequent wet weather. The disease is being controlled by systematic cutting and burning of dead palm trees and examination of trees within a radius of 200 yards of the affected trees. *Fariya* (common millet) was affected by excessive rains in the upland taluks of Guntur, except Palnad and Narasaraopet. The season was unfavourable to farmers in Guntur. Chillies in Guntur and Nellore suffered from waterlogging and an attack of thrips and the leaves turned yellow in some places. Garden crops in Nellore fared well. The yield of fodder chubus in Timoreilly was affected for want of a proper dry spell between two rainings in the early stages of growth. The quality of some land in Ramnad and Thiruvelli was affected by heavy rains. The season was very favourable to coconut on the West Coast in contrast to the previous two years; the rainfall from May to August encouraged proper growth and the intervals of bright weather in this period facilitated inter-cultivation and checked the spread of leaf-rot; the shortening of the dry period owing to the continuance of the North-East monsoon till January was highly beneficial. Considerable progress was made on the West Coast with the control of the coconut caterpillar, *Nephrolepis* by means of its parasites. The pepper crop on the West Coast was normal in contrast to the previous two years in spite of (1) the shedding of spikes and pith diseases due to heavy rains and (2) the damage by cyclone in parts. The yield of ginger was low. The main crop of potato in the Nilgiris suffered from insufficient rains, strong winds in June and July, the attack of the fungus disease, early blight (*Alternaria solani*) and ring disease; the second or seed crop was affected by potato moth and with ring disease to some extent. Fard crops in the Nilgiris were fairly good. The production of tea was good owing to favourable weather conditions and improvements in the manufacturing line; the better qualities are as good as the best Ceylon tea and are often preferred to the latter. As commerce demands good quality, there is little sale now for really poor grades, and careful picking has become indispensable.

Other crops.

Stocks of grains were generally sufficient, the deficit in some of the districts stocks having been made up by imports from outside.

SECTION VI—PRICES.

18. Prices were at first lower than in the corresponding period of the previous year except in Trichinopoly and the South where the yields had been below the normal. Prices fell steadily in most districts after September in the case of dry grains and after November in the case of rice owing to the fair harvests of both the early and the late season crops. Prices at the end of the year were generally lower than prices at the end of the previous year. Moreover, as the rate of fall in prices was generally more rapid than during the previous year, there was a greater divergence between the prices of corresponding months at the end of the year than at the beginning in most districts. Prices were at their lowest level from February to May for rice and March to June for cholan and ragi; for cumbar, the period of lowest prices was August to October in the Coimbatore, November to January in the Deccan, and Nellore, and February to April in the other districts.

Prices declined except in the case of betelnuts. There was a very heavy fall in the world price of sugar owing to overproduction. The production in 1924-25 was excessive owing to the record culture of the Cuban crop, the large yield of the Java crop, and the rapid recovery of the beet sugar industry in Europe. There was a large carry over in the principal countries of the world in April 1925 and production in 1925-26 was estimated to be even larger than in the previous year. Prices in India generally followed the course of New York market prices of Cuban raw sugar, but did not fall to a corresponding extent. Local prices of white Java sugar rose slightly in May but fell by more than 25 per cent at the end of October; there was a slight rise thereafter, the price at the end of the year being less than at the beginning by about seven per cent.

Prices showed a decline in the case of cotton, oil-seeds (except coconuts), oil-cakes, and unrefined sugar and an advance in the case of most other articles. The American cotton crop was the second largest on record and the crop in India was also large. The closing spot price in March 1926 of Middling American cotton at Liverpool was less than the opening price in April 1925 by 25 per cent. The prices of Madras cottons fell gradually, with short intervals of reaction, in sympathy with the decline in the price of American cotton. In the Madras Presidency, prices began to fall appreciably after October and, in March 1926, they were lower than those in April 1925 by about 20 per cent for combados, 25 per cent for turnsvettes, and more than 35 per cent for neethams, westerns, and cocanados. In spite of this fall in the prices of raw cotton, the price paid for cotton goods by consumers is still above the general average before the war. The local prices of ordinary groundnut seed rose from Rs. 57 per French candy f.o.b. at the beginning of April 1925 to Rs. 66 at the end of May, but gradually declined to Rs. 46 at the end of December, thereafter the price improved, the closing price for the year being Rs. 52-8-0. The average declared value of castor seed fell from Rs. 315 to Rs. 267 per ton owing to the large stock of the previous year. The price of pepper rose from Rs. 50 to Rs. 50 per cent during the year as there was a great demand for the produce of the West Coast owing to the partial failure of crops in the Malay Peninsula and the Spice Islands. The price of ginger was high as the yield was low. The price of bidilipatan pite was also high. There was a sudden and considerable fall in the price of turmeric. The price of coffee rose in the early part of the year owing to good demand but declined in the latter part owing to good stocks in London. The price of tea rose slightly owing to a strong and sustained demand for fine tea. The average declared value of rubber rose by 30 per cent owing to the greatly increased consumption and shortage of stocks; big fluctuations in price were experienced, the minimum being 1s. 4½d. on the 4th February 1925 and the maximum 1s. 6d. on the 9th December 1925.

SECTION VII—TRADE.

General.

19. Presidency figures of trade by sea in the main crops for 1924-25 and 1925-26 are given in the statement below:—

Figures in thousands of cwt. (i.e., 100 cwtals).

Article	1924-25.			1925-26.		
	Export.	Import.	Net export or import.	Export.	Import.	Net export or import.

Sugar	48	218	- 170	40	218	- 178

Note.—(1) The figures refer to both sea foreign and coastwise exports and imports.

(2) Net exports are indicated by +, and imports are indicated by —.

(3) Detailed information as to trade by rail is not available.

The trade of the Madras port was the highest on record, both in regard to imports and exports.

Imports.

There was a decline in the value of foreign imports, mainly under cotton goods. There was an increase in the imports of rice from Burma, which almost made up for the decrease in the imports from Bengal and Sind. Direct arrivals of foreign sugar were smaller than usual, but this was more than made up by imports of Java sugar from Calcutta, Bombay, and Karachi. Imports of gunnies increased, due to the heavy groundnut traffic.

Exports.

General.

The value of the export trade has now nearly tripled, compared with the average of about ten decades ago, and has risen even above the pre-war level. There was no stringency in the money market during the busy season. Exports increased appreciably under cotton, rubber, tea, groundnut, pepper, rice (mainly to Ceylon), halipatan juice, and fish (mainly to Ceylon and the Straits Settlements), but decreased appreciably under sugar, coffee, car manufactures, manures, and oil-cakes (mainly to Ceylon). The value of the exports of groundnut and raw cotton to foreign countries was the largest on record and made up 25 per cent and 18 per cent respectively of the total foreign export trade.

Course of

trade in

the main

export

crops.

Shipments of groundnut to Germany and to the Netherlands which were partly in transit to Germany more than doubled, mainly owing to the improved economic conditions of Germany, and exports to France and Belgium declined owing to the depreciation of the franc. Exports of groundnut oil to Bengal showed a large increase. Exports of castor seed and castor oil showed large increases owing to low prices; the United States took 92 per cent of the castor seed and the United Kingdom 72 per cent of the castor oil. Exports of coconut to Bombay and Burma improved. There was no demand for copra from foreign countries and the available exportable surplus of the kernel after consumption by the local mills was sent to Bombay and Karachi to the value of Rs. 81-14 lakhs. Coastwise exports of coconut oil declined; foreign exports are relatively small. The decline in the foreign trade in oil year and nothing was partly made up by increased exports to Bengal and Bombay. Exports of raw cotton to foreign countries rose by 50 per cent in quantity and 17 per cent in value; coastwise exports also showed a large increase. Japan continued to be the chief foreign customer and took 63 per cent of the quantity exported to foreign countries. Exports to Europe nearly doubled. There was a further decline in the exports of indigo dye owing to the increasing supply of cheap synthetic dyes from Germany; the exports were mainly to Egypt. Exports of myristicin were more than double those of the previous year in value. There was a fall in the exports of tannic acid and soma. The exports of sugar (mainly jaggery to Ceylon) were only 11 per cent of those in the previous year. The United Kingdom took only 49 tons of jaggery against 17,188 tons in 1924-25 and 27,090 tons in 1923-24 owing to the large world production and the comparatively high price of Madras jaggery. Exports of leaf tobacco rose by 14 per cent in quantity while the value rose by two per cent; imports of manufactured tobacco

declined by 43 per cent in value owing partly to the large production of cheap cigarettes from local tobacco. The pepper trade experienced an unprecedented boom during the year: shipments to the United States increased by more than 15 per cent and shipments to the United Kingdom more than tripled but shipments to Italy were reduced by 48 per cent probably owing to large stocks and the prohibitive price. There was an increased demand for chillies in Ceylon owing to the paucity of supply from Cochin. Exports of ginger declined steadily from 31,315 cwt. in 1921-22 to 7,063 cwt. in 1925-26 owing to rising prices. Exports of raw silk, fish, and live-stock (mainly to Ceylon) have been gradually increasing since 1923-24. The value of exports of dried and preserved fruits consisting chiefly of tamarind and cashewnuts nearly doubled. Exports of coffee decreased by 18 per cent in quantity and 13 per cent in value owing to good stocks in London, the difficulties of the frame exchange, and the reduced yield in ports. The value of the exports of tea (mainly black tea to the United Kingdom) has increased gradually from Rs. 118 lakhs in 1921-22 to Rs. 363 lakhs in 1925-26. Exports of raw rubber nearly quadrupled in value, as compared with 1922-23.

SECTION VIII—CATTLE

20. The mortality of cattle from contagious diseases decreased gradually from 75,174 in 1918-19 to 21,154 in 1925-26, the lowest figure reported since 1905-06. But the mortality was again on the rise in 1924-25 and 1925-26. The variations are mainly due to the incidence of rinderpest. This will be seen from the table below:—

Mortality amongst cattle	1918-19	1919-20	1920-21	1921-22	1922-23	1923-24	1924-25	1925-26
All contagious diseases	75,174	50,307	27,068	24,248	24,278	15,736	26,824	43,437
Rinderpest	18,184	31,217	12,254	14,131	4,279	9,420	9,691	23,230

About 29 per cent of the deaths in the year under review were reported from Kurnool where the mortality was nearly four times that in the previous year. Other districts where mortality was high were Ganjam (13 per cent), Bellary (9 per cent), South Kanara (8 per cent), and Kistna and Guntur (7 per cent each). Deaths from haemorrhagic septicaemia and anthrax were the highest reported since 1921-22. Deaths from black-quarter were greater than in the previous year though less than in the three years previous to 1924-25. Deaths from foot-and-mouth disease were nearly the same as in the previous year. These two diseases were severe in Guntur. Deaths from 'other contagious diseases' alone were less than in the previous year; Ganjam accounted for 56 per cent of the total deaths under this head in the Presidency.

In Kurnool, rinderpest which had been severe in the previous year became more virulent and widespread, especially in the taluks of Sandikotkur, Nandyal, Eluru, Konikonda, and Sireel. The district was responsible for 48 per cent of the total number of deaths from this disease in the Presidency. Cattle were imported from the Curran and Bellary to make good the deficiency. The disease was also widespread in South Kanara (12 per cent) and Bellary (11 per cent). Compulsory inoculation was enforced in parts of these districts. The mortality among the inoculated animals was only about half per cent. In Ganjam and Kistna, the disease was as severe as in the previous year. Guntur was also badly affected.

Haemorrhagic septicaemia was severe in Tanjore and Kistna as in the previous year. It was also severe in Guntur.

815 deaths were recorded under anthrax in Kurnool but many of these deaths seem to relate to other diseases, especially rinderpest.

The condition of cattle was generally satisfactory owing to the sufficiency of grazing and fodder. In parts of Guntur, the Decatur, and Bellary, grazing was insufficient till August. In Combarthura, grazing was insufficient between August and October and fodder between September and December. 17,270 cattle died in Kistna and Guntur in May 1925, owing to exposure to severe weather conditions as a result of the cyclone.

SECTION IX—AGRICULTURAL CHANGES.

Non-food
crops
versus
food
crops.

21. The cultivation of non-food crops, especially cotton and groundnut at the expense of food crops, regardless of returns, is increasing rapidly. The extension of such cultivation is attended with risk in a country which does not import much foodstuffs. It is true that the ryot gets some money for the time being but he has smaller stocks of food for himself and fobler for his cattle with which to face unfavourable seasons. This policy leads to an upsetting of the balance of his economic condition and is not conducive to his ultimate prosperity. The ryot can hardly use money when his granary is empty and, as money is spent more quickly than grain, the poorer ryot is a great liable to famine is liable to be left with neither grain nor money when seasons are adverse. The area under groundnut which was about 74,800 acres in 1882-83 has reached the figure of 2.6 million acres at the present day. The crop is now grown on all kinds of soil, from the poorest to the best black cotton soil. The rapid spread of the crop at the expense of cereals, especially in the irrigated tracts of the Coimbatore and the Deccan which are liable to frequent scarcity or famine, coupled with the export of groundnut seed and oil—maker is reducing the local supplies of fodder and oil-cakes and increasing their price. Shortage of fodder results in cattle being underfed; underfed cattle results in a low standard of cultivation; a low standard of cultivation results in a poor yield of crops and fodder which completes a vicious circle which is not conducive to the prosperity of the ryot.

Migra-
tion of
agricul-
tural
labourers
to towns.

There is a tendency for the more efficient agricultural labourers in villages to move to towns and engage in industrial labour on higher wages; some take up work in the new cotton ginning and groundnut decorticating factories, established in certain villages; a large number are also employed on the new railway lines, irrigation, etc. jobs, etc. under construction. Many emigrate to Barren, Assam, Ceylon, and the Straits Settlements for work on the tea and rubber estates, etc. in those countries. Hence scarcity of agricultural labourers is making itself felt in some parts. Higher wages have often to be paid for less efficient work. The cost of cultivation has therefore increased while the value of agricultural produce has declined. The result is that the net profit from land in terms of money is decreasing.

Decrease
of actual
cultiva-
ting
owners.

The number of actual cultivating owners is decreasing. Some of them become dealers and middlemen in agricultural produce, e.g. cotton and groundnut and they generally neglect the cultivation of their lands. Young men who have received some education often refrain from tilling after their lands themselves from false ideas of dignity. The standard of living has generally risen and this coupled with lower money profits from land and the wasteful expenditure on marriage, education, litigation, piousness charities, and occasionally drink is making the problem of agricultural indebtedness more acute.

Indebted-
ness.

A ryot in debt finds it difficult to get out of it. Owing to the high rate of interest and the absence of punctuality in repayment, the debt tends to double itself every seven or eight years until the ryot is compelled to sell his land to the money-lender or a non-cultivator. The creation of land mortgage banks under Government auspices where ryots can get long term loans, the extension of irrigation schemes in tracts liable to frequent scarcity, the starting of more co-operative credit, purchase, and sale societies, the development of village panchayats, the improvement of the methods of marketing so that the ryot can get the full value for his produce, and the organisation of subsidiary industries in the slack season for persons engaged in cultivating small uneconomic holdings would tend to reduce indebtedness and poverty. If ryots can get money loans without delay and incidental expense, they will resort more to such help.

Agricul-
tural
improvements—
obstacles.

The present economic condition of the ryot, the sparsity of labour and big landlords, and the disinclination of the people owning inferior dry lands to spend money on improvements which may not result in a return if the season is adverse, are great obstacles to the progress of agricultural improvements.

Progress
of im-
provements
in the year.

The favourable season generally aided progress in the demonstration of agricultural improvements in the Coimbatore (Kutina and Guntur excepted), the Carnatic, Chittoor, and North Arcot, and on the West Coast. Continuous wet weather restricted progress in cotton improvement work in the Deccan and was unfavourable for demonstration work in Kutina, Guntur, Coimbatore, Trichinopoly, and the South.

SECTION X.—CONDITION OF THE AGRICULTURAL POPULATION.

22. The year was fairly prosperous generally except in South Ararat, the Central districts (Chitloor excepted), and the Secon.

The ryot in the Circars had a good season as in the previous year and his indebtedness was on the decrease. In the coastal villages in parts of Kistna and Guntur, the cyclone in May 1925 damaged houses and fodder stacks and washed away cattle, sheep, and goats but Government came to the rescue by providing free grants of timber and advancing money, and private committees also assisted in the work. The ryot in the Decan had not as prosperous a year as the previous one. He was however able to replenish partially his stores of food-grains and fodder. There was greater contentment and less crime. He was slowly emerging from the clutches of the money lender to whom he was driven by the bad seasons of 1910-11, 1923-25, and 1925-26. The poorer ryots were not, however, able to reduce their debts appreciably owing mainly to the low price of cotton. The ryot in Bellary, Chitloor, and Chitloor was prosperous. In South Ararat, North Arcot, and Madras, and on the West Coast, his condition was better than in the previous two years. The condition of the ryot in the Central districts was not generally satisfactory as the supply of water in the wells was low. In Calcuttara, the small farmer occupied work as a day labourer and emigration increased in parts. There was no improvement in the condition of the ryot in Tanjore for, though the yield was better than in the previous year, there was a big drop in price immediately after harvest. Ryots in the South who had held up the previous year's stocks of paddy and cotton in the hope of securing remunerative prices were affected by the falling prices. The ryot on the West Coast recovered from the effect of the floods in the previous two years. He benefited by the abnormally high price of pepper and the high prices of copra and ginger; large catches of fish were also available.

Employment was generally available. Wages continued to be high in spite of the noticeable fall in the price of food grains and cloth, thus leaving a larger margin for the casual labourer who was paid in money and not in kind. His condition was however not much improved owing to drink though he was somewhat better off than before as compared with the small agriculturalist and the tenant farmer.

The inefficiency and high cost of manures continues to be a serious handicap to the increased yield of crops and to the improvement of the economic condition of the ryot. The increasing exports of oil seeds instead of the oil extracted therefrom have been reducing the supply of oil-cake for manure. The drain of organic manures like oil-cake and fish to outside countries cannot be replaced by the use of artificial manures like nitrate of soda and ammonium sulphate. This is clear from the researches of Lt.-Col. B. McCarrison, M.R.C.V.S., F.R.S., who has discovered from feeding tests that cereals obtained from plots which received organic manures like cattle manure are more nutritious than cereals produced from plots manured with artificials only. As there is no prohibition or restriction of the exports of indigenous nitrogenous manures like fish manure, fish guano, bones, and oil-cakes, the prices of these manures have risen to such an extent that a stage will be reached at a very distant date when it will be no longer profitable for the ryots to apply them. However, in the year under review, as a result partly of the propaganda work of the Agricultural Department, there was a decrease in the export of these manures to other countries from Rs. 29 lakhs to Rs. 16 lakhs while the value of imports of artificial manures rose to Rs. 7,19,552 from Rs. 3,30,589 in 1923-24, to Rs. 8,34,990 in 1923-24, and Rs. 8,43,928 in 1924-25.

Bill No. 45 of 1922—Indian Income-tax (Amendment)	82

Bill introduced in the Legislative Assembly.

BILL No. 45 OF 1922.

A Bill further to amend the Indian Income-tax Act, 1922, for certain purposes.

WHEREAS it is expedient further to amend the Indian Income-tax Act, 1922, for certain purposes hereinafter appearing: It is hereby enacted as follows:—

1. (1) This Act may be called the Indian Income-tax (Amendment) Act, 1922.
- (2) It shall come into force on the 1st day of April, 1922.
2. In sub-section (2) of section 10 of the Indian Income-tax Act, 1922 (hereinafter referred to as the said Act),—

(a) after clause (vi) the following clause shall be inserted, namely:—

"(vii) in respect of the replacement of animals which have been used for the purposes of the business otherwise than as stock in trade and have died or become permanently useless for such purposes, the difference between the original cost to the owner of the animals replaced and the amount, if any, realised on saleable in respect of the carcasses or animals, as the case may be," and

(b) after clause (a) the following proviso shall be inserted, namely:—

"Provided that nothing in clause (a) or clause (b) shall be deemed to authorize the allowance of any sum paid, an amount of any sum, sum or tax levied on the profits or gains of any business or interest of a proprietor or otherwise on the basis of any such profits or gains."

3. In clause (V) of sub-section (7) of section 24 of the said Act, after the words "in the form" the words "at the time of such assessment" shall be added.

4. After section 25 of the said Act the following section shall be inserted, namely:—

"25A. (1) Where any separation of interest occurs in any year among the members of a Hindu undivided family of which any income, profits or gains have not been assessed to tax before the date of such separation, a separate assessment shall be made in respect of such income, profits or gains as, where such income, profits or gains have accrued or arisen or been received during a period extending one year, is, in respect of the income, profits or gains of such year or part of a year included in such period, and the same or some portion or tax in respect of such income, profits or gains shall, notwithstanding anything contained in sub-section (2) of section 14, be payable by the members or persons of the family who or which have become separate, in proportion to their respective shares in the family property as finally determined for the purpose of the separation.

(2) When any such separation occurs, notice of the separation shall be given to the Income-tax Officer within fifteen days thereof and, if such notice is not so given, the Income-tax Officer may direct that to the amount of tax assessable under sub-section (1) in respect of any assessment there shall be added, by way of penalty such sum not exceeding that amount as he may determine.

(3) Where an assessment is to be made under sub-section (1), the Income-tax Officer may serve on any person who was a member of the undivided family immediately before the date of the separation a notice requiring all or any of the requirements which may be included in a notice under sub-section (1) of section 22, and the provisions of this Act shall, so far as may be, apply accordingly as if the notice were a notice issued under that sub-section."

5. For section 26 of the said Act the following section shall be substituted, namely:—

"26. (1) Where any change has occurred in the constitution of a firm of which any income, profits or gains have not been assessed to tax before the date of such change, such income, profits or gains shall be deemed to be income, profits or gains of the firm as constituted at the time of the making of the assessment, and the assessment in respect thereof shall be made accordingly.

(2) Where any person has succeeded to any business, profession or vocation of which any income, profits or gains have not been assessed to tax before the date of such succession, a separate assessment in respect of such income, profits or gains, or, where such income, profits or gains have accrued, arisen or been received during a period extending one year, a separate assessment in respect of the income, profits or gains of such year or part of a year included in such

period, shall be made as if the person engaged in the business, profession or vocation at the time of the making of such assessment, and the sum payable as tax in respect of such income, profits or gains shall be the sum which would have been so payable if the association had not existed.

Amendment.—Where any person has resorted to the business of a registered firm, the assessment shall be made as if the firm had continued to be a registered firm.

8. In sub-section (1) of section 35 of the said Act, —

(a) before the words "the Income-tax Officer may" the following words shall be inserted, namely:—

Amendment of section 35, Act 21 of 1918

"The Commissioner or Assistant Commissioner may, at any time within one year from the date of any order passed by him in appeal or, in the case of the Commissioner, in revision, under section 35 and—"

(b) for the words "of the assessment" the words "of the appeal, revision or assessment, as the case may be," shall be substituted;

(c) for the words "such income" the words "On income" shall be substituted; and

(d) in the proviso, for the words "the Income-tax Officer" the words "the Commissioner, the Assistant Commissioner or the Income-tax Officer, as the case may be," shall be substituted.

9. For sub-section (2) of section 42 of the said Act the following sub-section shall be substituted, namely:—

Amendment of section 42, Act 21 of 1918

"(2) All profits or gains accruing or arising to any person, whether directly or indirectly, from any property in British India or from any business carried on or transacted in British India by such person or, in the case of a person not resident in British India, by any agency or branch in British India on his behalf, shall, notwithstanding that they are not received in British India, be deemed, within the meaning and for the purposes of sub-section (1) of section 4, to be income accruing or arising within British India and shall be chargeable to income-tax under the head "Property" or the head "Business", as the case may be, and, in the case of a non-resident person, shall be charged in the name of the agent of such person, and such agent shall be deemed to be for all the purposes of this Act the assessee in respect of such income-tax."

Provided that any arrears of tax may be recovered due in accordance with the provisions of this Act from any assets of a non-resident person which are, or may at any time come, within British India.

(1d) For the purposes of sub-section (2), the amount of the profits or gains which shall be deemed to have accrued or arisen in British India in respect of any merchandise exported from British India shall be the profits or gains which would have accrued or arisen if such merchandise had been sold at the port of export after delivery on board ship.

(1e) Nothing in sub-section (2) or sub-section (1d) shall be deemed to relieve from liability to tax any profits or gains which have been received in British India by or on behalf of any person.

(1f) Where any profits or gains have accrued or arisen to any person directly or indirectly from the sale in British India by him or by any agency or branch on his behalf of any merchandise reported to British India by him or any agency or branch on his behalf from

any place outside British India, the whole profits or gains arising from such transactions shall be deemed to have accrued and arisen and to have been received in British India, and no allowance shall be made under clause (12) of sub-section (3) of section 10 in respect of any buying or other commission whatsoever not actually paid, or of any other amounts not actually spent, for the purpose of arriving at such profits or gains."

Amendment of section 10, Act XI of 1914.
1915.

8. After sub-section (7) of section 10 of the said Act the following sub-section shall be inserted, namely:—

"(7A) For the purpose of sub-section (7) the Income-tax Officer may deduct the recovery of any sum less than the amount of the interest and any advance the sum so deducted to be recovered from time to time in the case of a continuing default, or however that the total sum so deducted to be recovered shall not exceed the amount of the interest payable."

Amendment of section 10, Act XI of 1915.
1915.

9. To section 10 of the said Act the following sub-section shall be added, namely:—

"(11) For the purpose of this section, 'total income' includes, in the case of any person not resident in British India, all incomes, profits and gains wherever arising, wherever so accrued, which, if arising, accruing or received in British India, would be included in the computation of total income under section 10."

(12) Nothing in this section shall enable in any refund any sum to a person not resident in British India who is neither a British subject, nor a citizen of India, nor a subject of a State in India."

Amendment of section 10, Act XI of 1915.
1915.

10. The proviso to section 10 of the said Act shall be omitted.

Amendment of section 10, Act XI of 1915.
1915.

11. After section 10 of the said Act the following section shall be inserted, namely:—

"10A. Nothing in clause (14) of section 2 shall be deemed to require an Income-tax Officer to register the prescribed particulars in regard to any firm if he is not satisfied that the profits and gains of the firm are distributed to the partners therein in proportion to their individual shares as specified in the instrument of partnership."

STATEMENT OF CONCLUSIONS AND REASONS.

1. It has been held that draught animals and other live stock are not 'plant' within the meaning of section 10 (3) (iv) of the Income-tax Act, 1915 (XI of 1915). But as horses, bullocks, elephants, etc., used for draught purposes are analogous to 'plant', it is proposed in clause 1(a) of the Bill to perch on assessors in computing the income from business or profession to deduct as a business expense the cost of the live stock purchased for use in his business (not as stock or trade) to replace his stock as used.

2. The Calcutta High Court have held that land was held as an asset in an allowable deduction from the assessable profits of the mine. The cost though necessarily lent to ascertain the profit is actually calculated with reference to the annual profits of the mine. It is therefore a loss or profit and generally speaking any charge that is of the nature of a loss or profit is not allowed as a deduction in computing income-tax. Moreover the Central Government have always contended that mineral or local taxes on profits should

not take precedence of Central taxes on the same profits and if this principle is verified, various laws to Central revenues may result. Clause 2 (1) of the Bill makes it clear that no account is set against a debit, in computing income, any sum paid to a local authority in respect of any tax (now, rate, etc.) assessed on the basis of profits even though it may be technically imposed on immovable property.

3. The Amendment as to the correct procedure for the assessment in the year following the one in which partition is effected in a Hindu undivided family. Clause 4 of the Bill provides for assessment in such cases.

4. There are conflicting rulings pronounced by the Bombay and Allahabad High Courts as to how the assessment should be made in two years after there has been a change in the "constitutions" of an assessors, where for example, a firm has become a Company. While the Allahabad High Court have held that where a firm has become a Company, the assessment should be made as though the firm were still in existence at the time of assessment, the Bombay High Court have ruled that the assessment should be made as though the Company had been in existence when the profits that have to be taxed were earned. Clause 5 of the Bill follows the Allahabad High Court ruling and also extends to reinforce the principle of the proviso to section 58 under which where there has been a change in the personnel of firm, the profits of the firm at the time of assessment are assessed in proportion to the profits of the firm in the previous year with reference to the shares that each then holds.

5. It is necessary to confer on the Assistant Commissioners of Income-tax and Commissioners of Income-tax the power to modify additions to their regulations or revise orders which they do not at present possess. Clause 6 of the Bill confers such power.

6. Clause 7 of the Bill makes the law more definite in regard to the assessment of the profits of (1) export trade conducted by (a) residents and (b) agencies or branches in British India of non-residents and (2) import trade conducted by agencies or branches in British India of non-residents. Section 42 of the Act which deals with the assessment of non-residents in regard to this is rather satisfactory from the view of the Government but not in the long run. Moreover, conflicting decisions on this subject have been pronounced by the High Courts of Madras, Calcutta and Bombay.

7. At present an Income-tax Officer has no power to impose a penalty of less than the maximum amount mentioned in section 45 of the Act. It is considered desirable to empower an Income-tax Officer to impose a penalty less than the maximum and to increase it successively up to the maximum should the default in payment of tax be repeated, as by the assessee.

8. Following the British Income-tax law, it is proposed to withhold the grant of refunds under section 45 (which contains relief) in respect of dividends of Companies and interest on Indian securities from non-residents who are not British subjects or subjects of Indian States, while it tends to non-residents. British subjects or subjects of Indian States will be allowed and calculated for with reference to all present to the dividend's total income from the British States, but with reference to his total income wherever derived which would be taxable if it occurred, income was received in British India. To non-residents who are not British subjects except subjects of Indian States there seems to be no reason why India should be more generous than the

United Kingdom. As the law at present stands, large sums are refunded to non-resident shareholders many of whom may be in receipt of considerable income in other countries and the non-resident shareholder enjoys an unfair advantage over residents in British India. Clause 9 of the Bill gives effect to the above proposal.

8. At present many bogus partnership deeds are produced for registration before the Income tax Officers under section 4 (14) of the Act even when the accounts are incomplete and show no division of profits amongst the partners. It appears, therefore, desirable to provide that a firm should not be registered unless it not merely file a deed of partnership specifying the partners' shares, but also actually divide the profits in accordance with those shares. Clause 11 of the Bill gives effect to the proposal.

BILL No. 7 of 1927.—Madras Planters Labour (Regulating)	13
<i>Supplementary:</i>	
Act No. 7 of 1926.—Madras Hospital Schools.—Hyderabad.	
Bill No. 4 of 1927.—Madras Village Police Regulation Amendment.—Oolga.	

BILL to be introduced in the Council of the Governor of Fort St. George for the purpose of making Laws and Regulations.

Under rule 18 of the Madras Legislative Council Rules, the following Bill, together with the Statement of Objects and Reasons, is published for general information:—

BILL No. 7 of 1927.

A Bill to Repeal the Madras Planters Labour Act, 1903.

WHEREAS it is expedient to repeal the Madras Planters Labour Act, 1903, and whereas the previous sanction of the Governor-General has been obtained to the passing of this Act; It is hereby enacted as follows:—

1. (a) This Act may be called the Madras Planters Labour (Regulating) Act, 1927.

(b) It shall come into force on the 1st day of April 1930.

2. The Madras Planters Labour Act, 1903, is hereby repealed.

Repeal of Madras Act 3 of 1903.

STATEMENT OF OBJECTS AND REASONS.

The Madras Plantation Labour Act, I of 1908, provides, among other matters, for the imposition of penalties for breach of labour contracts. Modern public opinion regards with disapproval the existence of penal laws against one class of the community, and the tendency of recent legislation is to abolish all such laws relating to labour contracts on exactly the same footing as other civil contracts. The abolition of penal provisions has been effected in the colonies where Indian labour is employed and it is difficult to justify the retention of such provisions in India. The recent repeal of the Workmen's Breach of Contract Act XIII of 1859, moreover, has given to planters in the two districts to which alone Madras Act I of 1908 has been applied a statutory control over their labour which is not enjoyed by any other employer of labour in the Presidency. It appears desirable therefore to exempt from this Act all provisions imposing penalties on labourers; and as the effect will be to deprive the Act of its principal features it is proposed to repeal the entire Act. In order, however, to avoid a disturbance of the important planting industry, and to enable the industry to readjust its organizations to suit the altered conditions, it is proposed that the repeal shall take effect three years hence.

18th February 1927.

M. USMAN.

SUPPLEMENT TO PART II

THE FORT ST. GEORGE GAZETTE

No. 83

MADRAS, TUESDAY EVENING, FEBRUARY 22, 1927.

[Part, 2 pds.

ABSTRACT OF SEASON REPORTS FOR THE WEEK ENDING 19th FEBRUARY 1927.

GENERAL SUMMARY.

The weather was generally dry except for some local showers in Coimbatore, Ponnampet, Raman and Nallur. Transplantation of seedling of paddy in East and West Godavari, Coimbatore and South Kanara proceeding. Standing crops have either withered or are withering in parts of many districts for want of rain. Harvest of paddy in Guntur, Bellary, the Coarain, parts of the Central and Southern districts and the West Coast, chulam in East Godavari, Kurnool, Nellore, Chingelput and Coimbatore, ragi in Undulapudi and Raman, pulses in parts of the Coarain, Anantapur and Chingelput, cotton, chillies and tobacco in parts of the Coarain, cotton of sugarcane in parts of the Coarain and the central districts, Bellary and South Arcot and picking of cotton in Guntur, parts of the Decan, Nellore and Raman proceeding; cottons generally poor to fair except in Viragapattam, East Godavari, Kistna, Chittoor, North Arcot, Trichinopoly, Tanjore and South Kanara where it was fair. Water-supply generally inadequate in parts of most districts. Pasture scarce in parts of Ponnampet, Kistna, Guntur, the Decan, Nellore, the Central districts and Raman. Fodder generally sufficient except in parts of Kistna, Guntur, Raman and Bellary. Prices fairly steady. Prospects not satisfactory especially in parts of Guntur and the Decan.

W. S. BROWN,
Secretary.

BOARD (LAND REVENUE AND ENCLOSURES),
MADRAS, 22nd February 1927.

DISTRICT REPORTS.

GANJAM.

Local showers in the end; over one inch at Talikudi. Water-supply insufficient for drinking in parts of the Sarda, Sompoti and Talikudi taluks and the Narasimhapeta taluk and for agricultural purposes in all taluks except Sarda and Ganjam. 10.05 feet of water

in the Sarda reservoir and 10.70 feet in the Narasimhapeta reservoir. Standing crops generally fair. Cotton of sugarcane proceeding; cottons poor to normal. Employment available. Grain stocks sufficient. Prospects tolerable.

VIRAGAPATTAM.

Local showers in the end. Water-supply sufficient in a few taluks for agricultural purposes. Standing crops fair. Cotton of sugarcane proceeding; cottons fair. Employment available. Grain stocks sufficient. Prospects more or less steady. Fall in the price of ragi at Narasimhapeta.

KISTNA GODAVARI.

Water-supply sufficient. The Godavari 2.2 feet below the level of the season. Transplantation of second crop paddy proceeding. Standing crops fair. Harvest of chulam, pulses and chillies and cotton of sugarcane proceeding; cotton of sugarcane and chillies normal, ragi fair. Employment available. Grain stocks sufficient. Prospects settled.

WEST GODAVARI.

Water-supply sufficient in the delta but deficient in the uplands. Transplantation of second crop paddy and sowing of sugarcane proceeding. Standing crops fair in the delta, but dry crops in the uplands and chillies. Harvest of sorghum, cotton, tobacco and chillies and sowing of sugarcane proceeding; cottons of sugarcane normal; sorghum, tobacco, wheat, rice, cotton poor; maize bad. Employment available. Grain stocks sufficient. Rise in the price of ragi and maize at Narasimhapeta.

KISTNA.

Water-supply sufficient for agricultural purposes except in the Narasimhapeta and Sompoti for drinking in the Narasimhapeta and Sompoti districts. The Kistna 2.2 feet below the level of the season. Standing crops fair except the dry crops in parts of the Sompoti taluk. Harvest of chulam, chillies and tobacco proceeding; cottons of chulam, rice, chulam normal, tobacco poor to bumper. Employment available. Grain stocks sufficient except in the Narasimhapeta. Prospects good.

GUNTUR.

Water-supply sufficient for drinking except in parts of the Dapoli, Guntur, Polavali and Ponnampet taluks and in some upland villages of the Dapoli taluk. Supply for irrigation diminishing in delta, nearly and sufficient in mid lands. Standing dry crops in the upland taluks of Guntur, Raman, Ponnampet,
